# | Getting the most out of this training

- Key guideline review
- Multiple choice processing
- Time management
- Process of elimination
- Marking your books

# | Process of Elimination

Training covers the process of elimination:

- Look at the answers first.
- Are there key instructions or guidelines for the answers provided?
- Are there parenthetical statements for CPT or “code first” statements?
- Typically can eliminate 2 answers immediately

# | Time Management

- Just over 2 minutes per question
- Mark difficult questions and come back to them later
- Read the question first, and then the scenario
- No specific format for completion

# | Marking Your Books

- Underline main terms
- Highlight key points
- Write effective reminders, such as guidelines

# Compliance and Regulatory / Business of Medicine

---

CPC Review

# | Payers

## Self-Pay vs. Insurance

- Self-pay
- Insurance
  - Private (commercial) insurance
    - BCBS
    - Aetna
    - Cigna
  - Government insurance
    - Medicare
    - Medicaid
    - TriCare

# | Medicare

## Services Covered by Different Parts of Medicare

Part A

Part B

Part C

Part D

# | Medical Necessity

Services or supplies that:

- are proper and needed for the diagnosis or treatment of your medical condition,
- are provided for the diagnosis, direct care, and treatment of your medical condition,
- meet the standards of good medical practice in the local area, and
- aren't mainly for the convenience of you or your doctor.

# | National Coverage Determinations

- National Coverage Determinations (NCD) help to spell out CMS policies on when Medicare will pay for items or services.
  - Each Medicare Administrative Carrier (MAC) is then responsible for interpreting national policies into regional policies (LCDs).
  - LCDs only have jurisdiction within their regional area.

# Advance Beneficiary Noti

- Providers are responsible for obtaining an ABN prior to providing the service or item to a beneficiary.
- The form must be filled out in its entirety as well as the potential cost to the patient and the reason why Medicare may deny the service.
- Only the approved Form CMS-R-131 is valid for Medicare beneficiaries and the forms may not be altered other than to add the practice name on the form.

A. Notifier:

B. Patient Name:

C. Identification Number:

## Advance Beneficiary Notice of Noncoverage (ABN)

**NOTE:** If Medicare doesn't pay for D. \_\_\_\_\_ below, you may have to pay.

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the D. \_\_\_\_\_ below.

D.	E. Reason Medicare May Not Pay:	F. Estimated Cost

### WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
  - Ask us any questions that you may have after you finish reading.
  - Choose an option below about whether to receive the D. \_\_\_\_\_ listed above.
- Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

### G. OPTIONS: Check only one box. We cannot choose a box for you.

- OPTION 1.** I want the D. \_\_\_\_\_ listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I can appeal to Medicare by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.
- OPTION 2.** I want the D. \_\_\_\_\_ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. I cannot appeal if Medicare is not billed.
- OPTION 3.** I don't want the D. \_\_\_\_\_ listed above. I understand with this choice I am not responsible for payment, and I cannot appeal to see if Medicare would pay.

### H. Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call 1-800-MEDICARE (1-800-633-4227/TTY: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0566. The time required to complete this information collection is estimated to average 7 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimates or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Baltimore, Maryland 21244-1830.

# | HIPAA

- National standards for electronic healthcare transactions and code sets
- National unique identifiers for providers, health plans, and employers
- Privacy and Security of health data

# Health Insurance Portability and Accountability Act (HIPAA)

## Code Sets

- HCPCS – Healthcare Common Procedure Coding System
  - CPT® - Current Procedural Terminology
  - CDT - Dental Procedures and Nomenclature
  - ICD-10-CM (ICD-9-CM Prior to October 1, 2015) – International Classification of Diseases, 10th revision, Clinical Modification
  - NDC – National Drug Codes
- 
- Although HIPAA mandates the use of the specified code sets, it does not mandate the use of its conventions or guidelines, except for the ICD-10-CM.

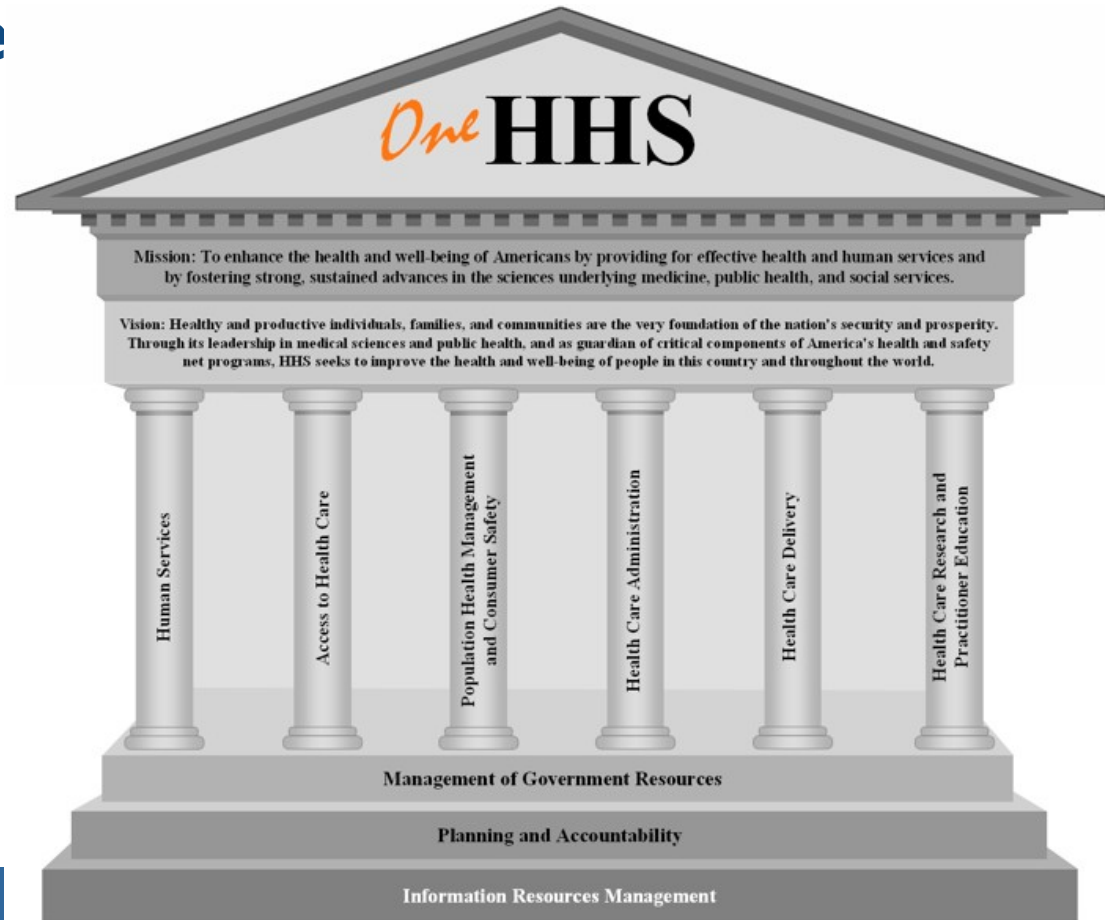

# | HITECH

- The Health Information Technology for Economic and Clinical Health Act
  - Promote the adoption and meaningful use of health information technology
  - Strengthened HIPAA
  - Patient audit trail

# IG Compliance

## IG Compliance

# **I** **OIG Compliance Plan**

1. Conduct internal monitoring and auditing.
2. Implement compliance and practice standards.
3. Designate a compliance officer or contact.
4. Conduct appropriate training and education.
5. Respond appropriately to detected offenses and develop corrective action.
6. Develop open lines of communication with employees.
7. Enforce disciplinary standards through well-publicized guidelines.

# | Reviewing an Operative

## Operative Report Elements

# | Merit-Based Incentive Payment Systems (MIPS)

## Quality Payment Program:

- Eligible Clinicians
  - Physicians include: Doctors of chiropractic, dental medicine, dental surgery, medicine, optometry, osteopathy, and podiatric medicine.
- Exclusions
  - First year in Medicare
  - Qualifying APM Participant
  - Do not meet the low volume threshold
- Submitter Types
  - As an individual
  - Group, Virtual Group
  - As an APM entity

# | Merit-Based Incentive Payment Systems (MIPS)

## MIPS Performance Categories:

- Quality
  - Must submit at least six quality measures during the 12-month period
- Promoting Interoperability
  - Must report measures from each of the four objective measures for 90 continuous days
- Improvement Activities
  - Must report a combination of high and medium weighted measures for 90 continuous days
- Cost
  - CMS analyzes data from both Part A and Part B claims to calculate the overall cost of the patient care.

# | Advanced Alternative Payment Models (APM)

**An APM is a group of clinicians who have voluntarily come together in an organized way to deliver coordinated high-quality care to Medicare patients.**

- Advanced APM entities agree to:
  - Use of certified EHR technology (Must be certified under 2015 criteria);
  - Base payment on quality measures comparable to MIPS; and
  - Either bear more than nominal risk for financial losses or is a Medical Home Model expanded under CMS Innovation Center authority.

# | Coding Conventions and Guidelines

## **Overview**

- Conventions for the ICD-10-CM
- Official ICD-10-CM Guidelines for Coding and Reporting

# ICD-10-CM Official Guidelines for Coding and Reporting

## Referencing the Guidelines

- Guidelines found at beginning of the ICD-10-CM code book

Section I. Conventions, General Coding Guidelines and Chapter Specific Guidelines

### A. Conventions for the ICD-10-CM

1. The Alphabetic Index and Tabular List
2. Format and Structure
3. Use of codes for reporting purposes
4. Placeholder character
5. 7<sup>th</sup> Characters
6. Abbreviations
  - a. Alphabetic Index abbreviations
  - b. Tabular List abbreviations
7. Punctuation
8. Use of "and"
9. Other and Unspecified codes

# Coding Conventions

## Abbreviation NOS

- Not otherwise specified
- Lacks information to use a more specific code

Index to Diseases and Injuries:

Sinusitis (accessory) (chronic) (hyperplastic)  
(nasal) (nonpurulent) (purulent) J32.9

Tabular List:

J32.9 Chronic sinusitis, unspecified  
Sinusitis (chronic) NOS

# Coding Conventions

## Parentheses

- Enclose supplementary words
- Nonessential modifiers

Pneumonia (acute) (double) (migratory) (purulent) (septic) (unresolved) J18.9  
with  
    lung abscess J85.1  
        due to specified organism – *see* Pneumonia,  
            in (due to)  
    influenza – *see* influenza, with, pneumonia  
    adenoviral J12.0  
    adynamic J18.2  
    alba A50.04  
    allergic (eosinophilic) J82  
    alveolar – *see* Pneumonia, lobar  
    anaerobes J15.8  
    anthrax A22.1

# Coding Conventions

## With

- Means “associated with” or “due to” when it appears in a code title, the Alphabetic Index, or an instructional note in the Tabular List.
- Presumed causal relationship between the main term and the terms listed under the entry “with.”

Diabetes, diabetic (mellitus) (sugar) E11.9  
with  
amyotrophy E11.44  
arthropathy NEC E11.618  
autonomic (poly)neuropathy E11.43  
cataract E11.36  
Charcot's joints E11.610  
Chronic kidney disease E11.22

# ICD-10-CM Official Guidelines for Coding and Reporting

## Referencing the Guidelines

- A documented reference appears as Section I.C.4.a.2.
- This indicates the guideline is found in:
  - Section I. Conventions, General Coding Guidelines and Chapter Specific Guidelines
  - Section I.C. Chapter-Specific Coding Guidelines
  - Section I.C.4. Chapter 4: Endocrine, Nutritional, and Metabolic Diseases (E00-E89)
  - Section I.C.4.a. Diabetes mellitus
  - Section I.C.4.a.2. Type of diabetes mellitus not documented

# ICD-10-CM Official Guidelines for Coding and Reporting

## Guideline Reference: I.C.4.a.2.

### Section I. Conventions, General Coding Guidelines and Chapter Specific Guidelines

#### C. Chapter Specific Coding Guidelines

#### 4. Chapter 4: Endocrine, Nutritional, and Metabolic Diseases (E00-E89)

##### a. Diabetes mellitus

The diabetes mellitus codes are combination codes that include the type of diabetes mellitus, the body system affected, and the complications affecting that body system. As many codes within a particular category as are necessary to describe all of the complications of the disease may be used. They should be sequenced based on the reason for a particular encounter. Assign as many codes from categories E08-E13 as needed to identify all of the associated conditions that the patient has.

##### 1) Type of diabetes

The age of a patient is not the sole determining factor, though most type 1 diabetics develop the condition before reaching puberty. For this reason type 1 diabetes mellitus is also referred to as juvenile diabetes.

##### 2) Type of diabetes mellitus not documented

If the type of diabetes mellitus is not documented in the medical record the default is E11.-, Type 2 diabetes mellitus.

##### 3) Diabetes mellitus and the use of insulin, oral hypoglycemics, and injectable non-insulin drugs

# | Locating the ICD-10-CM Code

## Code Structure

- **Chapter** – based on body system or condition.
  - Example: Chapter 4: Endocrine, Nutritional, and Metabolic Diseases (E00-E89)
- **Section** - A group of three-character categories
  - Example: Diabetes mellitus (E08-E13)
- **Categories** - Three-character code numbers
  - Example: E11 Type 2 diabetes mellitus

# | Locating the ICD-10-CM Code

## Code Structure

- **Subcategories** can be 4, 5, or 6 characters
  - 4<sup>th</sup> character further defines the site, etiology, and manifestation or state of the disease or condition.
    - Example: E11.6 Type 2 diabetes mellitus with diabetic arthropathy
  - 5<sup>th</sup> or 6<sup>th</sup> character represent the most accurate level of specificity.
    - Example: E11.610 Type 2 diabetes mellitus with diabetic neuropathic arthropathy

# | Locating the ICD-10-CM Code

## Code Structure

- 7<sup>th</sup> character extenders

- Example:

- T16 Foreign body in ear

- The appropriate 7<sup>th</sup> character is to be added to each code from category T16

- A = initial encounter

- D = subsequent encounter

- S = sequela

T16.1XXA Foreign body in right ear, initial encounter

# | Locating the ICD-10-CM Code

## **Step-by-step instructions**

1. Find the documented diagnosis
2. Determine the main term
3. Look up the main term in the Index to Diseases and Injuries (Alphabetic Index)
4. Find the code in the Tabular List
5. Review all conventions and notes associated with the code

# | Locating the ICD-10-CM Code

## Main Term

- What is the disease?
- What is the illness?
- What is the symptom?

Acute Bronchitis

Main Term: Bronchitis

# | Locating the ICD-10-CM Code

## **Main Term**

- Ruptured ovarian cyst
- Abdominal pain
- Chronic sinusitis
- Febrile convulsions

# Locating the ICD-10-CM Code

Look up the main term in the Index to Diseases and Injuries (Alphabetic Index)

**Bronchiolitis** – *continued*  
respiratory, interstitial lung disease J84.115

**Bronchitis** (diffuse) (fibrinous) (hypostatic)  
(infective) (membranous) J40  
with  
influenza, flu, or grippe - see Influenza, with,  
respiratory manifestations NEC  
obstruction (airway) (lung) J44.9  
tracheitis (15 years of age and above) J40  
acute or subacute J20.9  
chronic J42  
under 15 years of age J20.9  
acute or subacute (with bronchospasm or  
obstruction) J20.9  
with  
bronchiectasis J47.0  
chronic obstructive pulmonary disease J44.0

# Locating the ICD-10-CM Code

Look for the subterm “acute”

# CPT<sup>®</sup>, Surgery Guidelines, HCPCS Level II, and Modifiers

CPC Review

# | Introduction to CPT®

- The CPT® code set includes three categories of medical nomenclature with descriptors.
  - Category I
  - Category II
  - Category III

# | Introduction to CPT®

- Instructions for use of the CPT® code book
  - Unlisted procedure
  - CPT® use by any qualified healthcare professional
  - Parenthetical notes
  - Accuracy and quality of coding
    - Related guidelines
    - Parenthetical instructions
    - Other coding resources

## **CPT® Guidelines**

- Referenced in the introduction of each section and subsection of the CPT® code book
- Applicable to the section being referenced
- Define the information necessary for choosing the correct code

# | CPT® Conventions and Iconography

Used throughout the CPT® code book and include:

- Indentations
- Code symbols - iconology
- Parenthetical instructions

# | CPT® Conventions and Iconography

; The semicolon and the conventional use of indentions

The use of the semicolon divides the description of a code into two parts:

- The “stand-alone” code or the “common portion of the procedure” code descriptor
- The indented descriptor is dependent on the preceding “stand-alone” code

# | CPT® Conventions and Iconography

- + The “add-on” code symbol - Add-on codes are never reported alone. They are always modifier 51 exempt.
- The red bullet - new procedure code
- ▲ The (blue) triangle - code revision
- ▶◀ Opposing triangles - indicate new and revised text other than the procedure descriptors

# | CPT® Conventions and Iconography

⊘ The circle with a line through it - exempt from the use of modifier 51

The lightning bolt symbol - codes for vaccines that are pending FDA approval.

