2

Getting the most out of this training

Key guideline review

- Multiple choice processing
- Time management
- Process of elimination
- Marking your books

Process of Elimination

Training covers the process of elimination:

- Look at the answers first.
- Are there key instructions or guidelines for the answers provided?
 Are there parenthetical statements for CPT® or "code first" statements?
 Typically can eliminate 2 answers immediately

4

Time Management

Just over 2 minutes per question

- Mark difficult questions and come back to them later
 Read the question first, and then the scenario
- No specific format for completion

5

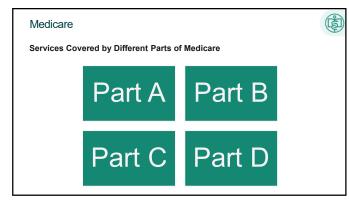

Marking Your Books

- Underline main terms
- Highlight key points
- Write effective reminders, such as guidelines

Medical Necessity

Services or supplies that:

- are proper and needed for the diagnosis or treatment of your medical condition,
- are provided for the diagnosis, direct care, and treatment of your medical condition,
- meet the standards of good medical practice in the local area, and
- aren't mainly for the convenience of you or your doctor.

10

National Coverage Determinations

圖

- National Coverage Determinations (NCD) help to spell out CMS policies on when Medicare will pay for items or services.
- Each Medicare Administrative Carrier (MAC) is then responsible for interpreting national policies into regional policies (LCDs).
- LCDs only have jurisdiction within their regional area.

11

Advance Beneficiary Notice

- Providers are responsible for obtaining an ABN prior to providing the service or item to a beneficiary.
 The form must be filled out in its entirety as well as the potential cost to the patient and the reason why Medicare may deny the service.
 - Only the approved Form CMS-R-131 is valid for Medicare beneficiaries and the forms may not be altered other than to add the practice name on the form.

HIPAA

- National standards for electronic healthcare transactions and code sets
- · National unique identifiers for providers, health plans, and employers
- Privacy and Security of health data

13

Health Insurance Portability and Accountability Act (HIPAA)

Code Sets

- HCPCS Healthcare Common Procedure Coding System
- CPT® Current Procedural Terminology
- CDT Dental Procedures and Nomenclature
 ICD-10-CM (ICD-9-CM Prior to October 1, 2015) International Classification of Diseases, 10th revision, Clinical Modification
- NDC National Drug Codes
- Although HIPAA mandates the use of the specified code sets, it does not mandate the
 use of its conventions or guidelines, except for the ICD-10-CM.

14

HITECH

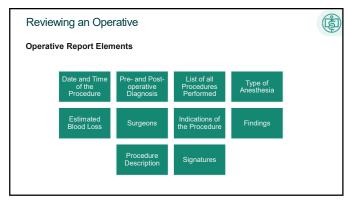

The Health Information Technology for Economic and Clinical Health Act

- Promote the adoption and meaningful use of health information technology
 Strengthened HIPAA
 Patient audit trail

Old Compliance Plan Conduct internal monitoring and auditing. Implement compliance and practice standards. Designate a compliance officer or contact. Conduct appropriate training and education. Respond appropriately to detected offenses and develop corrective action. Develop open lines of communication with employees. Enforce disciplinary standards through well-publicized guidelines.

Merit-Based Incentive Payment Systems (MIPS)

Quality Payment Program:

- Eligible Clinicians
- Physicians include: Doctors of chiropractic, dental medicine, dental surgery, medicine, optometry, osteopathy, and podiatric medicine.
- Exclusions
 First year in Medicare
 Qualifying APM Participant
 Do meet the low volume threshold
 Submitter Types

- As an individual
 Group, Virtual Group
 As an APM entity

19

Merit-Based Incentive Payment Systems (MIPS)

MIPS Performance Categories:

- Quality
 Must submit at least six quality measures during the 12-month period
- Most opening at reason and squary interested conting in the period interpoperability
 Must report measures from each of the four objective measures for 90 continuous days
- Improvement Activities
 Must report a combination of high and medium weighted measures for 90 continuous days
- Cost
 CMS analyzes data from both Part A and Part B claims to calculate the overall cost of the patient care.

20

Advanced Alternative Payment Models (APM)

- An APM is a group of clinicians who have voluntarily come together in an organized way to deliver coordinated high-quality care to Medicare patients.
- Advanced APM entities agree to:
- Use of certified EHR technology (Must be certified under 2015 criteria);
 Base payment on quality measures comparable to MIPS; and
- Either bear more than nominal risk for financial losses or is a Medical Home Model expanded under CMS Innovation Center authority.

anaerobes J15.8
anthrax A22.1

31

Coding Conventions

- Means "associated with" or "due to" when it appears in a code title, the Alphabetic Index, or an instructional note in the Tabular List.
- Presumed causal relationship between the main term and the terms listed under the entry "with."

Diabetes, diabetic (melitus) (sugar) E11.9 with amyotrophy E11.44 arthropathy NEC E11.618 autonomic (poly)neuropathy E11.43 cataract E11.36 Charcots joints E11.610 Chronic kidney disease E11.22

32

ICD-10-CM Official Guidelines for Coding and Reporting

Referencing the Guidelines

- A documented reference appears as Section I.C.4.a.2.
- This indicates the guideline is found in:
- Section I. Conventions, General Coding Guidelines and Chapter Specific Guidelines
 Section I.C. Chapter-Specific Coding Guidelines
- Section I.C.4. Chapter 4: Endocrine, Nutritional, and Metabolic Diseases (E00-E89)
 Section I.C.4.a. Diabetes mellitus
- Section I.C.4.a.2. Type of diabetes mellitus not documented

1	1

ICD-10-CM Official Guidelines for Coding and Reporting Guideline Reference: I.C.4.a.2. C. Chapter Specific Coding Guidelines 4. Chapter 4: Endocrine, Nutritional, and M

2) Type of diabetes mellitus not documented. If the type of diabetes mellitus is not documented in the medical record the default is E11.-, Type 2 diabetes.

34

Locating the ICD-10-CM Code

Code Structure

- Chapter based on body system or condition.
 Example: Chapter 4: Endocrine, Nutritional, and Metabolic Diseases (E00-E89)
 Section A group of three-character categories
 Example: Diabetes melitius (E08-E13)
- Categories Three-character code numbers
 Example: E11 Type 2 diabetes mellitus

35

Locating the ICD-10-CM Code

Code Structure

- Subcategories can be 4, 5, or 6 characters

 4 bar character further defines the site, etiology, and manifestation or state of the disease or condition.

 Example: E11.6 Type 2 diabetes mellitus with diabetic arthropathy

 5 or 6 bar character represent the most accurate level of specificity.

 Example: E11.610 Type 2 diabetes mellitus with diabetic neuropathic arthropathy

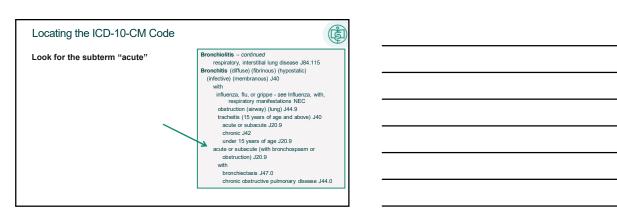

Locating the ICD-10-CM Code Code Structure • 7th character extenders • Example: The Foreign body in ear The appropriate 7th character is to be added to each code from category T16 A = initial encounter D = subsequent encounter S = sequela T16.1XXA Foreign body in right ear, initial encounter

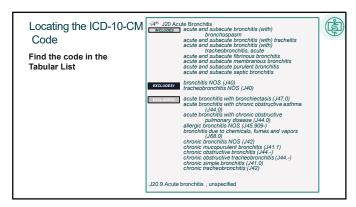

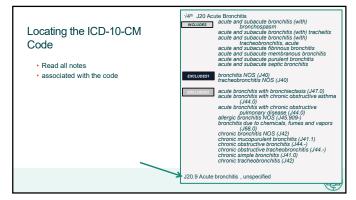

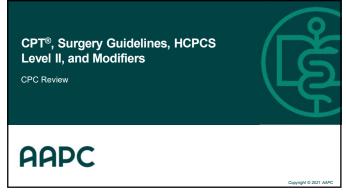

Introduction to CPT®

- \bullet The CPT $\!^{\scriptscriptstyle (\!0\!)}$ code set includes three categories of medical nomenclature with descriptors.
- Category I
 Category II
 Category III

46

Introduction to CPT®

Instructions for use of the CPT® code book

- Unlisted procedure
- CPT® use by any qualified healthcare professional
- Parenthetical notes
- Accuracy and quality of coding
 Related guidelines
 Parenthetical instructions
 Other coding resources

47

CPT® Guidelines

- Referenced in the introduction of each section and subsection of the CPT® code book
- Applicable to the section being referenced
- Define the information necessary for choosing the correct code

(3) CPT® Conventions and Iconography Used throughout the CPT® code book and include: Code symbols - iconology Parenthetical instructions 49 CPT® Conventions and Iconography ; The semicolon and the conventional use of indentions The use of the semicolon divides the description of a code into two parts: • The "stand-alone" code or the "common portion of the procedure" code descriptor ${\ensuremath{\bullet}}$ The indented descriptor is dependent on the preceding "stand-alone" code 50 CPT® Conventions and Iconography The "add-on" code symbol - Add-on codes are never reported alone. They are always modifier 51 exempt. • I The red bullet - new procedure code • p The (blue) triangle - code revision ut Opposing triangles - indicate new and revised text other than the procedure descriptors

CPT® Conventions and Iconography

- The circle with a line through it exempt from the use of modifier 51
- The lightening bolt symbol codes for vaccines that are pending FDA approval.
- # The number symbol Re-sequenced and are out of numerical order

52

Category I CPT® Codes

The CPT® code book divides Category I CPT® codes into six main section

- Evaluation and Management
- Anesthesiology
- SurgeryRadiology
- Pathology and Laboratory
- Medicine

53

Category I CPT® Codes

- Section titles have subsections divided by anatomic location, procedure, condition, or descriptor subheadings.
- The subheadings, structured by CPT® conventions, may list alternate coding suggestions in parenthetical instructions.
- Example:
 Section: Surgery (10021-69990)
- Subsection: Integumentary System
 Subheading: Skin, Subcutaneous and Accessory Structures
- Category: Debridement

nate coding (For dermabrasions, see 15780 – 15783) (For nail debridement, see 11720-11721) (For burn(s), see 16000-16036 16035) (For pressure ulcers, see 15920-15999)

The CPT® Code Book

- CPT® Sections
- Section Guidelines
- Section Table of Contents
- Notes
- · Category II codes
- Category III codes
- Appendices A-O
- Alphabetic Index

55

CPT® Code Basics

- Review medical documentation thoroughly and gather additional reports
- Reference the alphabetical index for a CPT® numerical code and/or code range.
 Condition

 - Procedure or service
 - · Anatomic site
 - Synonyms, eponyms, and abbreviations
- Review the numerical code and/or code range for specific descriptions
 Follow CPT® Guidelines, Conventions, and Iconology

56

Category II CPT® Codes

- Alphanumeric format, with the letter "F" in the last position, eg, 0001F
- Optional "performance measurement" tracking codes
- Used to report Quality to Medicare under Quality Payment Program
- Formerly referred to as Physician Quality Reporting System (PQRS)

Category III CPT® codes • Temporary codes Alphanumeric structure, with a "T" in the last position, eg, 0042T Can be reported alone, without an additional Category I code 58 CPT® Appendices Appendix A - Modifiers categorized: Modifiers applicable to CPT® codes Anesthesia Physical Status Modifiers CPT® Level I Modifiers approved for Ambulatory Surgery Center (ASC) Hospital Outpatient Use Level II (HCPCS/National) Modifiers 59 CPT® Appendices • Appendix B - changes and additions to the CPT® codes from the previous year • Appendix C - clinical E/M examples for different specialties Appendix D – Add-on Codes

CPT® Appendices

- Appendix E Exempt from the use of modifier 51 (multiple procedures)
- Appendix F Exempt from the use of Modifier 63 (procedures performed on infants less than 4kg)
- Appendix G Removed from the $CPT^{\scriptsize\textcircled{\tiny{10}}}$ code book (2017).

61

CPT® Appendices

- Appendix H Alphabetic Index of Performance Measures by Clinical Condition or Topic
 Available only on the AMA website

- Appendix I Genetic Testing Code Modifiers
 Removed from the CPT® code book (2013)
- $\bullet \ \mathsf{Appendix} \ \mathsf{J} \ \mathsf{-Electrodiagnostic}_{\ensuremath{\mathsf{AT4}}} \mathsf{dicine} \ \mathsf{Listing} \ \mathsf{of} \ \mathsf{Sensory}, \ \mathsf{Motor}, \ \mathsf{and} \ \mathsf{Mixed} \ \mathsf{Nerves}$

62

CPT® Appendices

- Appendix K Product Pending FDAApproval
- Appendix L Vascular Families
 Based on the assumption that a vascular catheterization has a starting point of the aorta
- Appendix M Crosswalk to Deleted CPT® Codes
- Appendix N Summary of Re-sequenced CPT® Codes
- Appendix O Multianalyte Assays
 - · Laboratory use

Added trademark symbol Annette Telafor, 9/14/2021 AT4

CPT® Appendices • Appendix P – CPT® Codes that May Be Used for Synchronous Telemedicine Services • These codes are used with real-time telemedicine services when appended with modifier 95.

64

National Correct Coding Initiative (NCCI) Implemented by CMS Promotes correct coding methodologies Controls the improper assignment of codes that results in inappropriate reimbursement Medicare publishes CCI: https://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/index.html

65

Sequencing Based on RBRVS • Physician Work • Practice Expense • Professional Liability/Malpractice Insurance Highest RBRVS listed first https://www.cms.gov/apps/physician-fee-schedule/overview.aspx ATG

Slide 65

CPT® Assistant

- Articles answering everyday coding questions
- CCI bundling information
- E/M billing guidance
 Current code use and interpretation
- Case studies demonstrating practical application of codes
- Anatomical illustration charts and graphs for quick reference
- Information for appealing insurance denials
- Information to validate code usage when audited

67

CPT® Global Surgical Package

- Includes a standard package of preoperative, intraoperative, and postoperative services
- · Payer policies may vary
- May be furnished in any service location
- · For example, a hospital, an ambulatory surgical center (ASC), or physician office

68

CPT® Global Surgical Package

Included in the surgery package and not separately billable:

- Local infiltration, metacarpal/metatarsal/digital block or topical anesthesia
- Subsequent to the decision for surgery, one related E/M encounter on the date immediately prior to or on the date of procedure (including history and physical)
- Immediate postoperative care, including dictating operative notes, talking with the family
- and other physicians

 Evaluating the patient in the post-anesthesia recovery area
- Writing orders
- Typical postoperative follow-up care

(3) CMS Global Surgical Package Major Surgery: Has a preoperative period of 1 day with 90 days for the postoperative period. Minor Surgery: The preoperative period is the day of the procedure with a postoperative period of either 0 or 10 days depending on the procedure. 70

HCPCS Level II

Types of Level II Codes

- Permanent National Codes maintained by the CMS HCPCS Workgroup
 Responsible for additions, deletions, revisions

 - Updated annually
- Temporary National Codes maintained by the CMS HCPCS Workgroup
 Responsible for additions, deletions, revisions
 Updated quarterly

71

Most Common

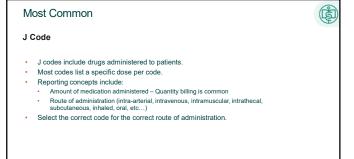

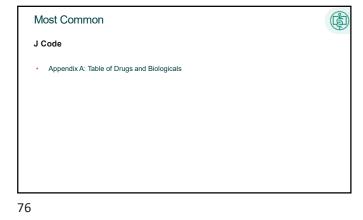

A Code

- · Codes include:
- Ambulance codes
 Ambulance modifiers to indicate origin and destination of transport
- Medical and surgical supplies

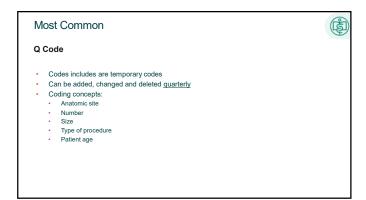

Most Common G Code Codes include: Temporary codes Some CMS service/procedure codes CMS Quality Reporting codes

HCPCS Level II G codes Professional healthcare procedures/services with no CPT® codes Example: G0412 – G0415 – unilateral or bilateral 27215 – 27218 – unilateral only, use modifier 50 for bilateral Used by state Medicaid agencies for mental health services such as alcohol and drug treatment services

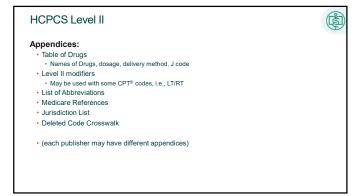

Most Common L Code Primarily orthotic and prosthetic supplies, devices and services Coding concepts: Product Anatomic site Number Size

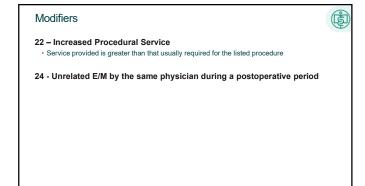

Most Common S Code These codes are temporary national, non-Medicare, codes Coding concepts include: Anatomic site Number Size Age Type of procedure

79

80

Global Package Modifiers 25 - Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service • 57 - Decision for surgery 82 Global Package Modifiers 58 - Staged or related procedure or service by the same physician during the postoperative period • 78 - Unplanned return to the operating/ procedure room by the same physician following initial procedure for a related procedure during the postoperative period \bullet 79 $\,$ - Unrelated procedure or service by the same physician during the postoperative period 83 Surgical Modifiers • 50 - Bilateral Procedure • 51 - Multiple Procedures • 52 - Reduced Services • 53 - Discontinued Procedure

Modifier 59 - Distinct Procedural Service

- Procedures not normally reported together
- Different Session or Patient Encounter
- Different Procedure or Surgery
- Different Site or Organ System
- Separate Incision/Excision
- Separate Lesion

85

Modifier 59 - Distinct Procedural Service

CMS provides a subset of modifier 59:

- XE Separate Encounter, a service that is distinct because it occurred during a separate encounter;
- XS Separate Structure, a service that is distinct because it was performed on a separate
- Separate Organistructure;
 XP Separate Practitioner, a service that is distinct because it was performed by a different practitioner; and
- XU Unusual Non-Overlapping Service, the use of a service that is distinct because it does not overlap usual components of the main service.