# The number symbol – Re-sequenced and are out of numerical order

# | Category I CPT® Codes

The CPT® code book divides Category I CPT® codes into six main section titles:

- Evaluation and Management
- Anesthesiology
- Surgery
- Radiology
- Pathology and Laboratory
- Medicine

# | Category I CPT® Codes

- Section titles have subsections divided by anatomic location, procedure, condition, or descriptor subheadings.
- The subheadings, structured by CPT® conventions, may list alternate coding suggestions in parenthetical instructions.
- Example:
  - Section: Surgery (10021-69990)
  - Subsection: Integumentary System
  - Subheading: Skin, Subcutaneous and Accessory Structures
  - Category: Debridement

Alternate coding suggestions

- (For dermabrasions, see 15780 – 15783)
- (For nail debridement, see 11720-11721)
- (For burn(s), see 16000-16036)
- (For pressure ulcers, see 15920-15999)

# | The CPT® Code Book

- CPT® Sections
- Section Guidelines
- Section Table of Contents
- Notes
- Category II codes
- Category III codes
- Appendices A-O
- Alphabetic Index

## | CPT® Code Basics

- Review medical documentation thoroughly and gather additional reports
- Reference the alphabetical index for a CPT® numerical code and/or code range.
  - Condition
  - Procedure or service
  - Anatomic site
  - Synonyms, eponyms, and abbreviations
- Review the numerical code and/or code range for specific descriptions
- Follow CPT® Guidelines, Conventions, and Iconology

## | Category II CPT® Codes

- Alphanumeric format, with the letter “F” in the last position, eg, 0001F
- Optional “performance measurement” tracking codes
- Used to report Quality to Medicare under Quality Payment Program
- Formerly referred to as Physician Quality Reporting System (PQRS)

## | Category III CPT® codes

- Temporary codes
- Alphanumeric structure, with a “T” in the last position, eg, 0042T
- Can be reported alone, without an additional Category I code

# | CPT® Appendices

## Appendix A - Modifiers categorized:

- Modifiers applicable to CPT® codes
- Anesthesia Physical Status Modifiers
- CPT® Level I Modifiers approved for Ambulatory Surgery Center (ASC) Hospital Outpatient Use
- Level II (HCPCS/National) Modifiers

# | CPT® Appendices

- Appendix B - changes and additions to the CPT® codes from the previous year
- Appendix C - clinical E/M examples for different specialties
- Appendix D – Add-on Codes

## | CPT® Appendices

- Appendix E – Exempt from the use of modifier 51 (multiple procedures)
- Appendix F – Exempt from the use of Modifier 63 (procedures performed on infants less than 4kg)
- Appendix G – Removed from the CPT® code book (2017).

# | CPT® Appendices

- Appendix H – Alphabetic Index of Performance Measures by Clinical Condition or Topic
  - Available only on the AMA website
  - [www.ama-assn.org](http://www.ama-assn.org).
- Appendix I – Genetic Testing Code Modifiers
  - Removed from the CPT code book (2013)
- Appendix J - Electrodiagnostic Medicine Listing of Sensory, Motor, and Mixed Nerves

# | CPT® Appendices

- Appendix K - Product Pending FDA Approval
- Appendix L - Vascular Families
  - Based on the assumption that a vascular catheterization has a starting point of the aorta
- Appendix M - Crosswalk to Deleted CPT® Codes
- Appendix N - Summary of Re-sequenced CPT® Codes
- Appendix O – Multianalyte Assays
  - Laboratory use

# | CPT<sup>®</sup> Appendices

- Appendix P – CPT<sup>®</sup> Codes that May Be Used for Synchronous Telemedicine Services
  - These codes are used with real-time telemedicine services when appended with modifier 95.

# | National Correct Coding Initiative (NCCI)

- Implemented by CMS
- Promotes correct coding methodologies
- Controls the improper assignment of codes that results in inappropriate reimbursement

Medicare publishes CCI:

<http://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/index.html>

# | Sequencing

- Based on RBRVS
  - Physician Work
  - Practice Expense
  - Professional Liability/Malpractice Insurance
- Highest RBRVS listed first

<http://www.cms.gov/apps/physician-fee-schedule/overview.aspx>

## **CPT<sup>®</sup> Assistant**

- Articles answering everyday coding questions
- CCI bundling information
- E/M billing guidance
- Current code use and interpretation
- Case studies demonstrating practical application of codes
- Anatomical illustration charts and graphs for quick reference
- Information for appealing insurance denials
- Information to validate code usage when audited

## **CPT® Global Surgical Package**

- Includes a standard package of preoperative, intraoperative, and postoperative services
- Payer policies may vary
- May be furnished in any service location
  - For example, a hospital, an ambulatory surgical center (ASC), or physician office

# | CPT® Global Surgical Package

Included in the surgery package and not separately billable:

Inclusive

- Local infiltration, metacarpal/metatarsal/digital block or topical anesthesia
- Subsequent to the decision for surgery, one related E/M encounter on the date immediately prior to or on the date of procedure (including history and physical)
- Immediate postoperative care, including dictating operative notes, talking with the family and other physicians
- Evaluating the patient in the post-anesthesia recovery area
- Writing orders
- Typical postoperative follow-up care

# | CMS Global Surgical Package

- Major Surgery: Has a preoperative period of 1 day with 90 days for the postoperative period.
- Minor Surgery: The preoperative period is the day of the procedure with a postoperative period of either 0 or 10 days depending on the procedure.

## | HCPCS Level II

- Types of Level II Codes
  - Permanent National Codes maintained by the CMS HCPCS Workgroup
    - Responsible for additions, deletions, revisions
    - Updated annually
  - Temporary National Codes maintained by the CMS HCPCS Workgroup
    - Responsible for additions, deletions, revisions
    - Updated quarterly

# | Most Common

## A Code

- Codes include:
  - Ambulance codes
  - Ambulance modifiers to indicate origin and destination of transport
  - Medical and surgical supplies

# | Most Common

## G Code

- Codes include:
  - Temporary codes
  - Some CMS service/procedure codes
  - CMS Quality Reporting codes

## | HCPCS Level II

- G codes
  - Professional healthcare procedures/services with no CPT<sup>®</sup> codes
  - Example:
    - G0412 – G0415 – unilateral or bilateral
    - 27215 – 27218 – unilateral only, use modifier 50 for bilateral
- H codes
  - Used by state Medicaid agencies for mental health services such as alcohol and drug treatment services

# | Most Common

## J Code

- J codes include drugs administered to patients.
- Most codes list a specific dose per code.
- Reporting concepts include:
  - Amount of medication administered – Quantity billing is common
  - Route of administration (intra-arterial, intravenous, intramuscular, intrathecal, subcutaneous, inhaled, oral, etc...)
- Select the correct code for the correct route of administration.

# | Most Common

## J Code

- Appendix A: Table of Drugs and Biologicals

# | Most Common

## L Code

- Primarily orthotic and prosthetic supplies, devices and services
- Coding concepts:
  - Product
  - Anatomic site
  - Number
  - Size

# | Most Common

## Q Code

- Codes includes are temporary codes
- Can be added, changed and deleted quarterly
- Coding concepts:
  - Anatomic site
  - Number
  - Size
  - Type of procedure
  - Patient age

# | Most Common

## S Code

- These codes are temporary national, non-Medicare, codes
- Coding concepts include:
  - Anatomic site
  - Number
  - Size
  - Age
  - Type of procedure

# | HCPCS Level II

## Appendices:

- Table of Drugs
  - Names of Drugs, dosage, delivery method, J code
- Level II modifiers
  - May be used with some CPT® codes, i.e., LT/RT
- List of Abbreviations
- Medicare References
- Jurisdiction List
- Deleted Code Crosswalk

(each publisher may have different appendices)

# | Modifiers

- 22 – Increased Procedural Service
  - Service provided is greater than that usually required for the listed procedure
- 24 - Unrelated E/M by the same physician during a postoperative period

## | Global Package Modifiers

- 25 - Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service
- 57 - Decision for surgery

## | Global Package Modifiers

- 58 - Staged or related procedure or service by the same physician during the postoperative period
- 78 - Unplanned return to the operating/ procedure room by the same physician following initial procedure for a related procedure during the postoperative period
- 79 - Unrelated procedure or service by the same physician during the postoperative period

# | Surgical Modifiers

- 50 - Bilateral Procedure
- 51 - Multiple Procedures
- 52 - Reduced Services
- 53 - Discontinued Procedure

## **Modifier 59 – Distinct Procedural Service**

- Procedures not normally reported together
- Different Session or Patient Encounter
- Different Procedure or Surgery
- Different Site or Organ System
- Separate Incision/Excision
- Separate Lesion

## | Modifier 59 – Distinct Procedural Service

- CMS provides a subset of modifier 59:
  - XE - Separate Encounter, a service that is distinct because it occurred during a separate encounter;
  - XS - Separate Structure, a service that is distinct because it was performed on a separate organ/structure;
  - XP - Separate Practitioner, a service that is distinct because it was performed by a different practitioner; and
  - XU - Unusual Non-Overlapping Service, the use of a service that is distinct because it does not overlap usual components of the main service.

# | Multiple Surgeon Modifiers

- 62 – Two Surgeons
  - Work together as primary surgeons
  - Perform distinct parts of a procedure
  - Dictate op report of their distinct part
  - Each will submit the same code and append modifier 62
- 66 – Surgical Team
  - Highly complex procedures
  - Require differently specialties
  - Modifier 66 appended to procedures coded by the surgical team

# | Assistant Surgeon Modifiers

- 80 – Assistant Surgeon
  - Assistant surgeon present for entire or substantial portion of the operation
  - Reports the same surgical procedure with modifier 80 appended
- 81 – Minimum Assistant Surgeon
  - Circumstances present that require the services of an asst surgeon for a short time. Minimal assistance.
  - Reports the same surgical procedure with modifier 81 appended
- 82 – Assistant Surgeon (when qualified resident surgeon not available)
  - Used in a teaching hospital that employs residents
  - No residents available and another surgeon is used

# | Ancillary Modifiers

- Global – a procedure containing both a technical and a professional component
- Modifier 26 – Professional Component
- Modifier TC – Technical Component

# 10000 Series Integumentary System

CPC Review

# | Anatomy of the Skin

- Epidermis
  - Top layer
    - Made up of 4-5 layers; function is protection
- Dermis
  - Mid layer
    - Blood vessels, connective tissue, nerves, etc.
- Subcutaneous Tissue
  - Connective tissue and adipose tissue

# | ICD-10-CM: Integumentary

- Chapter 2: Neoplasms
- Chapter 12: Diseases of the Skin and Subcutaneous Tissue
- Chapter 19: Injury and Poisoning

# | ICD-10-CM: Integumentary

## Chapter 12: Diseases of the Skin and Subcutaneous Tissue

- Skin infections (bacterial and fungal)
- Inflammatory conditions of the skin
- Other disorders of the skin
  - Corns and calluses
  - Keloid scars
  - Keratosis

# | Inflammatory Conditions of the Skin

- Erythema multiforme:
  - Code for erythema multiforme
  - Code associated manifestation
  - Code percent of skin exfoliation (L49.0-L49.9)
  - An additional E code if drug induced

# | Pressure Ulcers

- Decubitus ulcers/bed sores
- Coding
  - Identify the location of the ulcer
  - Identify the stage of the ulcer
  - Ulcers present on admission but healed at the time of discharge, assign the code for the site and stage of the pressure ulcer at the time of admission
  - Ulcers evolving to a higher stage, two separate codes should be assigned: one code for the site and stage of the ulcer on admission and a second code for the same ulcer site and the highest stage reported during the stay

# | Injury and Poisoning

- Wounds
  - Superficial injuries (abrasions, burns, blisters, insect bites, splinters)
  - Contusions (bruises, hematomas)
  - Open wounds (lacerations, punctures, open bites)
- Burns (fire, heat source, hot appliance)
- Corrosions (chemicals)

# | Burns

- Location
- Severity (degree) of burn
- Total Body Surface Area (TBSA)

# | Disorders of the Breast

- Category N60-N65 - Disorders of the breast
- Category N60 - Mammary dysplasia
- Category N65– Deformity and disproportion of reconstructed breast
  - N65.0 Deformity of reconstructed breast
  - N65.1 Disproportion of reconstructed breast

## | Fine Needle Aspiration (FNA)

- 10021 Fine needle aspiration biopsy, without imaging guidance; first lesion  
+ 10004 each additional lesion
- 10005 Fine needle aspiration biopsy, including ultrasound guidance; first lesion  
+ 10006 each additional lesion
- 10007 Fine needle aspiration biopsy, including fluoroscopic guidance; first lesion  
+ 10008 each additional lesion

## | Fine Needle Aspiration (FNA)

10009 Fine needle aspiration biopsy, including CT guidance; first lesion

+ 10010 each additional lesion

10011 Fine needle aspiration biopsy, including MR guidance; first lesion

+ 10012 each additional lesion

# | Skin, Subcutaneous, and Accessory Structures

- Incision and Drainage
  - Simple
  - Complicated\*

\* Complicated = placement of a drain, presence of infection, hemorrhaging that requires ligation, extensive time

# | Debridement

- Debridement
  - Method for removing dead tissue, dirt, or debris from infected skin, burn or wound
  - Based on percent of body surface area
- Debridement of necrotizing soft tissue
  - Based on area of body being debrided
- Active Wound Care
  - 97597-97606

# | Biopsy

- Biopsies are reported by technique.
- Obtaining of tissue during another procedure is not considered a separate biopsy.
- Simple closure repair included.
- When more than one biopsy is performed by different techniques during the same encounter, only one primary biopsy code is reported and the add-on codes for the additional techniques are used.

# | Biopsy

- **Tangential** (shave, scoop, saucerize, curette) is performed with a sharp blade, such as a flexible biopsy blade, obliquely oriented scalpel or curette to remove a sample of epidermal tissue
- **Punch** requires a punch tool to remove a full-thickness cylindrical sample of skin.
- **Incisional** requires the use of a sharp blade to remove a full-thickness sample of tissue via vertical incision or wedge
  - *Remember simple closure is included in the biopsy codes.*

# | Skin, Subcutaneous, and Accessory Structures

- Removal of Skin Tags
  - 11200 up to and including 15 lesions
  - 11201 add-on code for each additional 10 lesions
- Shaving of Epidermal Lesions 11300-11313
  - Include local anesthesia & chemical/electrocauterization of wound
  - Select codes on size and anatomic location

# | Skin, Subcutaneous, and Accessory Structures

## Excision of Lesions – Benign or Malignant

- Pay attention to the guidelines for these codes
  - Simple closure is included. Do not report separately.
  - Report separately each lesion excised.
  - Codes are selected based:
    - Anatomic location
    - Size (lesion plus margins)
  - Malignant lesions: append modifier 58 if the patient has follow-up, re-excision during the postoperative period

# | Skin, Subcutaneous, and Accessory Structures

## Coding Tip

- Underline the different anatomical options
- Add notes to the page where you see the codes, such as “code PER lesion”

# | Nails

- Fingernails and/or toenails
- Trimming or Debridement

# | Integumentary System

- Pilonidal Cyst
  - Coded according to complexity of excision
    - Simple
    - Extensive
    - Complicated

# | Wound Repair

- Codes for wound closure using sutures, staples or tissue adhesive
- If only adhesive strips used, the service is coded using E/M only.
- Two important guidelines:
  1. Measure and report size in centimeters (cm)
  2. When MULTIPLE wounds are repaired, **add together** the lengths of those in the same classification (repair type) and same anatomic grouping. DO NOT add together lengths from different classifications.