86

Multiple Surgeon Modifiers

62 - Two Surgeons

- Work together as primary surgeons
- Perform distinct parts of a procedure
- · Dictate op report of their distinct part
- Each will submit the same code and append modifier 62

66 - Surgical Team

- Highly complex procedures
- Require differently specialties
- Modifier 66 appended to procedures coded by the surgical team

Assistant Surgeon Modifiers

80 - Assistant Surgeon

- Assistant surgeon present for entire or substantial portion of the operation
- Reports the same surgical procedure with modifier 80 appended

81 - Minimum Assistant Surgeon

- Circumstances present that require the services of an asst surgeon for a short time. Minimal assistance.
- Reports the same surgical procedure with modifier 81 appended

82 – Assistant Surgeon (when qualified resident surgeon not available)

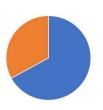

- Used in a teaching hospital that employs residents
- · No residents available and another surgeon is used

88

Ancillary Modifiers

- Global a procedure containing both a technical and a professional component
- Modifier 26 Professional Component
- Modifier TC Technical Component

89

10000 Series Integumentary System

CPC Review

AAPC

Copyright © 2021 AAPO

Anatomy of the Skin **Epidermis** Made up of 4-5 layers; function is protection Dermis Mid layer Blood vessels, connective tissue, nerves, etc. Subcutaneous Tissue Connective tissue and adipose tissue 91 ICD-10-CM: Integumentary Chapter 2: Neoplasms Chapter 12: Diseases of the Skin and Subcutaneous Tissue Chapter 19: Injury and Poisoning 92 (3) ICD-10-CM: Integumentary Chapter 12: Diseases of the Skin and Subcutaneous Tissue Skin infections (bacterial and fungal) Inflammatory conditions of the skin Other disorders of the skin Corns and calluses Keloid scars Keratosis

Inflammatory Conditions of the Skin

Erythema multiforme:

- Code for erythema multiforme
- Code associated manifestation
- Code percent of skin exfoliation (L49.0-L49.9)
- An additional E code if drug induced

94

Pressure Ulcers

Decubitus ulcers/bed sores

Coding

- · Identify the location of the ulcer
- Identify the stage of the ulcer
- Ulcers present on admission but healed at the time of discharge, assign the code for the site and stage of the pressure ulcer at the time of admission
- Ulcers evolving to a higher stage, two separate codes should be assigned: one code for the site and stage of the ulcer on admission and a second code for the same ulcer site and the highest stage reported during the stay

95

Injury and Poisoning

Wounds

- Superficial injuries (abrasions, burns, blisters, insect bites, splinters)
- Contusions (bruises, hematomas)
- Open wounds (lacerations, punctures, open bites)

Burns (fire, heat source, hot appliance) Corrosions (chemicals)

(3) Burns Location Severity (degree) of burn Total Body Surface Area (TBSA) 97 Disorders of the Breast Category N60-N65 - Disorders of the breast Category N60 - Mammary dysplasia Category N65- Deformity and disproportion of reconstructed breast N65.0 Deformity of reconstructed breast N65.1 Disproportion of reconstructed breast 98 (3) Fine Needle Aspiration (FNA) • 10021 Fine needle aspiration biopsy, without imaging guidance; first lesion + 10004 each additional lesion • 10005 Fine needle aspiration biopsy, including ultrasound guidance; first lesion + 10006 each additional lesion 10007 Fine needle aspiration biopsy, including fluoroscopic guidance; first lesion + 10008 each additional lesion

Fine Needle Aspiration (FNA)

- 10009 Fine needle aspiration biopsy, including CT guidance; first lesion
- + 10010 each additional lesion
- 10011 Fine needle aspiration biopsy, including MR guidance; first lesion
- + 10012 each additional lesion

[►] (For percutaneous needle biopsy other than fine needle aspiration, see 19081-19086 for breast, 20226 for muscle, 32400 for pleura, 32408 for ltate of needlastinum, 42400 for salivary gland, 47000 for liver, 48102 for pancreas, 49180 for abdominal or retroperitoneal mass, 50200 for kidney, 54500 for testis, 54800 for epididymis, 60100 for thyroid, 62267 for nucleus pulposus, intervertebral disc, or paravertebral tissue, 62269 for spinal cord)

100

Skin, Subcutaneous, and Accessory Structures

Incision and Drainage

- Simple
- Complicated*
- * Complicated = placement of a drain, presence of infection, hemorrhaging that requires ligation, extensive time

101

Debridement

Debridement

- Method for removing dead tissue, dirt, or debris from infected skin, burn or wound
- Based on percent of body surface area

Debridement of necrotizing soft tissue

Based on area of body being debrided

Active Wound Care

• 97597-97606

Added this section below to slide - good to point out this helpful information for coding AT7 tips in the code book Annette Telafor, 9/14/2021

Biopsy

- Biopsies are reported by technique.
- Obtaining of tissue during another procedure is not considered a separate biopsy.
- · Simple closure repair included.
- When more than one biopsy is performed by different techniques during the same encounter, only one primary biopsy code is reported and the add-on codes for the additional techniques are used.

103

Biopsy

- Tangential (shave, scoop, saucerize, curette) is performed with a sharp blade, such as a flexible biopsy blade, obliquely oriented scalpel or curette to remove a sample of epidermal
- Punch requires a punch tool to remove a full-thickness cylindrical sample of skin.
- Incisional requires the use of a sharp blade to remove a full-thickness sample of tissue via vertical incision or wedge

 Remember simple closure is included in the biopsy codes.

104

Skin, Subcutaneous, and Accessory Structures

Removal of Skin Tags

- 11200 up to and including 15 lesions
- 11201 add-on code for each additional 10 lesions

Shaving of Epidermal Lesions 11300-11313

- Include local anesthesia & chemical/electrocauterization of wound
- · Select codes on size and anatomic location

(3) Skin, Subcutaneous, and Accessory Structures Excision of Lesions - Benign or Malignant Pay attention to the guidelines for these codes Simple closure is included. Do not report separately. Report <u>separately each lesion excised</u>. Keport separately each tesion ey Codes are selected based: Anatomic location Size (lesion plus margins) Malignant lesions: append modifier 58 if the patient has follow-up, reexcision during the postoperative period 106 Skin, Subcutaneous, and Accessory Structures **Coding Tip** Underline the different anatomical options Add notes to the page where you see the codes, such as "code <u>PER</u> lesion" 107 (3) Nails Fingernails and/or toenails Trimming or Debridement

Integumentary System

Pilonidal Cyst

- Coded according to complexity of excision
- SimpleExtensive
- Complicated

109

Wound Repair

- Codes for wound closure using sutures, staples or tissue adhesive
- If only adhesive strips used, the service is coded using E/M only.
 Two important guidelines:
 Measure and report size in centimeters (cm)

- When MULTIPLE wounds are repaired, add together the lengths of those in the same classification (repair type) and same anatomic grouping. DO NOT add together lengths from different classifications.

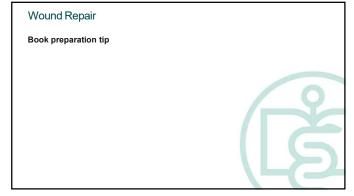

110

Wound Repair

Definitions for types of wound repair are found in guidelines

- Simple repair wound is superficial and requires single layer closure
- Intermediate repair wound is deeper and requires layered closure of one or more deeper layers of subcutaneous tissue or superficial fascia. It includes limited undermining. It also includes a heavily contaminated wound that requires extensive cleaning or removal of particulate matter
- Complex repair wound requires more than a layered closure, scar revision, debridement, extensive undermining, stents or retention sutures.

112

Adjacent Tissue Transfer

Pay attention to the guidelines for these codes

- These codes do not apply to direct closure or rearrangement of traumatic wounds.
- The excision of benign or malignant lesions is not separately reportable with Adjacent Tissue Transfer when done for the same lesion.
- Skin grafts necessary to close a secondary defect is separately reportable.