# | Wound Repair

- Definitions for types of wound repair are found in guidelines
  - **Simple repair** – wound is superficial and requires single layer closure
  - **Intermediate repair** – wound is deeper and requires layered closure of one or more deeper layers of subcutaneous tissue or superficial fascia. It includes *limited* undermining. It also includes a heavily contaminated wound that requires extensive cleaning or removal of particulate matter
  - **Complex repair** – wound requires more than a layered closure, scar revision, debridement, extensive undermining, stents or retention sutures.

# | Wound Repair

- Book preparation tip

# | Adjacent Tissue Transfer

- Pay attention to the guidelines for these codes
  - These codes do not apply to direct closure or rearrangement of traumatic wounds.
  - The excision of benign or malignant lesions is not separately reportable with Adjacent Tissue Transfer when done for the same lesion.
  - Skin grafts necessary to close a secondary defect is separately reportable.

# | Repair

- Skin Replacement Surgery & Skin Substitutes
  - 15002-15005 based on size of repair and site
  - 15040-15261 reported for autografts and tissue cultured autografts
  - 15271-15278 reported for skin substitute grafts
  - 15050 is pinch graft measured in centimeters
  - All other skin graft codes are determined by the size of the defect in square centimeters
  - Square centimeters calculation  
length in cm x width in cm

# | Skin Replacement Surgery & Skin Substitutes

- The section starts with codes for the surgical preparation of the recipient site and are based on the anatomical area and size of the wound preparation.
- Harvest and placement of the skin graft is reported based
  - Type of graft (ex. Split thickness, full thickness, epidermal, etc.)
  - Location (where the graft is going, not from where the graft is taken).
  - Size. Note, measurement is square centimeters for adults and children ten years and older. Patients less than ten years of age is measured by percentage.

# | Destruction

- Ablation by any method other than excision
  - Electrosurgery
  - Cryosurgery
  - Laser treatment
  - Chemical treatment
- Benign/premalignant based on number of lesions
- Malignant lesion according to location and size in centimeters

# | Destruction

- Guidelines:
  - Type of lesion (benign, malignant, premalignant)
  - Location of the lesion
  - Size or lesion diameter
- Destruction methods: ablation, electrocautery, cryosurgery, laser, chemical, surgical curettage
- Report separately each lesion destroyed.

# | Mohs Micrographic Surgery

- Mohs Micrographic Surgery
  - Removal of complex or ill-defined skin cancer
  - Physician acts as surgeon and pathologist
  - Removes tumor tissues and performs histopathologic exam
  - Repair of site may be reported separately
- Stage = each deeper layer of tissue removed
- Block = smaller pieces of each stage that will be examined for cancer

# | Mohs Micrographic Surgery

- To report Mohs surgery:
  - Know the anatomic location
  - Number of stages (how many layers of tissue removed)
  - Number of blocks per stage (how many specimens were created from the layer)

# | Breast Biopsy

- Performed as percutaneous or open.
- Codes are divided by type of imaging guidance (stereotactic, ultrasound, or magnetic resonance).
- Code per lesion biopsied

# | Mastectomy

- 19304** Mastectomy, subcutaneous
- 19305** Mastectomy, radical, including pectoral muscles, axillary lymph nodes
- 19306** Mastectomy, radical, including pectoral muscles, axillary and internal mammary lymph nodes (Urban type operation)
- 19307** Mastectomy, modified radical, including axillary lymph nodes, with or without pectoralis minor muscle, but excluding pectoralis major muscle

# 20,000 Series Musculoskeletal System

---

CPC Review

# | Anatomy

- Skeleton
  - Axial
  - Appendicular
- Muscles – assist with heat production and posture
- Ligaments – attach bones to other bones
- Tendons – attach muscles to bones
- Cartilage – acts as a cushion between bones in a joint

# | ICD-10-CM Coding

## Laterality

- 1— Right
- 2— Left
- 3— Bilateral
- 9— Unspecified

- When the laterality is not documented, unspecified is used
- If a bilateral option is not available, 2 codes will be reported
- When a bilateral condition exists, and there is a bilateral code, the bilateral code is reported even if only one side is being treated for that encounter.

# Diseases of the Musculoskeletal System and Connective Tissue

## Chapter 13

- Arthropathy – pathology or abnormality of a joint
- Dorsopathies – disorders affecting the spinal column
- Rheumatism – non-specific term for any painful disorder of the joints, muscles, or connective tissue
- Enthesopathies – disorders of ligaments
- Bursitis – inflammation of the bursa
- Pathological fractures

# | Injury and Poisoning

- Sprains and Strains
- Fractures
  - Comminuted
  - Impacted
  - Simple
  - Greenstick
  - Pathologic
  - Compression
  - Torus or Incomplete

# | Guidelines for Fracture Treatment

## Fracture Guidelines

- Fracture treatment includes application and removal of first cast or traction device only. Subsequent replacement of cast and/or traction device may require an additional listing.
- Treatments:
  - **Closed:** fracture site is not surgically exposed/opened
  - **Open:** either fracture site is surgically opened to visualize the repair or site is opened remove from fracture site to insert an intramedullary nail
  - **Percutaneous:** Neither open or closed. Fixation (pins) are placed across the fracture site, usually under fluoroscopy
  - **Manipulation:** Attempted reduction or restoration of a fracture to normal alignment by applied force.

# | Fracture Coding

## Coding Note

- Pay close attention to Fracture/Dislocation sections
  1. Treatment type
  2. Bone treated

# | CPT® : Musculoskeletal System

- Formatted by anatomic site:
  - General
  - Head, Neck (soft tissues) and Thorax
  - Back and Flank
  - Spine (vertebral column)
  - Abdomen
  - Shoulder, Humerus and Elbow
  - Forearm and Wrist
  - Hand and Fingers
  - Pelvis and Hip Joint
  - Femur and Ankle Joint
  - Foot and Toes
  - Application of Casts and Strapping
  - Endoscopy/ Arthroscopy

# | Musculoskeletal System

- “General” subheading
  - Many different anatomic sites
- Other subheadings
  - Divided by anatomic site, procedure type, condition and description
    - Incision, excision, introduction or Removal, Repair, Revision and/or Reconstruction, Fracture and/or dislocation, Arthrodesis, Amputation

# | Wound Exploration

- Used for wounds resulting from a penetrating trauma.
- Describe surgical exploration and enlargement of wound, extension of dissection, debridement, removal of foreign body, ligation of minor blood vessels.
- No thoracotomy or laparotomy is done. If those approaches are necessary, report those codes, not these.
- Wound repair is separately reportable.

# | General

- Excision & Biopsy
  - Muscle or Bone
  - Depth of wound or tissue excised
  
- Introduction or Removal
  - Injections
  - Foreign body removal

# | Trigger Point Injections

- Aponeurosis is an abnormal sheet like extension of the tendon. Injection of a tendon or ligament is the medical therapeutic procedure to reduce the aponeurosis formation
- Trigger points are painful knots of muscle that are tight and do not relax.
- Codes are available for injections with or without medication.
- Codes are selected based on the **number of muscles** treated, not the number of needles or injections placed.

# | Spine

- Anatomy
  - Cervical C1-C7
    - C1 Atlas
    - C2 Axis
  - Thoracic T1-T12
  - Lumbar L1-L5
- Spinal Instrumentation
  - Segmental
  - Non-segmental

# | Osteotomy

- Osteotomy procedures are reported when portion(s) of the vertebral segment(s) are removed in preparation for spinal deformity correction.
- Key concepts include anatomic site and complexity.
- Columns:
  - Anterior – anterior 2/3 of the vertebral body
  - Middle – posterior 1/2 of vertebral body and pedicle
  - Posterior – articular facets, lamina and spinous process

# | Bone Grafting and Vertebral Column

## Guidelines

- Bone grafting procedures are separately reportable.
- Instrumentation is separately reportable.
- When arthrodesis (fusion) is also performed, it is reported in addition to the primary procedure with modifier -51.
- When 2 surgeons work together as primary surgeons performing distinct parts of a single procedure, each surgeon reports his distinct work by appending modifier -62 to the procedure code.

# | Vertebroplasty

- Vertebroplasty is the injection of material into the vertebral body (rounded portion) to reinforce the structure. This is done under imaging guidance.
- Vertebral augmentation is the process of cavity creation (lifting) after compression fracture of the spine. Bone cement is injected into the vertebral body and fractures to prevent recurrent collapse.
- Location of the vertebral body guides code selection

# | Vertebroplasty

Key to coding:

- Number of levels
- Location (cervical, thoracic, lumbar)
- Imaging guidance not reported separately
- Modifier 50 not reported

# | Application of Casts and Strapping

- Cast application is billable if:
  - It is a replacement cast during follow-up or after care for a fracture
  - It is an initial service performed without restorative treatment or procedure to stabilize or protect a fracture, injury or dislocation or to provide comfort to a patient.

# | Endoscopy/Arthroscopy

- Divided by body area – shoulder, elbow, wrist, hip, knee, ankle
- Surgical endoscopy/arthroscopy includes a diagnostic endoscopy/arthroscopy
- Multiple surgical procedures performed through scope may be reported
- “Separate procedure” – included in more extensive procedure

# | Endoscopy/Arthroscopy

- Many codes can be reported as arthroscopic or as open services.
  - Look for key words in the operative report such as scope or port to identify an arthroscopic procedure.
  - Watch parenthetical statements under the codes for services that are included with other arthroscopic services

## | HCPCS Level II

- Orthotic and Prosthetic
- Basic Orthopedic Supplies
  - Crutches
  - Canes
  - Walkers
  - Traction Devices
  - Wheelchairs
  - Other orthopedic supplies

## **30000 Series**

# **Respiratory, Hemic, Lymphatic, Mediastinum, Diaphragm and Cardiovascular Systems**

CPC Review

# | Respiratory System

- Nose
- Larynx
- Pharynx
- Trachea
- Bronchi
- Bronchioles
- Lungs
- Alveoli
  - Located at the ends of the bronchioles
  - Function is gas exchange ( $\text{CO}_2$  and  $\text{O}_2$ )
- Pleura

# | Mediastinum and Diaphragm

- Mediastinum-thoracic cavity between the lungs that contains the heart, aorta, esophagus, trachea, thymus gland
- Diaphragm-muscle that divides the thoracic cavity from the abdominal cavity

# | Hemic and Lymphatic Systems

- Network of channels
- Structures dedicated to circulation and production of lymphocytes
- Three interrelated functions
  - Removal for interstitial fluid from tissues
  - Absorbs and transports fatty acids to circulatory system
  - Transport antigen presenting cells to lymph nodes

# | Hemic and Lymphatic Systems

- Spleen
  - Located left side of stomach
  - Reservoir for blood cells
  - Produces lymphocytes involved in fighting infection

## | ICD-10-CM: Respiratory

- Acute Upper Respiratory Infections (J00-J06)
- Influenza and Pneumonia (J09-J18)
- Other acute lower respiratory Infections (J20-J22)
- Other diseases of Upper Respiratory tract (J30-J39)
- Chronic Lower Respiratory diseases (J40-J47)
  - Bronchitis (J40-J42)
  - Emphysema (J43)
  - COPD (J44)
  - Asthma (J45)

# | ICD-10-CM

- U00-U85
  - U07 Emergency use of U07
    - U07.0 Vaping-related disorder
    - U07.1 COVID-19

Codes for Special Services

# | ICD-10-CM

- Mediastinum and Diaphragm
  - Diaphragm Herniation
  - Diaphragmatic Paralysis
  - Thymic hyperplasia
- Hemic and Lymphatic Systems
  - Lymphoma
  - Lymphadenitis
  - Hypersplenism
  - Splenic Rupture
  - Leukemia

## | Rules/Guidelines

- Respiratory procedures
  - Progress downward from the head to the thorax
- Parenthetical statements
  - Directions on how to use specific codes
  - Apply to codes above parenthetical note; not below
- Most codes are unilateral
- Use modifier 50 if bilateral procedure performed
  - Unless code descriptor states bilateral

# | Nose

- Rhinotomy
- Excision
  - Biopsy code
  - Removal of lesions, cysts, and/or polyps
  - Turbinates
- Rhinectomy

# | Nose

- Introduction
  - Therapeutic turbinate injection
  - Prosthesis for deviated nasal septum
    - Plug placed by physician
- Removal of foreign body
  - Office setting
  - Facility setting
    - General anesthesia

# | Nose

- Repair
  - Rhinoplasty
  - Septoplasty, Atresia. Fistulas, Dermatoplasty
- Destruction
  - Turbinate mucosa

## | Epistaxis

- Coding concepts include:
  - Anatomical site
  - Complexity
- Codes are unilateral and require use of RT or LT
- Bilateral nosebleed would require modifier -50.

# | Accessory Sinuses

- Four pairs of sinuses
- Procedures
  - Obliterative
  - Non-obliterate
- Endoscopies
  - Diagnostic/Surgical
  - All surgical endoscopies ***always*** include a diagnostic endoscopy

# | The Larynx

- Laryngotomy
- Laryngectomy
- Pharyngolaryngectomy
- Arytenoidectomy
- Incision
  - Emergency endotracheal intubation
  - Change of tracheotomy tube

# | The Larynx

- Endoscopy
  - Use of operating microscope or telescope
    - Parenthetical statement instructs not to code the operating microscope
  - Direct visualization
    - View anatomical structures via bronchoscope inserted into laryngoscope
  - Indirect visualization
    - Structures viewed in a laryngoscopic mirrored reflection

# | Trachea and Bronchi

- Endoscopy
  - Many bronchoscopy codes
    - Use common portion of main or parent code (up to the semicolon) as the first part of each indented code descriptor under the parent code
  - Bronchoscopy codes
    - Bronchial lung biopsies
    - Foreign body removals
    - Stent or catheter placements
    - Flexible or rigid scopes
    - Many parenthetical statements

# | Trachea and Bronchi

- Excision and Repair
  - Carinal reconstruction
    - Needed after removal of cancer at this site
  - Tracheal tumor excision
    - Thoracic and intrathoracic
  - Stenosis and anastomosis excision
  - Injury suturing
  - Tracheostomy scar revision

# | Lungs and Pleura

- Incision codes
  - Thoracostomy
  - Thoracotomy
  - Pneumonostomy
  - Pleural scarification
  - Decortication

# | Lungs and Pleura

- Excision
  - Biopsies
    - Read parenthetical statement directions
  - Pleurectomy
- Removal
  - Thoracentesis
  - Total pneumonectomy
  - Lobectomy
  - Resections

# | Lungs and Pleura

- Introduction and Removal
  - Thoracostomy (chest tube)
- Endoscopy
  - Diagnostic vs. surgical
  - VATS

# | Lungs and Pleura

- Lung Transplantation
  - Three steps
    - Harvesting
    - Backbench
    - Insertion
  - Live donors
    - Rare
    - Only one lobe donated
  - Cadaver donors
    - Most commonly used

## Coding tip:

- Note unilateral vs bilateral
- Note services with or without cardiopulmonary bypass assistance

# | Lungs and Pleura

- Surgical collapse therapy/thoracoplasty
  - Resection
  - Thoracoplasty
- Other procedures
  - Lung lavage
  - Tumor ablation
  - Unlisted - 32999

# | Pulmonary

- Ventilator Management
- Other Procedures
  - Spirometry
  - Pulmonary capacity studies
  - Respiratory flow studies
  - Pulmonary stress testing
  - Inhalation treatment
  - Oxygen uptake
  - Pulse oximetry

# | Mediastinum & Diaphragm

- Mediastinum
  - Mediastinotomy – based on approach
  - Excision (cyst, tumor)
  - Endoscopy
- Diaphragm
  - Hernia repair
  - Resections

# | Hemic and Lymphatic Systems

- Spleen
  - Splenectomy
    - Code selection based on type
  - Splenorrhaphy
    - Reported when a ruptured spleen is repaired
- General
  - Bone marrow or stem cell services

# | Hemic and Lymphatic Systems

- Lymph Nodes & Lymphatic Channels
  - Drainage of lymph node abscess
  - Biopsy or Excision
    - Code selection based on method and location
  - Lymphadenectomy
    - Limited – removes only lymph nodes
    - Radical – removal of lymph nodes, glands, and surrounding tissue
  - Injection Procedures
  - Lymphangiography

# | Heart

- 4 Chambers
  - Two atria
  - Two ventricles
- Three layers
  - Endocardium
  - Myocardium
  - Epicardium
- Valves
  - Atrioventricular valves
    - Tricuspid
    - Bicuspid (Mitral)
  - Semilunar valves
    - Pulmonary
    - Aortic

# | Oxygenation Process

RA > tricuspid valve > RV

RV > pulmonary valve > pulmonary artery

LUNGS (gas exchange) > pulmonary vein >

LA > mitral valve > LV

LV > aortic valve > BODY via arteries

BODY > via veins > RA

# | Electrical Conduction in the Heart

- Conduction begins in sinoatrial node of right atrium
  - Nature's pacemaker
  - Firing causes contraction of muscle
- Moves to atrioventricular node
  - Then to Bundle of His along septum
  - Then to Purkinje fibers along the surface of ventricles

# | Coronary Arteries & Blood Vessels

- Arteries
  - Carry oxygenated blood
  - Take blood away from heart to the body
- Veins
  - Carry deoxygenated blood
  - Bring blood back to the heart from the capillary beds
- Capillaries
  - Connect arteries and veins

# | Circulations

- Pulmonary Circulation
  - Pushes deoxygenated blood into the lungs
  - Carbon dioxide removed and oxygen added
  - Blood flows to the left atrium
- Systemic Circulation
  - Blood flows from left atrium into the left ventricle
  - Pumped to the body to deliver oxygen and remove carbon dioxide

# | ICD-10-CM Coding

Chapter 01: Infectious and parasitic diseases

Chapter 02: Neoplasms

Chapter 09: Diseases of the Circulatory System

Chapter 17: Congenital Anomalies

Chapter 18: Signs, Symptoms and Ill-Defined Conditions

# | ICD-10-CM: Hypertension

- Hypertensive Disease

- I10 Essential (primary) Hypertension

Includes high blood pressure, arterial, benign, essential, malignant, primary, systemic

- I11 Hypertension with heart disease (presumed relationship exists between hypertension and heart disease)
- I12 Hypertensive chronic kidney disease (presumed relationship exists between hypertension and chronic kidney disease)
- I13 Hypertensive heart and chronic kidney disease
- I15 Secondary Hypertension
- I16 Hypertensive Crisis

## | ICD-10-CM: Arteriosclerosis

- CAD of native coronary artery (I25.10)
  - The patient is not a heart transplant
  - The patient has CAD with no history of CABG
  - The patient had a prior PTCA of native coronary artery and the patient is admitted with re-occlusion of this lesion

# | ICD-10-CM Coding

- Endocarditis
- Heart Failure
- Pericarditis
- Peripheral Arterial Disease (PAD)
- Valve Disorders
- Myocardial Infarction (MI)
  - Acute MI
  - Chronic MI and Old MI

# | ICD-10-CM Coding

- Myocardial Infarction (MI)
  - Acute MI
  - Chronic MI and Old MI

# | CPT<sup>®</sup> Coding

- Surgical Section
- Radiology Section
  - Heart
  - Vascular
  - Diagnostic Ultrasound (various CPT<sup>®</sup>s)
  - Radiologic Guidance
  - Nuclear Medicine
- Medicine Section
  - Cardiovascular
  - Noninvasive Vascular Diagnostic Studies

# | Pacemakers/Defibrillators

- Pacemaker System
- Pacing cardioverter-defibrillator system
- To code these procedures, you need to know:
  - Type of system
  - Whether the placement is temporary or permanent
  - Whether the device is single, dual, multiple leads, or leadless
  - Placement of electrodes (transvenous, endoscopic for epicardial placement, epicardial, coronary sinus)
  - The procedure performed (removal, replacement, insertion)
  - Components removed, replaced, or inserted (pulse generator, leads)  
(All at once or individually)

# | Pacemakers/Defibrillators

- Type of pacemaker
  - Permanent
  - Temporary
- Type of procedure
  - Initial
  - Removal
  - Conversion
- Amount of leads
- Placement
  - Transvenously
  - Epicardially
- Approach
  - Open
  - Endoscopic

# Subcutaneous Cardiac Rhythm Monitor and Implantable Hemodynamic Monitors

- Implantable loop recorder (ILR) –an event recorder that is activated by irregular cardiac activity.
- Wireless pressure sensor for hemodynamic monitoring – sensor is placed in the pulmonary artery via a right heart catheterization.

# | Cardiac Valve Procedures

- Aortic Valve
- Mitral Valve
- Tricuspid Valve
- Pulmonary Valve

# Coronary Artery Bypass Grafting (CABG)

Material Used	Code(s) billed
Vein <b>only</b>	33510 - 33516
Artery	33533 - 33536
Artery <b>and</b> Vein	33533 – 33536 33517 - 33523

Add a note in your books with codes  
33510 – 33516:

**DO NOT BILL WITH 33533 - 33536**

# | Coronary Artery Bypass Grafting (CABG)

Beware of the add-on codes:

- +33508 – Endoscopic harvest of the saphenous vein
- +33572 – Coronary endarterectomy, open, in conjunction with CABG
- +33530 – Reoperation, CABG or valve procedure, more than 1 month after the original operation
- +35500 – Harvesting of an upper extremity vein
- +35572 – Harvesting of a femoropopliteal vein
- +35600 – Harvesting of an upper extremity artery

# | Bypass Grafts

- Non-coronary vessels
  - Vein
  - In-situ vein
    - Vein is left in native location
  - Other than vein
- Code by type/location

# Central Venous Access Devices (CVAD)

- Placed for frequent access to bloodstream
- Tip of catheter must terminate in the:
  - Subclavian
  - Brachiocephalic
  - Iliac
  - Inferior or superior vena cava
- Code by
  - Procedure (insertion, repair, replacement, removal, etc.)
  - Tunneled or not
  - With pump or port
  - Patient age
- See CVAP table in CPT®

# | Interventional Procedures

- Vascular Injection Procedures
  - Selective catheterizations should be coded to the highest level accessed within a vascular family
  - The highest level accessed includes all of the lesser order selective catheterizations used in the approach
  - Additional second and/or third order arterial catheterization within a vascular family of arteries or veins supplied by a single first order should be coded

# | CPT®: Cardiovascular

- Hemodialysis (36800-36815)
- Portal Decompression (37140-37183)
  - Treat hypertension/occlusion of portal vein
  - TIPS (37182, 37183) diverts blood from the portal vein to the hepatic vein
- Transcatheter Procedures
  - Removal of clot
    - Arterial (37184-37186)
    - Venous (37187-37188)
    - Other (37191-37216)
    - Foreign body retrieval, stent placement, etc.

# | Endovascular Revascularization

- Treat occlusive disease in lower extremities
- Three territories
  - Iliac (common iliac, internal iliac and external iliac)
  - Femoral/Popliteal (**considered a SINGLE territory**)
  - Tibial/Peroneal (anterior tibial, posterior tibial, peroneal arteries)
- Codes arranged in a hierarchy for each territory
  - stent placement with atherectomy (highest)
  - stent placement
  - atherectomy
  - angioplasty (lowest)

## **| Bundled into Endovascular Revascularization**

- Vascular access
- Catheter placement
- Traversing the lesion
- Imaging related to the intervention (previously billed as the supervision and interpretation code for the specific intervention)
- Use of an embolic protection device (EPD)
- Imaging for closure device placement
- Closure of the access site

# | Radiology Vascular Procedures

- Diagnostic angiography
  - Sometimes separately reportable
  - Diagnostic angiography performed at a separate setting from an interventional procedure is separately reportable
  - Diagnostic angiography performed at the time of an interventional procedure is NOT separately reportable if it is specifically included in the interventional code descriptor

# | CPT<sup>®</sup>: Cardiovascular Medicine Section

- Therapeutic services and procedures
- Cardiography
- Cardiovascular monitoring services
- Implantable wearable cardiac device evaluations
- Echocardiography
- Cardiac Catheterizations
- Intracardiac Electrophysiological Procedures/Studies
- Peripheral Arterial Disease Rehabilitation
- Noninvasive physiologic studies and procedures
- Other procedures

# | Percutaneous Coronary Interventions

- Major coronary arteries:
  - Left circumflex (LC) and its marginal branches
  - Left anterior descending (LD) and its diagonal branches
  - Right coronary (RC) and the posteriolateral and posterior descending branches
- All interventions MUST identify the artery, or its branch being touched using modifiers LC, LD, RC

# | Percutaneous Coronary Interventions

- Each branch (LD, LC, RC) is reported as its OWN intervention
- The add-on code MUST match or share the SAME modifier as the primary.
- Example:
  - Stents were placed in the left anterior descending and the left circumflex ..... 92928-LD, 92928-LC
  - Stents were placed in the left anterior descending and its first diagonal ..... 92928-LD, 92929-LD

# | ECG and Stress Testing

- Codes for ECG and Stress Testing include professional and technical concepts already
- TC and 26 modifiers are NOT needed to properly report the providers' service

Technical Component	Professional Component
Machine ownership Technician cost Overhead Supplies used	Supervision of test Interpretation and reporting of results

# | ECG and Stress Testing

	ECG routine with at least 12 leads	CV Stress Test	Rhythm ECG, 1-3 leads
Global (Tech and Professional)	93000	93015	93040
Supervision Only		93016	
Technical Only	93005	93017	93041
Professional Only	93010	93018	93042

# | Cardiac Catheterization

- Most common access point – femoral artery
- There are two code families for cardiac catheterization:
  - Congenital heart disease
  - All other conditions
- Catheter insertion, injection(s), and imaging are combined in one code for all other conditions but separately billable for congenital conditions.

# Cardiac Catheterization

- For congenital conditions, bill injections separately

	Inside only	Including coronary arteries	Congenital conditions
Right heart	93451	94356	93530
Right heart and CABG		94357	
Left heart	93452	93458	
Left heart and CABG		93459	
Combined	93453	93460	93531
Combined with CABG		93461	
Combined with transseptal puncture			93532
Combined with existing hole			93533

# 40000 Series

# Digestive System

---

CPC Review

# | Digestive System

- Lips/Mouth
  - Teeth
  - Gums
  - Tongue
- Pharynx
  - Conduit for respiration and digestion
- Esophagus
  - Conduct food from the pharynx to the stomach
  - Peristaltic action moves the food

# | Digestive System

- Stomach
  - Cardia
  - Fundus
  - Pylorus (antrum)
  - Body
- Small Intestine (small bowel)
  - Duodenum
  - Jejunum
  - Ileum
- Large Intestine (large bowel)
  - Cecum (appendix attached)
  - Colon
    - Ascending colon
    - Transverse colon
    - Descending colon
    - Sigmoid colon
    - Rectum
    - Anus

# | Digestive System

- Pancreas
  - Endocrine and exocrine organ
  - Secretes insulin into the bloodstream
- Liver (Hepatic)
  - Largest organ and largest gland
- Gallbladder/Biliary System

# | ICD-10-CM: Digestive

Chapter 1: Infectious and Parasitic Diseases

Chapter 2: Neoplasms

Chapter 11: Disease of the Digestive System

Chapter 17: Congenital Anomalies

Chapter 18: Signs, Symptoms, and Ill-Defined Conditions

# | Diseases of the Digestive System

- Esophageal and Swallowing Disorders
  - Barrett's Esophagus
  - Esophagitis
  - Esophageal varices
  - Mallory-Weiss Tear
  - Hiatal Hernia
  - Swallowing Disorders/Dysphagia
- Gastritis and Peptic Ulcer Disease
- Gastrointestinal Bleeding
- Gastroenteritis

# | Diseases of the Digestive System

- Inflammatory Bowel Disease (IBD)
- Irritable Bowel Syndrome (IBS)
- Foreign Bodies
- Diverticular Disease
  - Diverticulosis
  - Diverticulitis

# | Diseases of the Digestive System

- Anorectal Disorders
  - Rectal prolapse
  - Abscess
  - Hemorrhoids
  - Anal fissure
  - Anal fistula
- Pancreatitis
- Benign and Malignant Neoplasms of the Gastrointestinal Tract
- Congenital Disorders

# | Digestive System

- Organized by anatomic site and procedure
- Endoscopy
  - Visualization of a hollow viscus or canal by means of an endoscope or scope
  - Laparoscope is an endoscope

## | Guidelines

- Diagnostic services are listed as **separate procedure**
- When done in conjunction with a surgical service (diagnostic becomes surgical), only the surgical service is billable.

# | Digestive System

- Lips
  - Vermilionectomy
  - Cheiloplasty
- Mouth
  - Vestibuloplasty
  - Glossectomy
  - Palatoplasty

# | Digestive System

- Pharynx, Adenoids and Tonsils
  - Tonsillectomy
  - Adenoidectomy
  - Biopsy
  - Pharyngoplasty
  - Pharyngostomy
  
- Esophagus

# | Esophagoscopy

- Esophagoscopy is direct visualization of the esophagus only
- Can be performed multiple ways. Pay attention to the parent codes:
  - Rigid transoral
  - Flexible transnasal
  - Flexible transoral
- Pay attention to the service performed (biopsy, foreign body removal, injection, etc.)

# | Esophagogastroduodenoscopy (EGD)

- EGD includes visualization of the esophagus, stomach and proximal duodenum or jejunum
- Also known as an Upper GI exam
- Many parenthetical statements
- If duodenum/jejunum is not examined:
  - Report with modifier 52 if repeat exam is not planned
  - Report with modifier 53 if repeat exam is planned

# | Endoscopic Retrograde Cholangiopancreatography

- Visualization of the biliary or pancreatic duct systems
- Considered complete if one or more of the ductal system(s) is visualized
- Many guidelines to review

# | Digestive System

- Stomach
  - Gastrectomy
  - Bariatric and Gastric Bypass
  - Endoscopic procedures

# | Gastric Bypass

- Treatments for morbid obesity include bariatric surgery and gastric bypass.
- Procedures include:
  - Roux-en-Y
  - Banding
  - Laparoscopic gastric restriction
  - Open gastric restrictive procedures
  - Gastric bypass

# | Digestive System

- Intestines (except rectum)
  - Incision
    - Enterolysis
    - Exploratory procedures
  - Endoscopic
    - Small intestines
    - Beyond the second portion of the duodenum and stomal endoscopy
    - Colonoscopies
  - Enterostomy

# | Digestive System

- Rectum
  - Incision – drainage of abscesses
  - Excision
    - Proctectomy – partial or complete
  - Endoscopy
    - Proctosigmoidoscopy
    - Sigmoidoscopy
    - Colonoscopy
- Anus
  - Hemorrhoids

# | Endoscopy

- Proctosigmoidoscopy – exam of the rectum
- Sigmoidoscopy – exam of the rectum and sigmoid colon
- Colonoscopy – exam of the entire colon from the rectum to the cecum
- Colonoscopy through stoma – exam of the colon from a colonoscopy stoma to the cecum

# | Digestive System

- Liver
- Biliary Tract
- Pancreas

# | Digestive System

- Abdomen, Peritoneum, and Omentum
  - Exploratory laparotomy
  - Drainage of abscess – open or percutaneous
  - Laparoscopy
  - Hernia codes
    - Type of hernia
    - Strangulated or incarcerated
    - Initial or subsequent repair

# | HCPCS: Digestive System

- Colorectal cancer screening
  - G0104-G0106
  - G0120-G0122

**50000 Series**

**Urinary System, Male Genital System and  
Female Genital System**

CPC Review

# | Anatomy: Urinary System

- Two kidneys (filters)
- Renal pelvis/one per kidney (funnels urine into ureters)
- Two ureters (to bladder)
- One bladder (storage)
- One urethra (exit)

Nephro = kidney

Renal = related to kidney

Pyelo = renal pelvis

# | Anatomy: Male Reproductive System

- Testicles (sperm production, contained in scrotum)
- Duct system (transport sperm)
  - Epididymis
  - Vas deferens
- Accessory glands (contribute to ejaculate)
  - Seminal vesicles
  - Prostate gland
- Penis
  - shaft
  - glans
  - prepuce

## | ICD-10-CM: Urinary

Look primarily to N00-N99

- Listed anatomically
  - Kidney
  - Ureters
  - Bladder
  - Urethra

## | ICD-10-CM: Urinary

- Inflammation N00-N08
  - Nephritis
  - Glomerulonephritis
- Renal failure (acute) (N17)
- Chronic Kidney Disease (CKD) (N18)
  - ESRD
  - With hypertension (I12)

## ICD-10-CM: Urinary

- Renovascular disease (N25)
  - Report underlying condition first
    - Central diabetes insipidus (E23.2)
    - Nephrogenic diabetes insipidus (N25.1)
- Small Kidney (N27.-)
- Pyelonephritis (N12)
- Hydronephrosis (N13)
- Calculi (N20)

## | ICD-10-CM: Urinary

- VUR (N13)
  - Backflow or urine into ureter
- Cystitis (N30)
  - Bladder inflammation
- Voiding disorders (N31, N32)
  - Urinary incontinence (N39, R32)
- UTI (N39.0)
  - Report organism, when known

# | ICD-10-CM: Male Genital System

Look primarily to N40-N53

- Listed anatomically
  - Prostate
  - Testes
  - Penis

Also...