AT12

113

Repair

Skin Replacement Surgery & Skin Substitutes

- 15002-15005 based on size of repair and site
- 15040-15261 reported for autografts and tissue cultured autografts
- 15271-15278 reported for skin substitute grafts
- 15050 is pinch graft measured in centimeters
- All other skin graft codes are determined by the size of the defect in square centimeters
 Square centimeters calculation
 length in cm x width in cm

AT12 Need to verify page # once 2022 CPT book is printed - not available at time of review Annette Telafor, 9/15/2021

Skin Replacement Surgery & Skin Substitutes

- The section starts with codes for the surgical preparation of the recipient site and are based on the anatomical area and size of the wound preparation.
- Harvest and placement of the skin graft is reported based
- Type of graft (ex. Split thickness, full thickness, epidermal, etc.)
 Location (where the graft is going, not from where the graft is taken).
- Size. Note, measurement is square centimeters for adults and children ten years and older. Patients less than ten years of age is measured by percentage.

115

Destruction

Ablation by any method other than excision

- Electrosurgery
- Cryosurgery
- · Laser treatment · Chemical treatment
- Benign/premalignant based on number of lesions
- Malignant lesion according to location and size in centimeters

116

Destruction

Guidelines:

- Type of lesion (benign, malignant, premalignant)
- Location of the lesion
- Size or lesion diameter
- Destruction methods: ablation, electrosurgery, cryosurgery, laser, chemical, surgical
- Report separately each lesion destroyed.

Mohs Micrographic Surgery

Mohs Micrographic Surgery

- Removal of complex or ill-defined skin cancer
- Physician acts as surgeon and pathologist
- Removes tumor tissues and performs histopathologic exam
- Repair of site may be reported separately
- Stage = each deeper layer of tissue removed
- Block = smaller pieces of each stage that will be examined for cancer

118

Mohs Micrographic Surgery

To report Mohs surgery:

- Know the anatomic location
- Number of stages (how many layers of tissue removed)
- Number of blocks per stage (how many specimens were created from the layer)

119

Breast Biopsy

- Performed as percutaneous or open.
- Codes are divided by type of imaging guidance (stereotactic, ultrasound, or magnetic resonance).
- Code per lesion biopsied

Mastectomy

- 19304 Mastectomy, subcutaneous
- 19305 Mastectomy, radical, including pectoral muscles, axillary lymph nodes
- 19306 Mastectomy, radical, including pectoral muscles, axillary and internal mammary lymph nodes (Urban type operation)
- 19307 Mastectomy, modified radical, including axillary lymph nodes, with or without pectoralis minor muscle, but excluding pectoralis major muscle

121

122

Anatomy

Skeleton

- Axial
- Appendicular
- Muscles assist with heat production and posture
- Ligaments attach bones to other bones
- Tendons attach muscles to bones
- Cartilage acts as a cushion between bones in a joint

ICD-10-CM Coding Laterality • 1— Right • 2— Left • 3— Bilateral • 9- Unspecified • When the laterality is not documented, unspecified is used • If a bilateral option is not available, 2 codes will be reported When a bilateral condition exists, and there is a bilateral code, the bilateral code is reported even if only one side is being treated for that encounter. 124

Diseases of the Musculoskeletal System and Connective Tissue

Chapter 13

- Arthropathy pathology or abnormality of a joint
- Dorsopathies disorders affecting the spinal column
- Rheumatism non-specific term for any painful disorder of the joints, muscles, or connective tissue
- Enthesopathies disorders of ligaments
- Bursitis inflammation of the bursa
- Pathological fractures

125

Injury and Poisoning

Sprains and Strains

Fractures

- Comminuted
- Impacted Simple
- Greenstick
- Pathologic
- Compression
- · Torus or Incomplete

Guidelines for Fracture Treatment

Fracture Guidelines

- Fracture treatment includes application and removal of first cast or traction device only. Subsequent replacement of cast and/or traction device may require an additional listing.
- Treatments:
 - Closed: fracture site is not surgically exposed/opened
 - Open: either fracture site is surgically opened to visualize the repair or site is opened remove from fracture site to insert an intramedullary nail
 - Percutaneous: Neither open or closed. Fixation (pins) are placed across the fracture site, usually under fluoroscopy
 Manipulation: Attempted reduction or restoration of a fracture to normal alignment by applied force.

127

Fracture Coding

Coding Note

- Pay close attention to Fracture/Dislocation sections
 - Treatment type
 - Bone treated

128

CPT®: Musculoskeletal System

Formatted by anatomic site:

- General
- Head, Neck (soft tissues) and Thorax
- Back and Flank
 Spine (vertebral column)
- Abdomen
- Shoulder, Humerus and Elbow
- Forearm and Wrist
- Hand and Fingers
- Pelvis and Hip Joint
 Femur and Ankle Joint
- Foot and Toes
- Application of Casts and Strapping
- Endoscopy/ Arthroscopy

Musculoskeletal System "General" subheading Many different anatomic sites Other subheadings Divided by anatomic site, procedure type, condition and description Incision, excision, introduction or Removal, Repair, Revision and/or Reconstruction, Fracture and/or dislocation, Arthrodesis, Amputation 130 Wound Exploration • Used for wounds resulting from a penetrating trauma. Describe surgical exploration and enlargement of wound, extension of dissection, debridement, removal of foreign body, ligation of minor blood vessels. No thoracotomy or laparotomy is done. If those approaches are necessary, report those codes, not these. · Wound repair is separately reportable. 131 (3) General Excision & Biopsy Muscle or Bone • Depth of wound or tissue excised Introduction or Removal • Injections • Foreign body removal

Trigger Point Injections

- Aponeurosis is an abnormal sheet like extension of the tendon. Injection of a tendon or ligament is the medical therapeutic procedure to reduce the aponeurosis formation
- Trigger points are painful knots of muscle that are tight and do not relax.
- Codes are available for injections with or without medication.
- Codes are selected based on the number of muscles treated, not the number of needles or injections placed.

133

Spine

Anatomy

- Cervical C1-C7
- C1 Atlas C2 Axis
- Thoracic T1-T12
- Lumbar L1-L5

Spinal Instrumentation

- Segmental
- Non-segmental

134

Osteotomy

- Osteotomy procedures are reported when portion(s) of the vertebral segment(s) are removed in preparation for spinal deformity correction.
- Key concepts include anatomic site and complexity.
- Columns:
- Anterior anterior 2/3 of the vertebral body
 Middle posterior ½ of vertebral body and pedicle
 Posterior articular facets, lamina and spinous process

Bone Grafting and Vertebral Column

Guidelines

- Bone grafting procedures are separately reportable.
- · Instrumentation is separately reportable.
- When arthrodesis (fusion) is also performed, it is reported in addition to the primary procedure with modifier -51.
- When 2 surgeons work together as primary surgeons performing distinct parts of a single procedure, each surgeon reports his distinct work by appending modifier -62 to the procedure code.

136

Vertebroplasty

- Vertebroplasty is the injection of material into the vertebral body (rounded portion) to reinforce the structure. This is done under imaging guidance.
- Vertebral augmentation is the process of cavity creation (lifting) after compression fracture of the spine. Bone coment is injected into the vertebral body and fractures to prevent recurrent collapse.
- Location of the vertebral body guides code selection

137

Vertebroplasty

Key to coding:

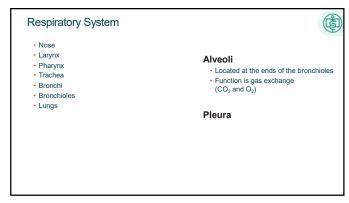

- Number of levels
- Location (cervical, thoracic, lumbar)
- Imaging guidance not reported separately
- Modifier 50 not reported

Application of Casts and Strapping Cast application is billable if: • It is a replacement cast during follow-up or after care for a fracture It is an initial service performed without restorative treatment or procedure to stabilize or protect a fracture, injury or dislocation or to provide comfort to a patient. 139 Endoscopy/Arthroscopy • Divided by body area – shoulder, elbow, wrist, hip, knee, ankle Surgical endoscopy/arthroscopy includes a diagnostic endoscopy/arthroscopy Multiple surgical procedures performed through scope may be reported "Separate procedure" – included in more extensive procedure 140 Endoscopy/Arthroscopy Many codes can be reported as arthroscopic or as open services. Look for key words in the operative report such as scope or port to identify an arthroscopic procedure. Watch parenthetical statements under the codes for services that are included with other arthroscopic services