- Congenital Anomalies
- Neoplasms
- Signs/Symptoms

# | ICD-10-CM: Male Genital System

- BPH
- Hyperplasia
- Prostatitis
- PSA
- Dysplasia
  - PIN III
  - PIN I or II

# | ICD-10-CM: Male Genital System

- Spermatic cord, Testis, Tunica Vaginalis, Epididymis
  - Hydrocele
  - Orchitis
- Penis
  - Phimosis
  - Balanitis
  - Routine circumcision
  - Male infertility
  - Peyronie's disease

# | ICD-10-CM: Male Genital System

- Congenital Anomalies
  - Cryptorchidism
  - Hypospadias
  - Epispadias
- Neoplasms (by location)
- Injury
- Signs and Symptoms

## | CPT®: Urinary

- Arranged by location/procedure type
  - Incision, excision, repair, etc.
- Bilateral vs. Unilateral
- Operating Microscope (69990) may be separate
- Surgical endoscopy always includes diagnostic endoscope

# | CPT<sup>®</sup>: Kidney

- Incision (“otomy”)
  - Nephrotomy = incision of kidney
  - Pyelotomy = incision of renal pelvis
  - Nephrolithotomy
  - Percutaneous removal of calculi
    - Nephrostomy tract
- Excision (“ectomy”)
  - e.g., nephrectomy
  - Radical
  - Ablation

# | CPT<sup>®</sup>: Kidney

- Repair
  - Ureteral repair
  - Creation of ureteral conduit
- Introduction (aspiration, injection, instillation)
  - Ureteral stents
  - Catheter changes
  - Bladder irrigation and/or instillation

# | Kidney Abscess

- Treatment for renal abscess or renal stone extraction may require a nephrostomy tube to be placed.
- Often performed under CT guidance.
  - Report radiological guidance separately.
- Percutaneous removal of stones is coded by the **size** of the stone
  - Usually under fluoroscopic guidance and via existing nephrostomy tube/tract.
  - If no existing tube/tract, a nephrostomy tract must be created and reported

# | CPT®: Urinary

- Laparoscopy
  - Code by procedure
- Endoscopy
  - Performed through natural or created opening
- Other Procedures of Kidney
  - Renal Transplantation
  - Lithotripsy
  - Percutaneous ablation of renal tumors
  - Cryotherapy for renal tumors
- Urodynamics

# | CPT®: Male Genital System

## Penis

- Incision
- Destruction
- Excision
  - Excision of plaque
  - Penectomy
  - Circumcision
- Introduction
- Repair
  - Hypospadias/epispadias
  - Prosthesis
- Manipulation

# | Penile Implants

- Type
  - Inflatable
  - Non-inflatable
  - Multi-components
- Initial
- Repair
- Removal
- Removal and replacement

# | Transurethral Resection of Prostate (TURP)

- Prostate resection can be done transurethrally or open. Watch the approach.
  - 52601** Transurethral electro-surgical resection of prostate, including control of postoperative bleeding, complete (vasectomy, meatotomy, cystourethroscopy, urethral calibration and/or dilation, and internal urethrotomy are included)
- **Watch the parenthetical statements for guidance on repeat or staged procedures**

# | Orchiopexy

- Orchiopexy is the surgical fixation of undescended testis in the scrotum.
- 3 approaches:
  - OPEN - Inguinal
  - OPEN - Abdominal
  - LAPAROSCOPIC

# | Anatomy

## External genitalia

- Mons pubis
- Labia (majora and minora)
- Hymen
- Bartholin's glands
- Clitoris
- Urethra

## Internal Genitalia

- Vagina
- Uterus
- Cervix
- Fallopian tubes ("tubes" or oviducts)
- Ovaries

# | ICD-10-CM: Female Genital System

Chapter 14: Disease of the Genitourinary System

Chapter 15: Complications of Pregnancy, Childbirth, and the Puerperium

Chapter 2: Neoplasms

Chapter 21: Z Codes

# | ICD-10-CM: Female Genital System

- Female Genitourinary System
- Complications of Pregnancy, Childbirth, and the Puerperium
  - Have sequencing priority
  - Report any condition that affects pregnancy (labor, delivery, post-partum)
  - If pregnancy is incidental to condition treated, report Z33.1 as secondary code
    - Must document that condition treated does not affect pregnancy
  - Only for mother, not newborn

# | ICD-10-CM: Female Genital System

- Routine outpatient prenatal visits w/o complication
  - First pregnancy
  - Subsequent pregnancy
  - First-listed diagnosis
  - Not to be used with other Chapter 15 Codes

## High-risk Pregnancy

- Code from category O09
- First-listed diagnosis
- May be reported with other Chapter 15 codes

# | CPT®: Female Genital System

## Surgery

- Arranged by anatomy “outside to inside”
  - Terms used to describe *external* female genitalia
    - Perineum
    - Vulva
    - Pudenda
    - Introitus
- Consider terminology to determine procedure
  - -ectomy = removal
  - etc.

# | CPT®: Female Genital System

- Vulva
- Vagina
  - 57022 - Only CPT® code related to obstetrical complications NOT in labor/delivery section
- Cervix Uteri
  - Os = opening of cervix

# | Vaginectomy

- Surgical removal of all or part of the vagina.
  - Depth of tissue removed:
    - *Simple* – removal of skin and superficial subcutaneous tissue
    - *Radical* – removal of skin and deep subcutaneous tissue
  - Area of tissue removed:
    - *Partial* – Removal of less than 80% of the vulvar area
    - *Complete* – Removal of more than 80% of the vulvar area

## | D & C

- D&C is a surgical procedure in which the cervix is dilated, and the uterine lining is scraped.
- The service can be either diagnostic or therapeutic:
  - 58120          Dilation and curettage, diagnostic and/or therapeutic (nonobstetrical)

# | Hysterectomy

- There are multiple codes to report hysterectomy.
  - Approach – abdominal (open), vaginal, laparoscopic
  - With or without tubes (salpingectomy)
  - With or without ovaries (oophorectomy)
  - With or without total or partial vaginectomy
  - Based on size of the uterus – less than or greater than 250 g

# | Maternity Care/Delivery

## Antepartum care

- Initial visit during pregnancy
- Ongoing visits during pregnancy
  - Average of 13 visits (global OB package)
- OB package includes...
  - Antenatal care
  - Delivery
  - Episiotomy and repair
  - Postpartum care

# | Maternity Care/Delivery

Postpartum care includes...

- Hospital visits
- 6-week checkup in the office
- Services related to cesarean delivery
  - e.g., two-week incision check

Unrelated encounters are reported separately

# | Maternity Care/Delivery

- “Partial” maternity/delivery care
  - Patient moves
  - Change of coverage, etc.
- Ultrasound
  - NOT included in OB global package
    - Some payers *may* include one U.S. in global package (standard of care)
  - More than one U.S. may be performed

# Delivery Services

Type of Delivery	Full Package	Delivery only	Delivery and Postpartum Visit
Vaginal	59400	59409	59410
C-Section	59510	59514	59515
VBAC	59610	59612	59614
Failed VBAC	59618	59620	59622

Antepartum Care	
1 – 3 visits	E/M only
4 – 6 visits	59425
7+ visits	59426

# | Twin Deliveries

Type of Delivery	1 <sup>st</sup> Twin	2 <sup>nd</sup> Twin
Both delivered vaginally	59400	59409-51
Both delivered by C-section	59510	
One delivered vaginally and one delivered by C-section	59510	59409-51

# | Abortion

- Spontaneous
  - Miscarriage
    - Complete
    - Missed
      - D&C may be required
- Induced
  - Therapeutic (medical termination of pregnancy)
    - Failed induced abortion
      - Hysterotomy

**60000 Series**

**Nervous, Eye and Ocular Adnexa, and Auditory  
Systems**

CPC Review

# | Anatomy: Endocrine

- Comprised of ductless glands that secrete hormones into the circulatory system
  - Thyroid
  - Parathyroid
  - Thymus
  - Adrenal glands
    - Medulla
    - Cortex

# | Anatomy: Endocrine

- Pancreas
  - Endocrine and digestive functions
- Carotid body
  - Contains glandular tissue
- Pituitary gland
  - Anterior and posterior lobes
- Pineal gland
- Structures classified elsewhere
  - eg, kidneys, testes, ovaries

# | Anatomy: Nervous System

- Comprised of two components
  - CNS
    - Brain
    - Spinal Cord
  - PNS
    - Nerves running throughout the body

# | Anatomy: Nervous System

## Nerve Plexi

- Cervical
  - Head, neck, shoulders
- Brachial
  - Chest, shoulders, arms, hands
- Lumbar
  - Back, abdomen, groin, thighs, knees, calves
- Sacral
  - Pelvis, buttocks, genitals, thighs, calves, feet
- Solar (Coccygeal)
  - Internal organs

# | Anatomy: Nervous System

- Spinal cord functions:
  - Motor information to muscles
  - Sensory information to brain
  - Reflex coordination
- Segment (bone) vs. interspace (space between)
- Segments (Body, Lamina, Process [Spinous, Transverse], Foramen)
- Facet joints
  - One per side, where segments meet

# | Anatomy: Nervous System

## The Brain

- Frontal lobe
  - Cerebrum
- Two temporal lobes
- Parietal lobes
  - Primary sensory cortex
- Occipital lobe
- Cerebellum
- Brainstem
- Ventricles

# | ICD-10-CM: Endocrine

## Categories E00-E89, by location

- Thyroid
- Parathyroid
- etc.

## Neoplasms (Chapter 2)

- Report neoplasm first
- Additional diagnosis as a result of neoplasm are secondary

## | ICD-10-CM: Endocrine

- Addison's disease (E27.1)
- Primary hyperparathyroidism (E21.0)
- Diabetes
  - Secondary diabetes (E08)
    - Always has an underlying cause
  - Drug/Chemical induced (E09)
  - Type 1 (E10)
  - Type 2 (E11)
    - Systems affected
    - Complications/manifestations

# | ICD-10-CM: Nervous System

- Inflammation
  - Meningitis (lining of brain/spinal cord)
  - Encephalitis (brain)
  - Myelitis (spinal cord)
  - Encephalomyelitis (brain and spinal cord)
- Sleep disorders
- Hereditary/degenerative disease of CNS
  - Report underlying disease when instructed

# | ICD-10-CM: Nervous System

- Pain (NEC) (G89)
  - Pain control is reason for visit
  - Do not report as primary if you know the underlying cause, and visit is to manage that diagnosis
  - Acute vs. Chronic
- Disorders of CNS
  - Migraine (G43)
    - Status migrainosus
    - Aura
    - Intractable

# | ICD-10-CM: Nervous System

- Disorders of PNS
  - Trigeminal nerve disorder
  - Neuritis
    - CTS
- Neoplasms
  - Search in Vol. 2
  - Use neoplasm table, by location and type

# | Thyroid Gland Excision

- Concepts include:
  - Partial or total removal
  - Contralateral (opposite side)
  - Malignancy
  - Approach

## | CPT<sup>®</sup>: Endocrine

- Parathyroid, Thymus, Adrenals, Pancreas
- Endocrinology – Medicine section

# | CPT®: Nervous System

- Skull, Meninges, and Brain
  - Twist drill
  - Burr holes
  - Trepine
  - Craniectomy/craniotomy
- Skull base surgery
  - Approach
  - Definitive procedure
  - Repair/reconstruction
- Endovascular therapy
  - Balloons or stents to treat arterial disease

# | CPT<sup>®</sup>: Nervous System

- AV malformation
  - Simple vs. complex
- Intracranial aneurysm
  - Simple vs. complex
- Other techniques
- Anastomosis to bypass aneurysm
- Stereotaxis/Radiosurgery
  - Lesion treatment

# | CPT<sup>®</sup>: Nervous System

- Cranial neurostimulators
  - Pulse generator
  - Electrodes
    - eg, for Parkinson's, epilepsy
- Repair of skull
  - Skull fracture
  - Encephalocele
- Neuroendoscopy
- CSF Shunt
  - Drain accumulation of CSF
  - May require revision

# | CPT<sup>®</sup>: Nervous System

- Spine and Spinal Cord
  - Injection, Drainage, Aspiration
    - Pay careful attention to notes and parenthetical instructions
    - Spinal tap (diagnostic /therapeutic)
    - Neurolytic injections
  - “Pain pumps”
  - Intrathecal catheter
  - Laminectomy vs. Laminotomy
    - Complete vs. partial excision of lamina
    - Code by spinal region
    - Include decompression

# | Laminotomy (Hemilaminectomy) vs Laminectomy

- Laminotomy is also known as a Hemilaminectomy. Removal of  $\frac{1}{2}$  of the lamina from one side of a vertebra.
- Laminectomy is a complete removal of the lamina on both sides of the vertebra which also results in the removal of the spinous process.
- Purpose is decompression of the spinal cord and/or spinal root.

# | Laminotomy (Hemilaminectomy) vs Laminectomy

- Coding concepts include:
  - Anatomical site (cervical, thoracic, lumbar)
  - Segments vs Interspaces
  - Number
  - Approach (percutaneous, endoscopic, open)

# | CPT<sup>®</sup>: Nervous System

- Decompression
  - Must consider approach
  - Discectomy
  - Osteophytectomy (removal of bony outgrowth)
  - Corpectomy (vertebral body resection)
- Intra/extradural excision of intraspinal lesion
- Stereotaxis/radiosurgery
- Spinal Neurostimulators
  - Electrodes
  - Pulse generator

# | CPT<sup>®</sup>: Nervous System

- Extracranial nerves, PNS, Autonomic
  - 12 pair cranial nerves
  - 31 pair spinal nerves
  - Autonomic ganglia/plexi
- PNS
  - Somatic nerves
  - Autonomic nerves
    - Sympathetic and parasympathetic

# | CPT®: Nervous System

- Facet Joint injections
  - Nerve block
    - Unilateral
    - Focus on “joint” between vertebrae
  - Nerve “destruction”
  - Somatic or sympathetic nerve
  - Number of levels
  - If infused, duration

## | CPT<sup>®</sup>: Nervous System

- Injection of sympathetic nerves
- Peripheral Neurostimulators
  - surface or percutaneous
- Destruction by neurolytic agent
- Neuroplasty
  - Freeing of nerves from scar tissue
- Transection/avulsion (divide/tear away)

# | Neuroplasty

- Neuroplasty is the surgical repair nerve tissue
- Anatomical site is the key concept.
- For nerve grafts, location and size of the graft are key coding concepts.

# | CPT<sup>®</sup>: Nervous System

- Excision
  - By nerve
- Neurorrhaphy
  - Suturing of nerve
  - Without or with graft
  - By nerve
- Operating microscope
  - Beware bundling issues

# | CPT<sup>®</sup>: Nervous System Medicine Section

## Neurology/Neuromuscular

- Sleep studies
- EEG
- Muscle/ROM testing
- EMG
- Chemo guidance
- EP/Reflex testing
- Neurostimulator analysis/programming

# | Anatomy: Eye and Ocular Adnexa

- Eyeball
  - Sclera
  - Cornea
  - Pupil and Iris
  - Choroid – vascular layer
  - Retina – pigmented nerve layer
- Optic nerve and Optic disc

# | Anatomy: Ear and Auditory System

- Middle ear
  - Tympanic membrane
  - Ossicles – malleus, incus, stapes
  - Eustachian tube
- Inner ear
  - Labyrinth
  - Membranous labyrinth – hair cells
  - Vibrations into nerve impulse
  - Cochlea, vestibule, semicircular canal
  - Balance – utricle, saccule
  - Oval window, round window

## | ICD-10-CM: Sense Organs

- Chapter 7: Diseases of the Eye and Adnexa
- Chapter 8: Diseases of the Ear and Mastoid Process
- Chapter 2: Neoplasms

# | Eye and Ocular Adnexa

- Infection and Inflammation
- Neoplastic disease
- Injury
- Glaucoma
- Cataracts
- Retinopathy
- Retinal detachment
- Strabismus

# | Ear and Mastoid Process

- Diseases of the Ear and Mastoid Process
- Infectious and inflammation
- Neoplastic disease
- Injury
- Vertigo
- Hearing loss
- Congenital disorders

# | CPT®: Eye and Ocular Adnexa

- Three procedures for removal of eye:
  - Evisceration – removal of contents excluding the sclera
  - Enucleation – removal of entire eyeball
  - Exenteration – removal of everything down to the bone
- Concepts include:
  - With or without implant
  - With or without muscle reattachment
  - With or without bone or muscle removal
- Secondary Implant Procedures

# | CPT<sup>®</sup>: Eye and Ocular Adnexa

- Intraocular Lens Procedures (IOL)
  - Cataract removal with IOL
  - Intracapsular
  - Extracapsular
  - IOL exchange

# | CPT<sup>®</sup>: Eye and Ocular Adnexa

- Ocular Adnexa
  - Strabismus
    - horizontal
    - vertical
    - transposition

# | CPT<sup>®</sup>: Eye and Ocular Adnexa

- Operating Microscope
  - Most procedures on the eye are performed with a microscope and are included in the procedure code.
  - Do not report 69990 with 65091-68850

# | CPT®: Eye and Ocular Adnexa Medicine Section

- Special Ophthalmological Services
  - New patient vs established patient
  - Contact lens fittings
  - Ophthalmoscopy
  - Fitting of glasses

# | CPT®: Auditory System

## Auditory System

- Removal foreign body from external auditory canal
  - both ears

# | CPT<sup>®</sup>: Auditory System

## Middle Ear

- Tympanostomy
- Mastoidectomy; complete
  - modified radical
  - radical

# | CPT<sup>®</sup>: Auditory System

## Tympanoplasty

- Tympanoplasty is the surgical reconstruction or repair of the tympanic membrane (ear drum)
- Surgery can be done under either local or general anesthesia.
- Can be done:
  - without mastoidectomy, with antrotomy/mastoidotomy (cutting into the mastoid bone) or with mastoidectomy (removal of the mastoid bone)
  - with or without ossicular chain (hammer, anvil, stirrup) reconstruction

# | CPT<sup>®</sup>: Auditory System

## Inner Ear

- Labyrinthectomy
- Temporal Bone, Middle Fossa Approach
- Microsurgery

## **CPT<sup>®</sup>: Auditory System Medicine Section**

- Special Otorhinolaryngologic Services
- Otolaryngologic examination under general anesthesia
- Vestibular Function Tests
- Audiologic Function Tests with Medical Diagnostic Evaluation

# Radiology

---

CPC Review

# | Radiologic Projections

- Oblique – slanting, neither frontal or lateral
- Lateral – side view, X-ray beam travels through the side of the body
- Anteroposterior – X-ray beam enters the body through the front and exits through the back
- Posteroanterior – X-ray beam enters the body through the back and exits through the front
- Cone – focused or spot view

# | Additional Terms

- Proximal – closer to the point of attachment to the body
- Distal – away from the point of attachment to the body
- Flexion – bending
- Extension – straightening

# | Diagnosis Coding

- Code the definitive diagnosis
- Code signs and symptoms if no definitive diagnosis is available
- Diagnostic tests
  - Code sign or symptom that prompted the test
  - Do not code questionable, rule out, or probably diagnoses
- Routine radiology
  - Z01.89 Radiological examination, NEC

# | CPT® Subsections

- Diagnostic Radiology (Diagnostic Imaging)
- Diagnostic Ultrasound
- Radiologic Guidance
- Breast, Mammography
- Bone/Joint Studies
- Radiation Oncology
- Nuclear Medicine

# | Guidelines

- Supervision and Interpretation (S & I)
  - Interventional radiologic procedures
  - Report two codes:
    - Surgical code; or code from the medicine section
    - Radiologic supervision and interpretation
- Administration of Contrast Material
  - Contrast material administered intravascularly, intra-articularly, or intrathecally
  - Oral and/or rectal contrast does not qualify

# | Modifiers

- Technical Component (TC)
  - Equipment
  - Overhead
    - Supplies
    - Room
    - Gowns
- Professional Component (26)
  - Reading and interpretation

# | Diagnostic Radiology (Diagnostic Imaging)

- Anatomical organization
- Radiologic procedures include:
  - Standard X-rays
  - MRIs
  - CTs

# Diagnostic Radiology (Diagnostic Imaging)

- Code Selection:
  - Anatomical location
  - Type of procedure
  - Number of views
  - Type of view (AP, PA, etc.)
  - Laterality (unilateral, bilateral)
  - Contrast material
- Coding Tip
  - Underline or highlight the anatomy
  - Highlight the number of views
  - Highlight or circle with/without contrast

# | Heart – Subsection Guidelines

- Heart
  - Stress
    - Cause the heart to work harder
  - Cardiac MRI
    - Physiologic evaluation of the cardiac function
    - Velocity flow mapping
  - Cardiac CT
    - Coronary calcium
    - Congenital heart disease

# Vascular Procedures – Subsection Guidelines

- Aorta and arteries
  - Aortography – imaging of aorta and branches
  - Angiography – imaging of arteries
  
- Veins and lymphatics
  - Lymphangiography – visualization of lymphatics
  - Splenoportography – injection of contrast into the spleen to visualize the port vessel of the portal circulation
  - Venography – imaging of veins

# Vascular Procedures

- Transcatheter procedures
  - Supervision and interpretation codes
  - Code with codes from:
    - Cardiovascular section
    - Medicine section

# | Diagnostic Ultrasound

- High frequency sound waves to look at organs and other structures inside the body
- Used to view:
  - Heart
  - Blood vessels
  - Kidneys
  - Other organs
  - Fetus (during pregnancy)

# | Diagnostic Ultrasound

- Required:
  - Permanently recorded images with measurements
  - Final written report for the patient's medical record
  - Exception – biometric measure

# | Diagnostic Ultrasound

- Anatomic regions
  - Complete – each element listed in parenthesis within the code description
  - Limited – reported if less than complete is performed
  - Not reported together
- Definitions
  - A-mode
  - M-mode
  - B-scan
  - Real-time scan

# | Pelvis Ultrasound

- Obstetrical
  - Pregnant uterus
    - Review definitions in guidelines
  - Fetal
    - Look for what specifically is being looked at (eg, umbilical artery in 76820)
- Nonobstetrical

# Ultrasonic Guidance

Includes guidance for:

- Pericardiocentesis
- Endomyocardial biopsy
- Vascular access
- Parenchymal tissue ablation
- Intrauterine fetal transfusion or cordocentesis
- Needle placement
- Chorionic villus sampling
- Amniocentesis
- Aspiration of ova
- Placement of radiation therapy fields

# | Radiologic Guidance

- Fluoroscopic
- Computed Tomography (CT)
- Magnetic Resonance (MRI)
- Other

# | Breast, Mammography

- Mammary ductogram or galactogram
- Digital Breast Tomosynthesis
- Mammography
  - Screening
  - Diagnostic

# | Bone/Joint Studies

- Bone age studies
- Bone length studies
- Osseous survey
- Joint survey
- Bone mineral density studies
- Bone marrow blood supply

# Radiation Oncology

- Consultation: Clinical Management
- Clinical Treatment Planning
- Medical Radiation Physics, Dosimetry, Treatment Devices, and Special Services
- Stereotactic Radiation Treatment Delivery
- Other Procedures
- Radiation Treatment Delivery
- Neutron Beam Treatment Delivery
- Radiation Treatment Management
- Proton Beam Treatment Delivery
- Hyperthermia
- Clinical Intracavitary Hyperthermia
- Clinical Brachytherapy

# | Radiation Oncology Treatment

- Radiation treatment is reported in units of 5 fractions or treatment sessions.
- “Code 77427 is ... reported if there are three or four fractions beyond a multiple of five at the end of a course of treatment; one or two fractions beyond a multiple of five at the end of a course of treatment are not reported separately.”

# Radiation Oncology Treatment

- Reduced services modifier is NOT necessary
- Code for the number of fractions or treatments the patient had during the months

Number of visits	Code(s) to report
1 or 2 only	77431
3-7 visits	77427
8-12 visits	77427 x 2
13-17 visits	77427 x 3
18-22 visits	77427 x 4
23-27 visits	77427 x 5
28-32 visits	77427 x 6

# | Nuclear Medicine

- Diagnostic - Use of small amounts of radioactive material to examine organ function
  - Thyroid function (Endocrine System)
  - Renal (Gastrointestinal System)
  - Bone (Musculoskeletal System)
  - Heart (Cardiovascular System)
  - Brain (Nervous System)
- Therapeutic – uses radioactive material to treat cancer and other medical conditions affecting the thyroid gland

# | Nuclear Medicine

- Provide metabolic and functional information of the body unlike CT and MRI
  - **PET** scans create computerized images of chemical changes within the organ or tissue
  - **SPECT** scans use radioactive tracers and a scanner to record data that a computer constructs into 2D or 3D images. SPECT can give detailed images of blood flow to tissues in the body.
  - **Planar** studies are flat images of a 2D object (think xray)
  - **Tomographic** studies create 3D images of 2D objects

# Pathology and Laboratory 80000 Series

CPC Review

# | Regulatory Terms

## Clinical Laboratory Improvement Amendment (CLIA)

- CMS issues a waiver
- Approximately 80 tests
- Little risk of error
- For more info., see [http://www.cms.hhs.gov/CLIA/10\\_Categorization\\_of\\_Tests.asp](http://www.cms.hhs.gov/CLIA/10_Categorization_of_Tests.asp)

## Advance Beneficiary Notice (ABN)

- Non-covered laboratory tests
- Patient is responsible for payment
- For more info., Web search “CMS-R-131”

# | Modifiers

- 90 Reference or Outside Laboratory
  - Billed by physician but performed by an outside laboratory
- 91 Repeat clinical diagnostic lab test
  - Same test same day
  - Not used if due to error
  - Not used if there is a better code for a series of tests
- 92 Alternative laboratory platform testing
  - Portable test kit
  - Single use disposable chamber
- 99 Multiple modifiers

## | Organ or Disease-Oriented Panels

- Group of test commonly ordered together
- All test in the panel must be performed
- Additional tests can be coded also
- Some panels are included in other panels and should not be coded separately
- Be on the look out for "or" "and"

# | Definitions

- Qualitative
  - What is present
- Quantitative
  - How much is present

# | Presumptive Drug Class Screening

- Presumptive Drug Test
  - used to identify the use or non-use of a drug

# | Definitive Drug Testing

- Definitive Drug
  - Qualitative – positive/negative, present/absent
  - Quantitative – amount or quantity present

# | Therapeutic Drug Assays

- Quantitative tests for drugs given for therapeutic purposes
- Can become toxic or too low for therapeutic benefit
- Measures specific drugs at specific intervals to determine if there is an appropriate and constant level of drug in the patient's system

# | Evocative Suppression Testing

- Baseline and subsequent measurement
- Supplies and drug billed separately
- Physician attendance
  - Use Prolonged care codes
- Prolonged infusion codes from Medicine section

# | Clinical Pathology Consultations

- Requested by attending physician
- Rendered by pathologist
- Written report provided
- Patient not present
  - Lab test
  - Specimen
  - Slide
- Limited – no patient history or medical records
- Comprehensive – complex problem with history and records

# | Urinalysis

- Urinalysis evaluates a sample of urine for the presence of disease, drugs, metabolites, etc.
- Done by a variety of methods.
- Care should be taken when selecting codes:
  - Automated vs non-automated
  - With or without microscopy
  - Intention (pregnancy test, volume measurement, etc. ...)
- Usually covered under CLIA waived labs

# | Chemistry

- Material may be from any source (blood, sweat, urine, saliva, feces) unless otherwise specified
- Exams are qualitative unless specified
- When one analyte is measured from different sources or from specimens taken at different times, each can be separately reported.

# | Laboratory Tests

- Hematology and Coagulation
- Immunology
- Microbiology
- Anatomic Pathology
  - Gross examination only
  - Gross and microscopic exam
  - Limited
  - Forensic
- These are further divided:
  - With brain
  - With brain and spinal cord
  - Infant

# | Cytopathology

- Study of cells for disease
- Obtained by several methods
  - Washing or brushing
  - Smears
  - Fine needle aspiration
- Cytogenetic studies are the study of cells for inherited disorders

# | Most Common

## Cytology

- Cytology is the examination of cells from the body under a microscope.
- Bethesda vs non-Bethesda
  - Bethesda reporting allows for uniform reporting of results
  - Samples of Bethesda reporting:
    - ASC
    - ASC-US
    - ASC-H
    - LSIL
    - HSIL

# | Surgical Pathology

- Specimen – tissue sample
  - Has to be separately identifiable
- Divided into levels of progressive complexity
  - Level I – gross
  - Level II-VI gross and microscopic
- Additional codes for special stains

# | Most Common

## Surgical Pathology

- Levels of surgical pathology give specific examples of tissue inspected and reason
  - 88305 Level IV – Uterus, w or wo tubes and ovaries, for prolapse
  - 88307 Level V – Uterus, w or wo tubes and ovaries, other than neoplastic/prolapse
  - 88309 Level VI – Uterus, w or wo tubes and ovaries, neoplastic

# | Pathology Consultation

Four types of consultations:

1. Report on prepared slides
2. Report on tissue requiring prep of slides
3. Review records and specimen
4. Consultation during surgery
  - Frozen sections
  - Cytology examination

# Anesthesia

---

CPC Review

# | Organization of Codes

Organized by anatomical location

- Head
- Neck
- Thorax
- Intrathoracic
- Spine and Spinal Cord
- Upper Abdomen
- Lower Abdomen
- Perineum
- Pelvis
- Upper Leg
- Knee and Popliteal Area
- Lower Leg
- Shoulder and Axilla
- Upper Arm and Elbow
- Forearm, Wrist, and Hand
- Radiological Procedures
- Burn Excisions or Debridement
- Obstetric
- Other Procedures

# | Finding the CPT® Code

- Start in the Index
- Look up Anesthesia
  - Anatomical location
  - Type of surgery
  - Surgical approach

# | Types of Anesthesia

- Local
  - Included in CPT® code
  - No separate anesthesia code
- MAC - Monitored Anesthesia Care
  - Decreased awareness
- Regional
  - Blocks
  - Spinals
  - Epidurals
- General
  - Unconscious

# | Anesthesia Terminology

- One-lung Ventilation (OLV)
- Pump Oxygenator
- Intraperitoneal – within the peritoneum
- Extraperitoneal/Retroperitoneal - space in the abdominal cavity behind the peritoneum

# | Intraperitoneal vs Extraperitoneal Organs

**Intraperitoneal** – within the peritoneum

- **Upper abdomen** - stomach, liver, gallbladder, spleen, jejunum, ascending and transverse colon
- **Lower abdomen** - appendix, cecum, ileum and sigmoid colon

**Extraperitoneal/Retroperitoneal** - space in the abdominal cavity behind or outside the peritoneal cavity

- **Upper abdomen** - kidneys and adrenal glands and lower esophagus
- **Lower abdomen** - ureter and urinary tract
- **Other** - aorta and inferior vena cava

# | Anesthesia Guidelines

- Services included with the anesthesia code:
  - Preoperative visits
  - Postoperative visits
  - Anesthesia during the procedure
  - Administration of fluids/blood
  - Usual monitoring
    - Unusual forms include CVP, Arterial line insertion, and Swanz-Ganz and are coded separately

# | Anesthesia Time

- Time **begins** when the anesthesiologist begins to prepare the patient for anesthesia (either in the operating room or in an equivalent area) and **ends** when the patient is safely under postop supervision.