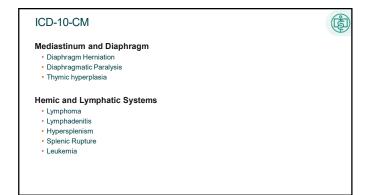

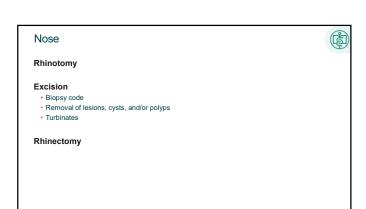

Mediastinum and Diaphragm Mediastinum-thoracic cavity between the lungs that contains the heart, aorta, esophagus, trachea, thymus gland • Diaphragm-muscle that divides the thoracic cavity from the abdominal cavity 145 Hemic and Lymphatic Systems Structures dedicated to circulation and production of lymphocytes Three interrelated functions Removal for interstitial fluid from tissues Absorbs and transports fatty acids to circulatory system Transport antigen presenting cells to lymph nodes 146 Hemic and Lymphatic Systems Located left side of stomach Reservoir for blood cells • Produces lymphocytes involved in fighting infection

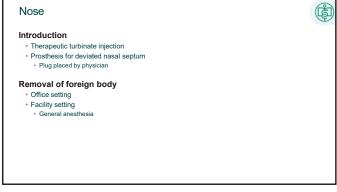

ICD-10-CM: Respiratory Acute Upper Respiratory Infections (J00-J06) Influenza and Pneumonia (J09-J18) Other acute lower respiratory Infections (J20-J22) Other diseases of Upper Respiratory tract (J30-J39) Chronic Lower Respiratory diseases (J40-J47) Bronchitts (J40-J42) Emphysema (J43) COPD (J44) Asthma (J45)

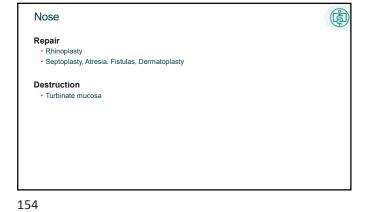

Rules/Guidelines Respiratory procedures Progress downward from the head to the thorax Parenthetical statements Directions on how to use specific codes Apply to codes above parenthetical note; not below Most codes are unilateral Use modifier 50 if bilateral procedure performed Unless code descriptor states bilateral

Coding concepts include:

- Anatomical site
- Complexity
- Codes are unilateral and require use or RT or LT
- Bilateral nosebleed would require modifier -50.

155

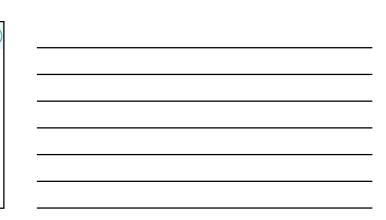

Procedures

- Obliterative
- ObliterativeNon-obliterative

Endoscopies

- Diagnostic/Surgical
- All surgical endoscopies always include a diagnostic endoscopy

(3)

The Larynx

- Laryngotomy
- Laryngectomy
 Pharyngolaryngectomy
 Arytenoidectomy

- Emergency endotracheal intubation
 Change of tracheotomy tube

157

The Larynx

Endoscopy

- Use of operating microscope or telescope
 - Parenthetical statement instructs not to code the operating microscope
- Direct visualization
 - View anatomical structures via bronchoscope inserted into laryngoscope
- · Indirect visualization
 - Structures viewed in a laryngoscopic mirrored reflection

158

Trachea and Bronchi

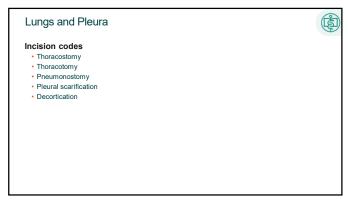

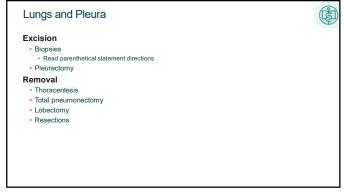

Endoscopy

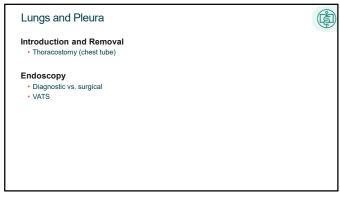

- Many bronchoscopy codes
- Use common portion of main or parent code (up to the semicolon) as the first part of each indented code descriptor under the parent code

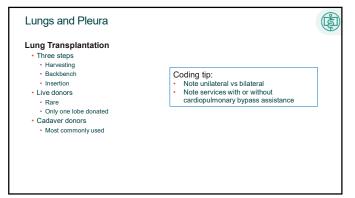

- Bronchoscopy codes
 Bronchial lung biopsies
 Foreign body removals
 Stent or catheter placements
 - Flexible or rigid scopes
 Many parenthetical statements
- 159

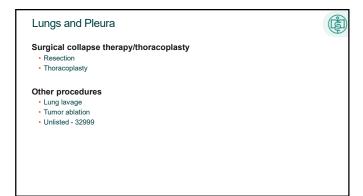

Trachea and Bronchi Excision and Repair Carinal reconstruction Needed after removal of cancer at this site Tracheal tumor excision Thoracic and intrathoracic Stenosis and anastamosis excision Injury suturing Tracheostomy scar revision

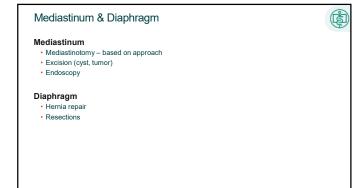

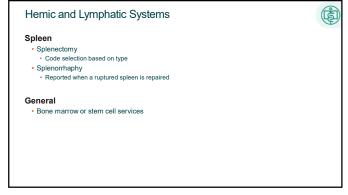

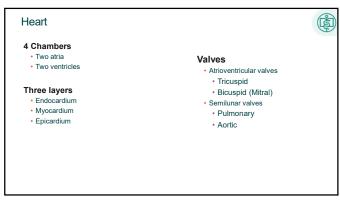

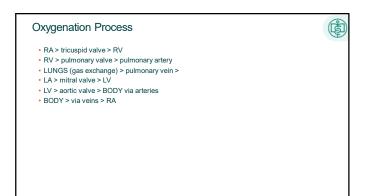

Hemic and Lymphatic Systems Lymph Nodes & Lymphatic Channels Drainage of lymph node abscess Biopsy or Excision Code selection based on method and location Lymphadenectomy Imited - removes only lymph nodes Radical - removal of lymph nodes, glands, and surrounding tissue Injection Procedures Lymphangiography

Electrical Conduction in the Heart Conduction begins in sinoatrial node of right atrium Nature's pacemaker Firing causes contraction of muscle

- Moves to atrioventricular node
 Then to Bundle of His along septum
 Then to Purkinje fibers along the surface of ventricles

172

Arteries

- Carry oxygenated blood
- Take blood away from heart to the body

Veins

- Carry deoxygenated blood
- Bring blood back to the heart from the capillary beds

Capillaries

Connect arteries and veins

173

Circulations

Pulmonary Circulation

- Pushes deoxygenated blood into the lungs
- Carbon dioxide removed and oxygen added
- Blood flows to the left atrium

Systemic Circulation

- · Blood flows from left atrium into the left ventricle
- Pumped to the body to deliver oxygen and remove carbon dioxide

ICD-10-CM Coding

- Chapter 01: Infectious and parasitic diseases
- Chapter 02: Neoplasms
- Chapter 09: Diseases of the Circulatory System
- Chapter 17: Congenital Anomalies
- Chapter 18: Signs, Symptoms and Ill-Defined Conditions

175

ICD-10-CM: Hypertension

Hypertensive Disease

- I10 Essential (primary) Hypertension
- Includes high blood pressure, arterial, benign, essential, malignant, primary, systemic
- I11 Hypertension with heart disease (presumed relationship exists between hypertension and heart disease)
- 112 Hypertensive chronic kidney disease (presumed relationship exists between hypertension and chronic kidney disease)
 113 Hypertensive heart and chronic kidney disease
- I15 Secondary Hypertension
- I16 Hypertensive Crisis

176

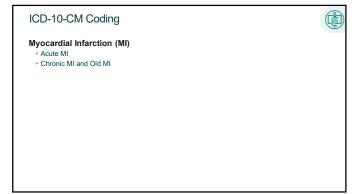

ICD-10-CM: Arteriosclerosis

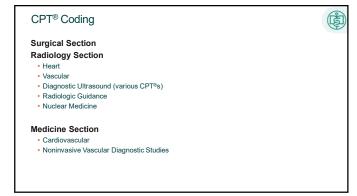

CAD of native coronary artery (I25.10)

- The patient is not a heart transplant
- The patient has CAD with no history of CABG
- The patient had a prior PTCA of native coronary artery and the patient is admitted with re-occlusion of this lesion

Endocarditis Heart Failure Pericarditis Peripheral Arterial Disease (PAD) Valve Disorders Myocardial Infarction (MI) Acute MI Chronic MI and Old MI

Pacemakers/Defibrillators

- Pacemaker System
- Pacing cardioverter-defibrillator system
- To code these procedures, you need to know:
- Type of system

- Type of system
 Whether the placement is temporary or permanent
 Whether the device is single, dual, multiple leads, or leadless
 Placement of electrodes (transvenous, endoscopic for epicardial placement, epicardial, coronary sinus)
 The procedure performed (removal, replacement, insertion)
 Components removed, replaced, or inserted (pulse generator, leads)

 (All at once or individually)

181

Pacemakers/Defibrillators

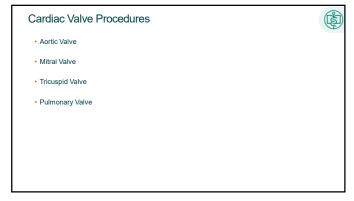

- Type of pacemaker
 - Permanent
- Temporary
- Type of procedure
- Initial
 Removal
- Conversion
- · Amount of leads
- Placement
- Transvenously
 Epicardially
- Approach
- Open
 Endoscopic

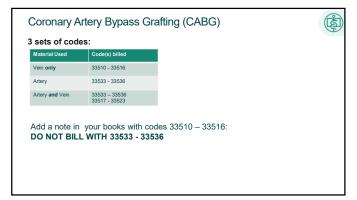

182

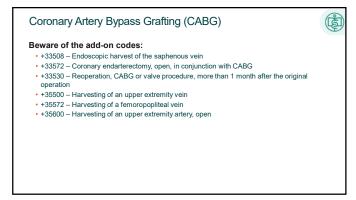

Subcutaneous Cardiac Rhythm Monitor and Implantable Hemodynamic Monitors

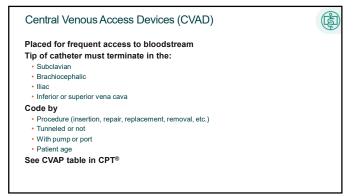

- Implantable loop recorder (ILR) –an event recorder that is activated by irregular cardiac activity.
- Wireless pressure sensor for hemodynamic monitoring sensor is placed in the pulmonary artery via a right heart catheterization.

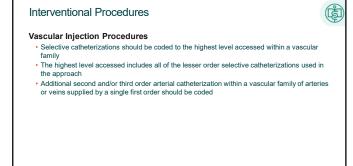

Bypass Grafts Non-coronary vessels Vein In-situ vein Vein is left in native location Other than vein Code by type/location

CPT®: Cardiovascular

Hemodialysis (36800-36815)

Portal Decompression (37140-37183)

- Treat hypertension/occlusion of portal vein
 TIPS (37182, 37183) diverts blood from the portal vein to the hepatic vein

Transcatheter Procedures

- · Removal of clot
- Arterial (37184-37186)
 Venous (37187-37188)

- Other (37191-37216)
 Foreign body retrieval, stent placement, etc.

190

Endovascular Revascularization

Treat occlusive disease in lower extremities

Three territories

- · Iliac (common iliac, internal iliac and external iliac)
- Femoral/Popliteal (considered a SINGLE territory)
- Tibial/Peroneal (anterior tibial, posterior tibial, peroneal arteries)

Codes arranged in a hierarchy for each territory

- stent placement with atherectomy (highest)
- stent placement
- atherectomy
- angioplasty (lowest)

191

Bundled into Endovascular Revascularization

- Vascular access
- Catheter placement
- Traversing the lesion
 Imaging related to the intervention (previously billed as the supervision and interpretation code for the specific intervention)
- Use of an embolic protection device (EPD)
 Imaging for closure device placement
- Closure of the access site

Radiology Vascular Procedures Diagnostic angiography

- Sometimes separately reportable
- Diagnostic angiography performed at a separate setting from an interventional procedure is separately reportable
- Diagnostic angiography performed at the time of an interventional procedure is NOT separately reportable if it is specifically included in the interventional code descriptor

193

CPT®: Cardiovascular Medicine Section

- Therapeutic services and procedures
- Cardiography
- Cardiovascular monitoring services
- Implantable wearable cardiac device evaluations
- Echocardiography
- Cardiac Catheterizations
- Intracardiac Electrophysiological Procedures/Studies
- Peripheral Arterial Disease Rehabilitation
- Noninvasive physiologic studies and procedures
 Other procedures

194

Percutaneous Coronary Interventions

Major coronary arteries:

- Left circumflex (LC) and its marginal branches
- Left anterior descending (LD) and its diagonal branches
- Right coronary (RC) and the posteriolateral and posterior descending branches
- All interventions MUST identify the artery, or its branch being touched using modifiers LC, LD, RC

Percutaneous Coronary Interventions

- Each branch (LD, LC, RC) is reported as its OWN intervention

196

ECG and Stress Testing

- Codes for ECG and Stress Testing include professional and technical concepts already
 TC and 26 modifiers are NOT needed to properly report the providers' service

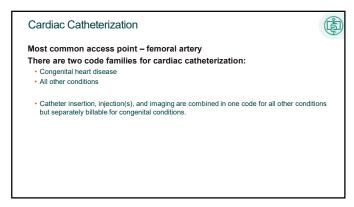

Technical Component	Professional Component	
Machine ownership Technician cost Overhead Supplies used	Supervision of test Interpretation and reporting of results	

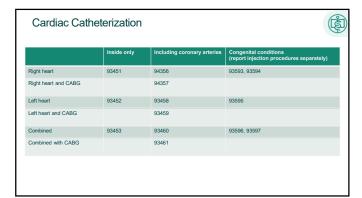

197

ECG and Stress Testing

	ECG routine with at least 12 leads	CV Stress Test	Rhythm ECG, 1-3 leads
Global (Tech and Professional)	93000	93015	93040
Supervision Only		93016	
Technical Only	93005	93017	93041
Professional Only	93010	93018	93042

(3) Digestive System Lips Vermilionectomy Cheiloplasty Mouth VestibuloplastyGlossectomy Palatoplasty 211 Digestive System Pharynx, Adenoids and Tonsils Tonsillectomy Adenoidectomy • Biopsy PharyngoplastyPharyngostomy Esophagus 212 Esophagoscopy Esophagoscopy is direct visualization of the esophagus only Can be performed multiple ways. Pay attention to the parent codes: Rigid transoral Flexible transnasal Flexible transoral • Pay attention to the service performed (biopsy, foreign body removal, injection, etc.)

Esophagogastroduodenoscopy (EGD)

- EGD includes visualization of the esophagus, stomach and proximal duodenum or jejunum

- Also known as an Upper GI exam
 Many parenthetical statements
 If duodenum/jejunum is not examined:
 Report with modifier 52 if repeat exam is not planned
 Report with modifier 53 if repeat exam is planned

214

Endoscopic Retrograde Cholangiopancreatography

- Visualization of the biliary or pancreatic duct systems
 Considered complete if one or more of the ductal system(s) is visualized
 Many guidelines to review

215

Digestive System

Stomach

- Gastrectomy
 Bariatric and Gastric Bypass
- Endoscopic procedures

(3) Gastric Bypass Treatments for morbid obesity include bariatric surgery and gastric bypass. Procedures include: Banding Laparoscopic gastric restriction Open gastric restrictive procedures Gastric bypass

217

Digestive System

Intestines (except rectum)

- Incision
- Enterolysis
 Exploratory procedures
- Endoscopic
 Small intestines
- Seyond the second portion of the duodenum and stomal endoscopy
 Colonoscopies
 Enterostomy

218

Digestive System

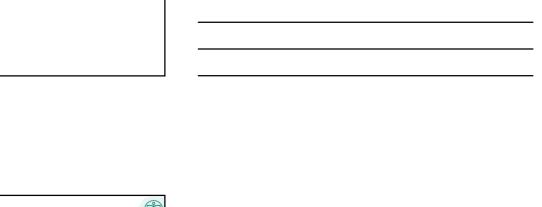

Rectum

drainage of abscesses

 Signs/Symptoms

231

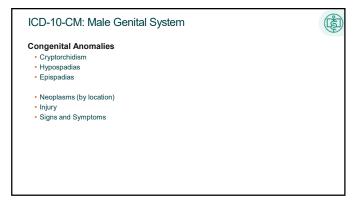

ICD-10-CM: Male Genital System • BPH Hyperplasia Prostatitis • PSA • Dysplasia PIN III PIN I or II 232

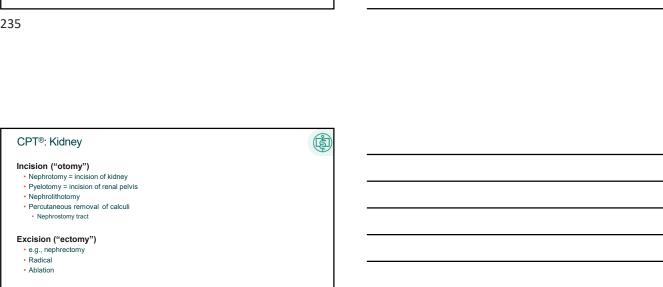

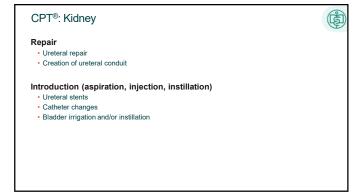

233

CPT®: Urinary Arranged by location/procedure type Incision, excision, repair, etc. Bilateral vs. Unilateral Operating Microscope (69990) may be separate Surgical endoscopy always includes diagnostic endoscope

Kidney Abscess

- Treatment for renal abscess or renal stone extraction may require a nephrostomy tube to be placed.
- Often performed under CT guidance.