TIP:

Place a chart in your book to help calculate time in 15 minute increments

Minutes	Unit(s)
15	1
30	2
45	3
60	4

# | Physical Status Modifiers

- Assigned by the anesthesia provider
- Coder needs to look for a diagnosis to report it
- Documented in anesthesia record

P1 - normal healthy

P2 - mild systemic disease

P3 - severe systemic disease – **1 unit**

P4 - constant threat to patient's life – **2 units**

P5 - not expected to survive w/o surgery – **3 units**

P6 - declared brain-dead patient

# I Qualifying Circumstances

- + 99100 - under 1 or over 70 years of age – **Additional 1 unit**
- + 99116 - anesthesia complicated by hypothermia – **Additional 5 units**
- + 99135 - anesthesia complicated by controlled hypotension – **Additional 5 units**
- + 99140 - anesthesia complicated by emergency – **Additional 2 units**

**Coding Tip** – Watch parenthetical statements below the anesthesia CPT codes to determine when these codes are NOT billable.

## Modifiers – HCPCS Level II

### Anesthesiologist Modifiers

AA	Performed by anesthesiologist
AD	Medical supervised by physician; more than 4 concurrent anesthesia procedures
QK	Medical direction of 2-4 concurrent procedures ( <i>cases happening at the same time</i> )
QY	Medical direction of one CRNA by an anesthesiologist

### CRNA Modifiers

QX	CRNA service: with medical direction by physician
QZ	CRNA without medical direction

### Monitored Anesthesia Care

QS	MAC (monitored anesthesia care)
G8	Monitored anesthesia care (MAC) for deep complex, complicated, or markedly invasive surgical procedures
G9	Monitored anesthesia care for patient who has history of severe cardiopulmonary condition

# | Coding Concepts

## Multiple Surgeries

# | CPT® Modifiers

## 53 – Discontinued Procedures

- Used if surgeon discontinues the procedure

## 59 - Distinct procedural services

- Example: General anesthesia during surgery, then an epidural is placed for post op pain management.

# | Coding Concepts

## Additional Anesthesia Modifiers

# Evaluation and Management

---

CPC Review

## | ICD-10-CM Coding

- Primary diagnosis – reason for the visit
- Signs and Symptoms
  - Code only if no definitive diagnosis is stated
  - Routinely associated with a disease process should not be coded separately

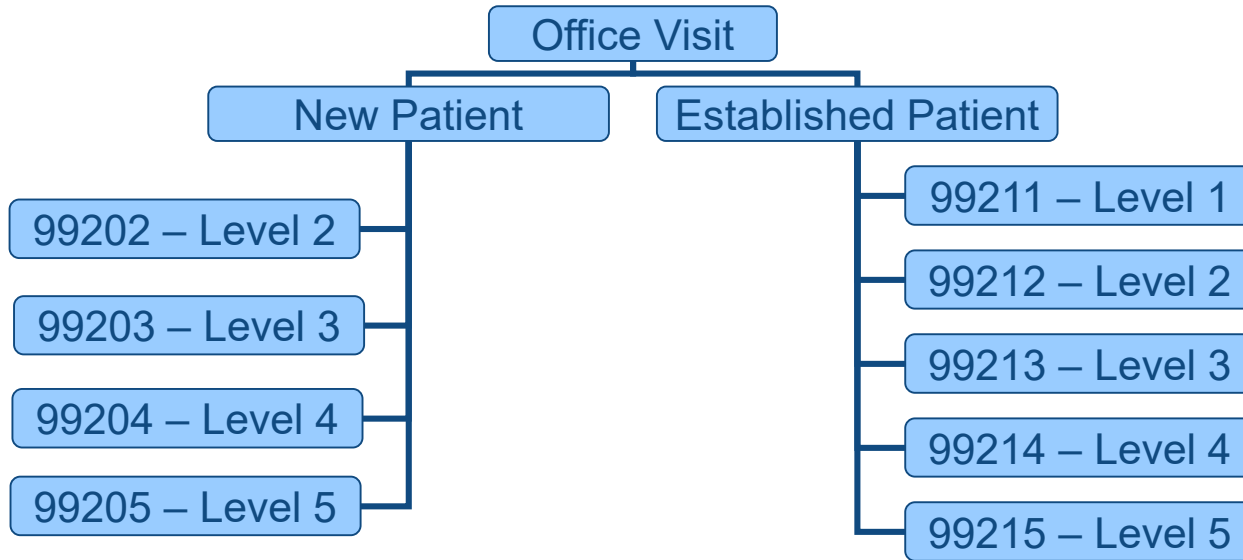

# I CPT® Coding

1. Select the category or subcategory of service and review the guidelines;
2. Review the level of E/M service descriptors and examples;
3. Determine the level of history;
4. Determine the level of exam;
5. Determine the level of medical decision making; and
6. Select the appropriate level of E/M service.

# Categories and Subcategories

# | New vs. Established Patients

## **New Patient**

Patient who has not received any professional services from the physician/qualified health care professional or another physician qualified health care professional of the **exact** same specialty **and subspecialty** who belongs to the same group practice within the past 3 years.

## **Established Patient**

Patient who HAS received services in the past 3 years

## | New vs. Established Patients

If a physician/qualified health care professional is **on call** or **covering** for another physician/qualified health care professional, the patient's encounter will be classified as it would have been by the provider who is not available.

## | Office or Other Outpatient Services

- Provided in the physician's office or other outpatient clinic or ambulatory facility
- New patient
- Established patient

# | Observation

- Hospital Observation Services
  - Patient's designated or admitted to observation status in the hospital
  - No CPT® guideline on length of observation stay
- Observation Care Discharge Services
  - If discharge is on date other than date admitted to observation
- Initial Observation Care
  - The date the patient is admitted to observation
- Subsequent Observation Care
  - Patient is seen on a date other than the date of admit or discharge to observation

# | Observation

- Observation care is classified by whether the patient was seen and released on the **same calendar day** or not.

	Admitted / Discharged DIFFERENT DATES	Admitted / Discharged SAME DAY
Initial date	99218, 99219 or 99220	99234, 99235 or 99236
Subsequent date	99224, 99225 or 99226	n/a
Discharge date	99217	n/a

# | Hospital Inpatient Services

- Codes used for inpatient facility and partial hospitalization
- Use codes 99234-99236 for admit/discharge on same date
- Subsequent hospital care codes used for subsequent visits while admitted
  - Includes reviewing medical record, test results, etc.

# | Hospital Inpatient Services

- Initial Hospital care is reported by the admitting physician on the first date of inpatient hospital care.
- For Medicare patients, these codes are also used by ALL providers who provide initial consultation services.
- The admitting physician is identified with modifier AI.

# | Hospital Discharge Services

- Codes are based on time
- Includes time spent with the final exam, paperwork, writing prescriptions, talking with patient's family, etc.
- Parenthetical notes
  - How to code for concurrent care on the discharge date
  - Discharge of a Newborn see code 99238 or 99463

# | Consultations

- Consultations
  - Service provided by a physician whose opinion or advice regarding evaluation and/or management of a specific problem is requested by another physician or appropriate source
- Divided by location
- Three Rs to meet consultation criteria

# | Consultations

## Medicare:

- Office Consultations
  - Report with new and established patient codes
- Inpatient Consultations
  - Report with initial hospital care codes for the first encounter regardless if performed by the admitting physician.
  - Use Modifier AI for the Principal Physician of Record

## **Emergency Department**

- Does not distinguish between new/established
- Facility must be hospital-based and available 24 hours a day, 7 days a week
- Physician direction of EMS emergency care, advanced life support

# | Critical Care Services

- Critical care is dependent on patient status, not patient location.
- “A critical illness or injury acutely impairs one or more vital organ systems such that there is a high probability of imminent or life-threatening deterioration in the patient’s condition.”
- **Time based** service
- Some services are included in critical care. Pay close attention to the list of services in the Critical Care guidelines.
  - Any service NOT listed in the guidelines CAN be billed separately.
  - The time for performing these carved out services is not included in critical care.

## | Critical Care Services

- Services provided in a critical care unit to a patient who is not considered critically ill are report with other E/M codes.
- Guidelines contain instructions for coding
  - Pediatric Critical Care
  - Neonatal Critical Care
- Critical Care and other E/M services may be coded on same date by the same provider.

# | Critical Care Services

- Billing is based on location, time and patient age:
  - Inpatient
    - Birth to 28 days – billed per day – 99468, 99469
    - 29 days to 24 months – billed per day – 99471, 99472
    - 2 years to 5 years – billed per day – 99475, 99476
    - 6 years and older – billed by minutes – 99291, 99292
  - Outpatient
    - Any age - 99291, 99292

# | Critical Care Transport

- Billing is based on location, time and patient age:
  - Sending provider:
    - All ages - 99291, 99292
  - Transport provider (face to face with patient during transfer)
    - Age birth to 24 months – 99466, 99467
  - Control (receiving) provider
    - Age birth to 24 months – 99485, 99486

# | Nursing Facility Services

- Nursing Facility Services
  - Nursing facility
  - Psychiatric residential treatment center
  - Divided into Initial and Subsequent
- Nursing Facility Discharge
  - Similar to hospital discharge – instructions for care, prescriptions, etc.
- Annual Assessment
  - Annual assessment required by law

# | Domiciliary, Rest Home, or Custodial Care Services

- Also includes Assisted Living
- Physician see patient in one of these types of facilities
  - No medical component
- Either new patient or established patient

# Domiciliary, Rest Home, or Home Care Plan Oversight Services

- Physician provides oversight of the patient's care plan
- Review the case management plan
- Write new orders
- Make a new care plan

# | Home Services & Prolonged Services

- Home Services
  - Seen in home by physician
    - Home may be private residence, temporary lodging, or short-term accommodation
  - Separated by new and established patient
- Prolonged Services
  - Direct patient contact or without direct patient contact
  - Settings are office/outpatient and inpatient
  - Most are add-on codes

## | Standby Services

- Used to report time when a provider is on standby at the request of another provider
- Only report for more than 30 minutes duration
- Reported with additional units for each additional 30 minutes
- Do not report if the period of standby results in the performance of a procedure

# | Case Management & Medical Team Conference

- Case Management Services
  - Anticoagulant Management - Deleted
- Medical Team Conference
  - Requires three healthcare professionals
  - Divided by direct contact or without direct contact

# | Care Plan Oversight Services

- Home Health Agency
- Hospice
- Nursing Facility
  - Billed on a monthly basis
  - For the amount of time physician spends overseeing care of patient

## | Preventive Medicine Services

- Two sets of codes: new or established
- For patients who are not ill, but to prevent future illness
- Extent of service will depend on patient age and risk factors
- If a problem is encountered that is significant to require additional work beyond that of the preventative visit, the appropriate office/outpatient code (99202-99215) should be billed with modifier 25 added.

# Counseling Risk Factor Reduction and Behavior Change Intervention

- For patient without symptoms or established illness
- No distinction between new and established patient
- Preventive Medicine, Individual Counseling
- Behavior Change Intervention
- Preventive Medicine, Group Counseling

# | Non-Face-to-Face Physician Services

- Telephone Services
  - Must be provided by a physician
  - Based on amount of time
  - Patient must be established
- On-Line Medical Evaluation
  - Reported only once for the same episode of care during a 7-day period
  - Must be provided by a physician

## | Special E & M Services

- Basic Life and/or Disability Evaluation Services
- Work Related or Medical Disability Evaluation Services
- Specific guidelines under each code

# | Newborn Care Services

- Newborn Care Services
  - Newborn care age 28 days or less
  - Separated by location and by initial or subsequent visits
- Delivery or Birthing Room Attendance and Resuscitation Services
  - Attendance at delivery at request of delivering physician

# **Inpatient Neonatal Intensive Care Pediatric & Neonatal Critical Care**

- Pediatric Critical Care Patient Transport
- Inpatient Neonatal and Pediatric Critical Care
- Initial and Continuing Intensive Care Services

# | Inpatient Neonatal and Pediatric Critical Care Services

- Defined by age of patient:
  - Neonates 28 days of age or less
  - Infant or young child 29 days through 24 months of age
  - Young child two through five years of age

## | Initial and Continuing Intensive Care Services

- Used to report services to a child who is not critically ill – but requires intensive observation and frequent interventions
- 99477 used for Initial Hospital Care
- 99478-99480 used for Subsequent Intensive Care
  - Code selection based on the present body weight of the child

# Chronic and Complex Chronic Care Coordination

- 2 or more chronic illnesses requiring coordination of care among multiple disciplines
- Reported by the provider overseeing the care plan and coordination
- Reported only once per month
- Code selection
- Time spent overseeing
- Whether a face-to-face encounter occurs

# | Advance Care Planning

- Advance Care Planning codes report face-to-face discussion of advance directives
- Based on time
  - Healthcare Proxy
  - Durable Power of Attorney for Healthcare
  - Living Will
  - Medical orders for Life-Sustaining Treatment

## Evaluation and Management Coding Leveling

- Select the category or subcategory of service and review the guidelines
- Review the level of E/M service descriptors and examples
- Select the appropriate level of E/M service
  - Office and Other Outpatient
    1. Total Time
    2. Medical Decision Making
  - All other categories
    1. Determine the level of history
    2. Determine the level of exam
    3. Determine the level of medical decision making

## 2021 Guidelines Office and Other Outpatient

- Guideline for Total time
- Medical Decision Making determination

SF	Low	Moderate	High
<ul style="list-style-type: none"><li>• 99202</li><li>• 99212</li></ul>	<ul style="list-style-type: none"><li>• 99203</li><li>• 99213</li></ul>	<ul style="list-style-type: none"><li>• 99204</li><li>• 99214</li></ul>	<ul style="list-style-type: none"><li>• 99205</li><li>• 99215</li></ul>

## Total Time Defined

- Preparing to see the patient (eg, review of tests)
- Obtaining and/or reviewing separately obtained history
- Performing a medically appropriate examination and/or evaluation
- Counseling and educating the patient/family/caregiver
- Documenting clinical information in the electronic or other health record
- Independently interpreting results (not separately reported) and communicating results to the patient/family/caregiver
- Care coordination (not separately reported)

## EM based on Total Time

<b>Est Pt Code</b>	<b>Time</b>	<b>New Pt Code</b>	<b>Time</b>
99211			
99212	10-19	99202	15-29
99213	20-29	99203	30-44
99214	30-39	99204	45-59
99215	40-54	99205	60-74

# Prolonged Service – Office and Other Outpatient +99417

Total Duration of New Patient Office and Other Outpatient Services (use with 99205)	Code
Less than 75 minutes	Not reported separately
75-89 minutes	99205 X 1 and 99417 X 1
90-104 minutes	99205 X 1 and 99417 X 2
105 minutes or more	99205 X 1 and 99417 X 3 or more for each additional 15 minutes

Total Duration of Established Patient Office and Other Outpatient Services (use with 99215)	Code
Less than 55 minutes	Not reported separately
55-69 minutes	99215 X 1 and 99417 X 1
70-84 minutes	99215 X 1 and 99417 X 2
85 minutes or more	99215 X 1 and 99417 X 3 or more for each additional 15 minutes

Use 99417 in conjunction with 99205, 99215

Do not report 99417 pm the same date of service as 99354, 99355, 99358, 99359, 99415, 99416

Do not report 99417 for any time unit less than 15 minutes

## **History and Exam**

- Medically appropriate history
- Medically appropriate exam
  - Determined by the Physician/Healthcare provider
- Not counted in the level for office and other outpatient
- 2021 E/M level are selected based on MDM or Total Time

# Number and Complexity of Problems Addressed

Table A: Number and/or Complexity of Problems Addressed

Number/Complexity of Problems Addressed - Nature of Presenting Problem	
Minimal	<input type="checkbox"/> 1 Self-limited or minor problem
Low	<input type="checkbox"/> 2+ Self-limited or minor problems <input type="checkbox"/> 1 Stable chronic illness <input type="checkbox"/> 1 Acute uncomplicated illness/injury
Moderate	<input type="checkbox"/> 1+ Chronic illness w/ exacerbation, progression, or treatment side effects <input type="checkbox"/> 2+ Stable chronic illness <input type="checkbox"/> Undiagnosed problem w/ uncertain prognosis <input type="checkbox"/> Acute illness w/ systemic symptoms <input type="checkbox"/> Acute complicated injury
High	<input type="checkbox"/> Chronic illness w/ severe exacerbation, progression, or treatment side effects <input type="checkbox"/> Acute/chronic illness/injury that poses threat to life or bodily function

# Amount and Complexity of Data to be Reviewed and Analyzed

Table B: Amount and Complexity of Data to be Reviewed and Analyzed

<b>Category 1</b>				
<input type="checkbox"/> QTY:_____ Review of prior external note(s) from each unique source				
<input type="checkbox"/> QTY:_____ Review of the result(s) of each unique test				
<input type="checkbox"/> QTY:_____ Ordering of each unique test				
<b>Independent Historian (IH) (Category 2 for Limited; Category 1 for Moderate/High)</b>				
<input type="checkbox"/> Assessment requiring independent historian(s)				
<b>Category 2</b>				
<input type="checkbox"/> Independent interpretation of a test performed by another physician/other QHP (not separately reported)				
<b>Category 3</b>				
<input type="checkbox"/> Discussion of management or test interpretation with external physician/other QHP/appropriate source (not separately reported)				
<b>Total</b>	<b>0 or 1</b>	<b>1 of 2</b>	<b>1 of 3</b>	<b>2 of 3</b>
	1-Category 1 or less	2-Category 1 IH	3-Category 1/IH 1-Category 2 1-Category 3	3-Category 1/IH 1-Category 2 1-Category 3
<b>Data Level</b>	<b>Minimal or None</b>	<b>Limited</b>	<b>Moderate</b>	<b>Extensive</b>

# Risk and Complications and/or Morbidity or Mortality of Patient Management

Minimal	<p>Minimal risk of morbidity from additional diagnostic testing or treatment</p> <p>Examples: Rest, gargle, elastic bandages, superficial dressings</p>
Low	<p>Low risk of morbidity from additional diagnostic testing or treatment</p> <p>Examples: OTC drugs, minor surgery w/o identified risks, PT/OT therapy, IV fluids w/o additives</p>
Moderate	<p>Moderate risk of morbidity from additional diagnostic testing or treatment</p> <p>Examples: RX drug management Decision regarding minor surgery with identified patient or TX risks Decision regarding major elective surgery w/o identified patient or TX risks Diagnosis or treatment significantly limited by social determinates of health</p>
High	<p>High risk of Mortality from additional diagnostic testing or treatment</p> <p>Example: Drug therapy requiring intensive monitoring for toxicity Decision regarding elective major surgery w/ identified patient or treatment risk factors Decision regarding emergency major surgery Decision regarding hospitalization Decision not to resuscitate or to de-escalate because of poor prognosis</p>

# MDM Calculation Guide

Table D: Medical Decision Making (MDM)

Final Results of Tables A, B, C = Level of Medical Decision Making (MDM)					
<ul style="list-style-type: none"> <li>● Must consider 2 of the 3 MDM elements for the overall MDM level               <ul style="list-style-type: none"> <li>– Use any two components that meet or exceed</li> <li>– Drop the lowest one</li> </ul> </li> </ul>					
Table A	Number/Complexity of Problems Addressed	Minimal	Low	Moderate	High
Table B	Amount and/or Complexity of Data to be Reviewed and Analyzed	Minimal or none	Limited	Moderate	Extensive
Table C	Risk of Complications and/or Morbidity or Mortality of Patient Management	Minimal	Low	Moderate	High
MDM Level		Straightforward	Low	Moderate	High
New Patient Code		99202	99203	99204	99205
Established Patient Code		99212	99213	99214	99215

## | E/M Leveling

- 1995 vs. 1997 Guidelines
  - Main difference – exam component
- Seven components to consider
  - Relates to the level of work performed by the physician or other qualified health care professional
    - History
    - Exam
    - Medical Decision Making
    - Counseling
    - Coordination of Care
    - Nature of Presenting Problem
    - Time

## | E/M Leveling

- Three Key Components
  - History
  - Exam
  - Medical Decision Making
- Generally the influential factors in determining level of service
- Influential in the level of service unless counseling dominates the encounter
- Categories/subcategories describe the number of key components required

## | History

- History is comprised of three different categories:
  - History of Present Illness (HPI)
  - Review of Systems (ROS)
  - Past Family Social History (PFSH)

## | History

- History of Present Illness (HPI)
- Chronological description of the patient's illness
  - Location
  - Duration
  - Quality
  - Severity
  - Timing
  - Context
  - Modifying factors
  - Associated sign and symptoms

# History

## Review of Systems (ROS)

- Inventory of body systems
  - Constitutional
  - Eyes
  - Ears, nose, mouth, throat
  - Cardiovascular
  - Respiratory
  - Gastrointestinal
  - Genitourinary
  - Musculoskeletal
  - Integumentary
  - Neurological
  - Psychiatric
  - Endocrine
  - Hematologic/lymphatic
  - Allergic/Immunologic

## | History

- A single element cannot count towards the HPI and the ROS for the same patient encounter
- Example
  - Knee pain counted as location for HPI
  - Knee pain with limited ROM and swelling documented in the HPI can count as both the location for HPI and musculoskeletal for ROS

# | History

- Past, Family and/or Social History (PFSH)
  - Past History
    - Review of patient's past illnesses, operations, etc.
  - Family History
    - Review of patient's parents/siblings
  - Social History
    - Review of social factors, marital status, alcohol/drug habits

# History

<b>History of Present Illness (HPI)</b>	<b>Review of Systems (ROS)</b>	<b>Past, Family, and/or Social History (PFSH)</b>	<b>Level of History</b>
Brief (1-3 elements)	No ROS	No PFSH	<b>Problem Focused</b>
Brief (1-3 elements)	Problem Pertinent (1 system)	No PFSH	<b>Expanded Problem Focused</b>
Extended (4 or more)	Extended (2-9 systems)	Pertinent (1 history)	<b>Detailed</b>
Extended (4 or more)	Complete (10 or more)	Complete (2-3 history areas)	<b>Comprehensive</b>

## Exam

- 1995 Examination Guidelines – body areas or organ systems
- Body Areas
  - Head, including face
  - Neck
  - Chest, including breasts
  - Abdomen
  - Genitalia, groin, buttocks
  - Back, including spine
  - Each extremity

# Exam

- Organ Systems
  - Constitutional
  - Eyes
  - Ears, nose, mouth and throat
  - Cardiovascular
  - Respiratory
  - Gastrointestinal
  - Genitourinary
  - Musculoskeletal
  - Skin
  - Neurologic
  - Psychiatric
  - Hematologic/lymphatic/immunologic

## Exam

<b>Problem Focused</b> – a limited examination of the affected body area or organ system.	1 body area or organ system
<b>Expanded Problem Focused</b> – a limited examination of the affected body area or organ system and other symptomatic or related organ system(s).	2 – 7 body areas or organ systems – limited exam
<b>Detailed</b> – an extended examination of the affected body area(s) and other symptomatic or related organ system(s)	2 – 7 body areas or organ systems – extended exam
<b>Comprehensive</b> – a general multi-system examination or complete examination of a single organ system	8 or more organ systems OR complete single organ system

## Medical Decision Making

- Thought process of the physician throughout the visit
- Three elements to consider
  - Number of management options
    - Minimal, limited, multiple, extensive
  - Amount and/or complexity of data to be reviewed
    - Minimal or none, limited, moderate, extensive
  - Risk of complications, morbidity, and/or mortality
    - Minimal, low, moderate, high

*Table 1: Complexity of Medical Decision Making – CPT<sup>®</sup> Codebook page 12*

# Medical Decision Making

# of dx or mgmt options	Amt and/or complexity of data	Risk of Complications	Type of Decision Making
Minimal	Minimal or none	Minimal	<b>Straightforward</b>
Limited	Limited	Low	<b>Low complexity</b>
Multiple	Moderate	Moderate	<b>Moderate complexity</b>
Extensive	Extensive	High	<b>High complexity</b>

## | E/M Leveling

### Contributing Components

- Counseling: risk factor reduction, patient/family education
- Coordination of Care: arrange follow up treatment not typically provided by the provider, e.g. physical therapy
- Nature of Presenting Problem: Taken into consideration in the medical decision making portion of the encounter
- Time: If counseling/coordination of care dominates more than 50 percent of encounter, time may be considered as the controlling factor

## Modifiers

- Modifier 24 Unrelated evaluation and management service by the same physician during a postoperative period.
- Modifier 25 Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service.
- Modifier 32 Mandated Services
- Modifier 57 Decision for surgery

## | E/M Leveling

- Many factors to consider when determining a level of Evaluation and Management Service.
- Be sure to Review the Guidelines and code descriptions.

## | Modifiers

- **Modifier 24** Unrelated evaluation and management service by the same physician during a postoperative period.
- **Modifier 25** Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service.
- **Modifier 32** Mandated Services
- **Modifier 57** Decision for surgery

# Medicine

---

CPC Review

# | Medicine

- Immunizations
- Vaccines, Toxoids
- Psychiatry
- Biofeedback
- Dialysis
- Gastroenterology
- Ophthalmology
- Otorhinolaryngology
- Cardiovascular
- Pulmonary
- Endocrinology
- Neurology
- Genetics
- Nutritional Therapy
- Acupuncture
- Moderate Sedation

# | Medicine

- Non-invasive Diagnostic Vascular Studies
- Allergy & Clinical Immunology
- Special Dermatological Procedures
- Physical Medicine & Rehabilitation
- Qualifying Circumstances for Anesthesia
- Home Health Procedures/Services

# | Medicine and ICD-10-CM

- Alphabetic Index to Diseases
- Tabular List
- Official Guidelines for Coding and Reporting

# | Medicine Guidelines

- Multiple Procedures
- Add-on Codes
- Separate Procedures
- Unlisted Service or Procedure
- Special Report
- Materials Supplied by Physician

# | Immune Globulins

- Immune globulins
- Botulinum antitoxin
- Cytomegalovirus (CMV) immune globulin
- Diphtheria antitoxin
- Hepatitis B immune globulin
- Rabies immune globulin
- Tetanus immune globulin

# | Vaccines and Toxoids

- Vaccine Administration
  - with and without Physician counseling
- Vaccines
- Vaccination
- Immunization
- Toxins
- Toxoids

# | Most Common

## Immunizations and Immunization Administration

- Three sets of administration codes:

Code Description	Primary Code	Add-on Code
Immunization Administration <b>with counseling</b> billed <b>by component of the vaccine or toxoid</b> <b>any</b> route of administration	90460	90461
Immunization Administration percutaneous, intradermal, subcutaneous, intramuscular per vaccine	90471	90472
Immunization Administration intranasal, oral per vaccine	90473	90474

# | Psychiatry

- Consultation
- Follow-up by consultant
  - office visits
  - rest home, domicile
  - home
- Transfer of care – new or established pt.
- Diagnostic psychiatric evaluations

# | Dialysis

- Hemodialysis
- Miscellaneous Dialysis Procedures
- End-Stage Renal Disease Services (ESRD)
- Other Dialysis Procedures
- Age-specific, reported once per month
- outpatient; home services

# | Dialysis

Age	Full month – <b>outpatient</b> facility	Full month – <b>home</b> dialysis	<b>Partial month outpatient –</b> <b>Bill PER DAY</b> (ex. patient hospitalized, patient is transient, transplant received)
< 2 years	90951-90953	90963	90967
2 – 11 years	90954-90956	90964	90968
12 – 19 years	90957-90959	90965	90969
20+ years	90960-90962	90966	90970

# | Noninvasive Vascular Diagnostic Studies

- Cerebrovascular Arterial Studies
- Extremity Arterial Studies (Including Digits)
- Extremity Venous Studies (Including Digits)
- Visceral and Penile Vascular Studies
- Extremity Arterial-Venous Studies
- Duplex and Doppler

# | Allergy and Immunology

- Allergy
  - Allergy Testing
  - Allergen Immunotherapy
  
- Pulmonary Studies

# | Medical Genetics and Genetic Counseling Services

- Chromosome
- Gene
- Genetics
- Genetic counseling

# | Hydration

- Hydration, Therapeutic, Prophylactic, Diagnostic Injections and Infusions, and Chemotherapy and Other Highly complex Drug or Highly Complex Biologic Agent Administration.
- Time based codes

# | Non-Chemotherapy Complex Drugs and Substances

- Infusions – therapeutic, prophylactic or diagnostic
- Specific to time, technique, substances added and additional set-up
- Multiple drugs

# | Chemotherapy

Services included with chemotherapy:

- Use of local anesthesia
- IV start
- Access to indwelling IV, subcutaneous catheter or port
- Flush at conclusion of infusion
- Standard tubing, syringes and supplies
- Preparation of chemotherapy agent(s)

# | Chemotherapy

- Paracentesis
- Thoracentesis
- Peritoneocentesis
- Intrathecal
- Ventricular or Intraventricular

# | Physical Medicine and Rehabilitation

## Treatment plan

- Problem list
- Goals
- Physician review progress each 30 days
  - Progress made – recorded
  - Modify or discontinue therapy

# | Physical Medicine and Rehabilitation

- Modalities
  - Supervised
  - Constant Attendance
  - Diathermy, Vasopneumatic Devices
- Key concepts:
  - Anatomic site
  - Type of procedure
  - Number of body regions involved
- Therapeutic Procedures

# Wound Care Management Orthotic Management and Prosthetic Management

Active wound care

- Not to be reported with 11042-11047

Orthotic management and Prosthetic Management

- Orthotics
- Prosthetics

## **| Medicine Section**

- Acupuncture - Face-to-face time
- Osteopathic Manipulative Treatment (O.D.)
- Chiropractic Manipulative Treatment (CMT)

# | Education & Training for Patient Self-Management

Education and training

- Self Management
- How many in the group?

Telephone services – patient, parent, or guardian

- 24 hours
- 7 days

## | On-line Medical Evaluation

- On-line encounter or other electronic communication mode of the medical kind
- Includes all services provided

# I Moderate Sedation

- Neither local nor general anesthesia.
- Patient is still conscious and able to respond to verbal commands but is in a drug induced depression of consciousness.
- Patients are breathing on their own and not intubated.
- Code concepts include:
  - Age of the patient
  - Service provider
  - Time
- If the provider also performs the moderate sedation, an independent observer is required.

# | Special Services, Procedures and Reports

## Miscellaneous services

- 99024 – “tracking”
- Mandatory on-call hospital personnel
- Patient encounters outside the normal posted business hours or special circumstances at the request of the patient.

# | Home Health Procedures/Services

Define home setting:

- Patient's residence
- Assisted living apartments
- Group homes
- Nontraditional private homes
- Custodial care facilities or schools

# **| Medication Therapy Management Services**

Performed by a pharmacist

Documentation required:

- Patient history
- Current medications
- Recommendations

# | Most Common

## Ophthalmology

- Services under General are broken out by new or established patient and type of service (limited or comprehensive)
- Special Ophthalmological Services include:
  - Testing (ex. Refraction, visual fields, glaucoma evaluation, etcO)
  - Prescription and fitting of lenses
  - Assessment of eye muscles
  - Contact lens services
  - Spectacle (eyeglasses) services
- Ophthalmoscopy

# Tips for Taking an AAPC Certification Exam

# | ICD-10-CM

- Highlight:
  - Code first notes
  - Use additional notes
  - Excludes1, Excludes2
- Make notes to reference important guidelines

## Highlight key words in subsection guidelines:

- New vs. established
- Definitions such as simple, intermediate, complex repair
- Musculoskeletal section – open, closed, fixation, percutaneous, manipulation, etc.
- Parenthetical instructions

# | Exam Registration

- [www.aapc.com](http://www.aapc.com)
- You will receive a confirmation email including:
  - Exam date and location of exam
  - Proctor's name and telephone number
  - Start time
- Arrive at the exam at least 10-15 early

# | Day of the Exam

- Arrive 10-15 minutes early
- Bring:
  - Code books
  - Photo ID
  - #2 pencils and eraser
  - NO scrap paper (not allowed)
- Eat a healthy breakfast
- Bring light snacks and water (avoid loud and crunchy snacks)
- Bring a light jacket or sweater

## | During the Test

- Listen carefully while proctor reads instructions
- Stay relaxed and confident
- Scan the entire test
  - Answer the easiest first
- Read all choices before answering
- Pace yourself
- Answer every question

## | Exam Completion

- Exam results released within 5-7 business days after AAPC receives the exam package from the proctor
- My AAPC area on the AAPC website
- Official documents mailed to you
- Exam results may NOT be released over the telephone

# The End