- Report radiological guidance separately.

 Percutaneous removal of stones is coded by the size of the stone

 Usually under fluoroscopic guidance and via existing nephrostomy tube/tract.

 If no existing tube/tract, a nephrostomy tract must be created and reported

238

CPT®: Urinary

Laparoscopy

Code by procedure

Endoscopy

Performed through natural or created opening

Other Procedures of Kidney

- Renal Transplantation
 Lithotripsy
 Percutaneous ablation of renal tumors
- Cryotherapy for renal tumors

Urodynamics

239

CPT®: Male Genital System

- Penis
- Incision

- Ovaries

244

ICD-10-CM: Female Genital System

- Chapter 14: Disease of the Genitourinary System
- Chapter 15: Complications of Pregnancy, Childbirth, and the Puerperium
 Chapter 2: Neoplasms
- Chapter 21: Z Codes

245

ICD-10-CM: Female Genital System

Female Genitourinary System

Complications of Pregnancy, Childbirth, and the Puerperium

- Have sequencing priority
 Report any condition that affects pregnancy (labor, delivery, post-partum)
 If pregnancy is incidental to condition treated, report Z33.1 as secondary code
- Must document that condition treated does not affect pregnancy
- Only for mother, not newborn

ICD-10-CM: Female Genital System Routine outpatient prenatal visits w/o complication First pregnancy · Subsequent pregnancy First-listed diagnosis Not to be used with other Chapter 15 Codes High-risk Pregnancy Code from category O09 First-listed diagnosis May be reported with other Chapter 15 codes 247 CPT®: Female Genital System Surgery Arranged by anatomy "outside to inside" Terms used to describe external female genitalia Perineum Vulva Pudenda Consider terminology to determine procedure • -ectomy = removal • etc. 248 (3) CPT®: Female Genital System Vulva Vagina • 57022 - Only CPT® code related to obstetrical complications NOT in labor/delivery section Cervix Uteri Os = opening of cervix

Vaginectomy

Surgical removal of all or part of the vagina.

- Depth of tissue removed:
- Simple removal of skin and superficial subcutaneous tissue
 Radical removal of skin and deep subcutaneous tissue
- Area of tissue removed:
- Partial Removal of less than 80% of the vulvar area
 Complete Removal of more than 80% of the vulvar area

250

D&C

- D&C is a surgical procedure in which the cervix is dilated, and the uterine lining is scraped.
- The service can be either diagnostic or therapeutic:

 58120 Dilation and curettage, diagnostic and/or therapeutic (nonobstetrical)

251

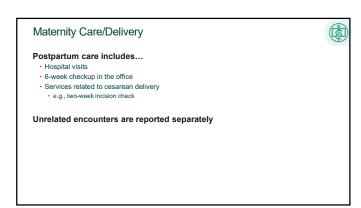

Hysterectomy

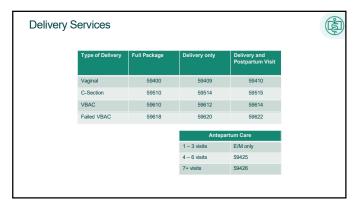

There are multiple codes to report hysterectomy.

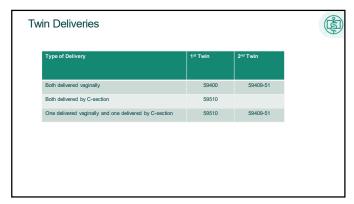

- Approach abdominal (open), vaginal, laparoscopic
- With or without tubes (salpingectomy)
- With or without ovaries (oophorectomy)
- With or without total or partial vaginectomy
- \bullet Based on size of the uterus less than or greater than 250 g

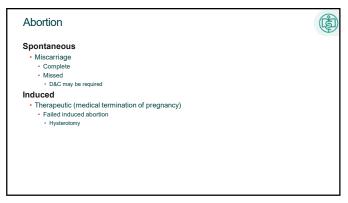

Maternity Care/Delivery Antepartum care Initial visit during pregnancy Ongoing visits during pregnancy Average of 13 visits (global OB package) OB package includes... Antenatal care Delivery Episiotomy and repair Postpartum care

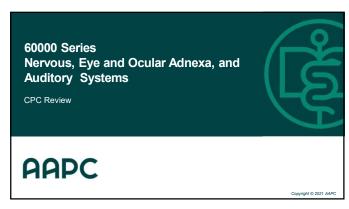

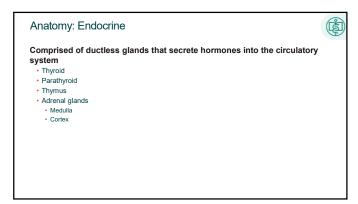

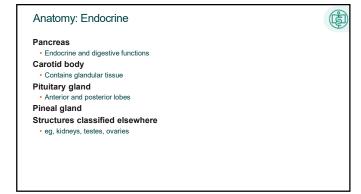

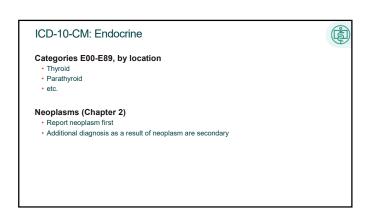

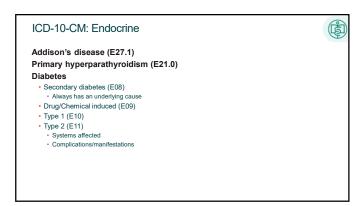

Anatomy: Nervous System Comprised of two components Brain Spinal Cord • PNS Nerves running throughout the body 262 Anatomy: Nervous System Nerve Plexi Cervical · Head, neck, shoulders Brachial · Chest, shoulders, arms, hands Lumbar • Back, abdomen, groin, thighs, knees, calves Sacral • Pelvis, buttocks, genitals, thighs, calves, feet Solar (Coccygeal) Internal organs

263

Anatomy: Nervous System Spinal cord functions: Motor information to muscles Sensory information to brain Reflex coordination Segment (bone) vs. interspace (space between) Segments (Body, Lamina, Process [Spinous, Transverse], Foramen) Facet joints One per side, where segments meet

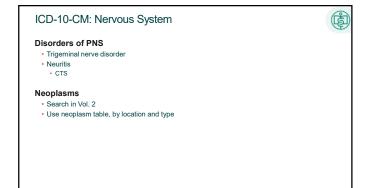

Anatomy: Nervous System The Brain Frontal lobe Cerebrum Two temporal lobes Parietal lobes Primary sensory cortex Cerebellum Brainstem Ventricles

Inflammation • Meningitis (lining of brain/spinal cord) • Encephalitis (brain) • Myelitis (spinal cord) • Encephalomyelitis (brain and spinal cord) Sleep disorders Hereditary/degenerative disease of CNS • Report underlying disease when instructed

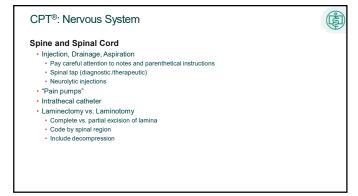

ICD-10-CM: Nervous System Pain (NEC) (G89) • Pain control is reason for visit • Do not report as primary if you know the underlying cause, and visit is to manage that diagnosis • Acute vs. Chronic Disorders of CNS • Migraine (G43) • Status migrainosus • Aura • Intractable

Thyroid Gland Excision Concepts include: Partial or total removal Contralateral (opposite side) Malignancy Approach 271 CPT®: Endocrine • Parathyroid, Thymus, Adrenals, Pancreas Endocrinology – Medicine section 272 CPT®: Nervous System Skull, Meninges, and Brain Twist drill • Burr holes Trephine Craniectomy/craniotomy Skull base surgery Approach Definitive procedure Repair/reconstruction Endovascular therapy • Balloons or stents to treat arterial disease

CPT®: Nervous System AV malformation Simple vs. complex Intracranial aneurysm Simple vs. complex Other techniques Anastomosis to bypass aneurysm Stereotaxis/Radiosurgery Lesion treatment

CPT®: Nervous System Cranial neurostimulators • Pulse generator • Electrodes • eg, for Parkinson's, epilepsy Repair of skull • Skull fracture • Encephalocele

Laminotomy (Hemilaminectomy) vs Laminectomy • Laminotomy is also known as a Hemilaminectomy. Removal of % of the lamina from one side of a vertebra. • Laminectomy is a complete removal of the lamina on both sides of the vertebra which also results in the removal of the spinous process. • Purpose is decompression of the spinal cord and/or spinal root.

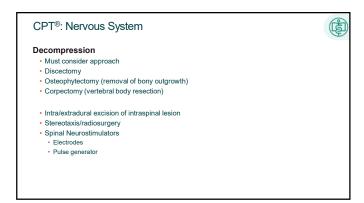

278

Coding concepts include:

Segments vs Interspaces
 Number

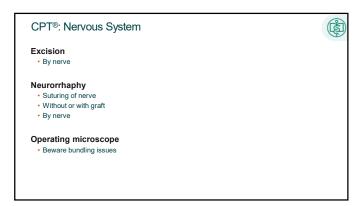

Anatomical site (cervical, thoracic, lumbar)

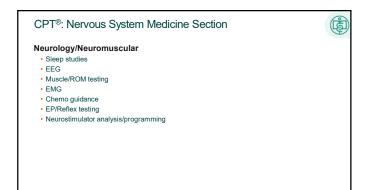

Approach (percutaneous, endoscopic, open)

CPT®: Nervous System Extracranial nerves, PNS, Autonomic • 12 pair cranial nerves • 31 pair spinal nerves Autonomic ganglia/plexi PNS Somatic nerves Autonomic nerves Sympathetic and parasympathetic 280 CPT®: Nervous System **Facet Joint injections** Nerve block Unilateral Focus on "joint" between vertebrae Nerve "destruction" Somatic or sympathetic nerve Number of levels If infused, duration 281 CPT®: Nervous System Injection of sympathetic nerves **Peripheral Neurostimulators** • surface or percutaneous Destruction by neurolytic agent Neuroplasty • Freeing of nerves from scar tissue Transection/avulsion (divide/tear away)

Neuroplasty Neuroplasty is the surgical repair nerve tissue Anatomical site is the key concept. For nerve grafts, location and size of the graft are key coding concepts.

(3) Anatomy: Eye and Ocular Adnexa Eyeball Cornea Pupil and Iris Choroid – vascular layer • Retina – pigmented nerve layer Optic nerve and Optic disc

286

Anatomy: Ear and Auditory System

Middle ear

- Tympanic membrane
- Ossicles malleus, incus, stapes
- Eustachian tube

Inner ear

- Labyrinth
- Membranous labyrinth hair cells
- Vibrations into nerve impulse
- Cochlea, vestibule, semicircular canal
- Balance utricle, saccule
 Oval window, round window

287

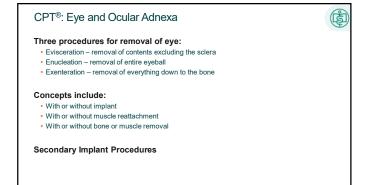

ICD-10-CM: Sense Organs

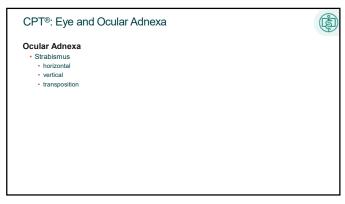

- Chapter 7: Diseases of the Eye and Adnexa
 Chapter 8: Diseases of the Ear and Mastoid Process
- Chapter 2: Neoplasms

Eye and Ocular Adnexa Infection and Inflammation Neoplastic disease Injury Glaucoma Cataracts Retinopathy Retinal detachment Strabismus

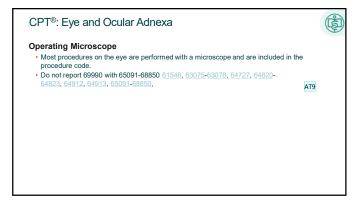

(3) CPT®: Eye and Ocular Adnexa Intraocular Lens Procedures (IOL) Cataract removal with IOL Intracapsular Extracapsular IOL exchange 292

293

Corrected based on CPT guidelines Annette Telafor, 9/15/2021 AT9

CPT®: Eye and Ocular Adnexa Medicine Section Special Ophthalmological Services New patient vs established patient Contact lens fittings Ophthalmoscopy • Fitting of glasses 295 CPT®: Auditory System **Auditory System** • Removal foreign body from external auditory canal - both ears 296 CPT®: Auditory System Middle Ear Tympanostomy Mastoidectomy; complete -modified radical -radical

(3) CPT®: Auditory System Tympanoplasty Tympanoplasty is the surgical reconstruction or repair of the tympanic membrane (ear drum) • Surgery can be done under either local or general anesthesia. Can be done: without mastoidectomy, with antrotomy/mastoidotomy (cutting into the mastoid bone) or with mastoidectomy (removal of the mastoid bone) with or without ossicular chain (hammer, anvil, stirrup) reconstruction 298 CPT®: Auditory System Inner Ear Labyrinthectomy • Temporal Bone, Middle Fossa Approach Microsurgery 299 CPT®: Auditory System Medicine Section Special Otorhinolaryngologic Services Otolaryngologic examination under general anesthesia Vestibular Function Tests Audiologic Function Tests with Medical Diagnostic Evaluation

301

Radiologic Projections

- Oblique slanting, neither frontal or lateral
- Lateral side view, X-ray beam travels through the side of the body
 Anteroposterior X-ray beam enters the body through the front and exits through the back
 Posteroanterior X-ray beam enters the body through the back and exits through the front
 Cone focused or spot view

302

Additional Terms

- Proximal closer to the point of attachment to the body
 Distal away from the point of attachment to the body
- Flexion bendingExtension straightening

Diagnosis Coding

- Code the definitive diagnosis
- Code signs and symptoms if no definitive diagnosis is available
 Diagnostic tests

- Diagnostic tests
 Code sign or symptom that prompted the test
 Do not code questionable, rule out, or probably diagnoses
 Routine radiology
 Z01.89 Radiological examination, NEC

304

CPT® Subsections

- Diagnostic Radiology (Diagnostic Imaging)
- Diagnostic Ultrasound
 Radiologic Guidance
 Breast, Mammography

- Bone/Joint Studies
- · Radiation Oncology
- Nuclear Medicine

305

Guidelines

Supervision and Interpretation (S & I)

- Interventional radiologic procedures
- Report two codes:
 Surgical code; or code from the medicine section
 Radiologic supervision and interpretation

Administration of Contrast Material

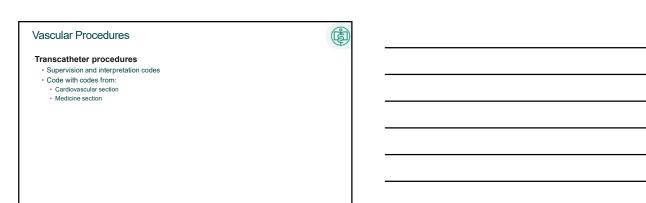

- Contrast material administered intravascularly, intra-articularly, or intrathecally
- Oral and/or rectal contrast does not qualify

Modifiers **Technical Component (TC)** • Equipment Overhead SuppliesRoom • Gowns Professional Component (26) Reading and interpretation 307 Diagnostic Radiology (Diagnostic Imaging) Anatomical organization Radiologic procedures include: Standard X-rays • MRIs • CTs 308 Diagnostic Radiology (Diagnostic Imaging) Code Selection: · Anatomical location Type of procedure Number of views • Type of view (AP, PA, etc.) Laterality (unilateral, bilateral)Contrast material Coding Tip Underline or highlight the anatomy · Highlight the number of views Highlight or circle with/without contrast

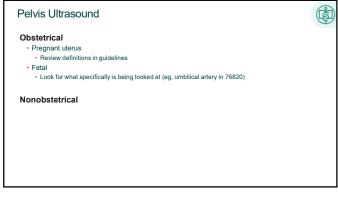

(3) Heart - Subsection Guidelines Heart • Stress Cause the heart to work harder Cardiac MRI Physiologic evaluation of the cardiac function Velocity flow mapping Cardiac CT · Coronary calcium Congenital heart disease 310 Vascular Procedures - Subsection Guidelines Aorta and arteries Aortography – imaging of aorta and branches Angiography – imaging of arteries Veins and lymphatics Lymphangiography – visualization of lymphatics Splenoportography – injection of contrast into the spleen to visualize the port vessel of the portal circulation

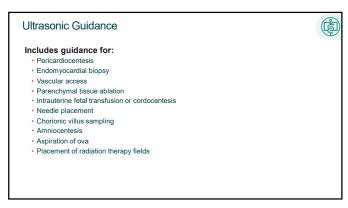

311

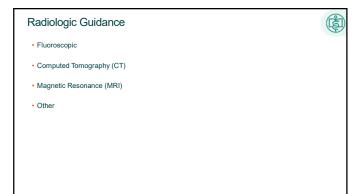

• Venography – imaging of veins

(3) Diagnostic Ultrasound High frequency sound waves to look at organs and other structures inside the body Used to view: • Heart Blood vessels KidneysOther organs • Fetus (during pregnancy) 313 Diagnostic Ultrasound Required: Permanently recorded images with measurements Final written report for the patient's medical record • Exception – biometric measure 314 (3) Diagnostic Ultrasound Anatomic regions Complete – each element listed in parenthesis within the code description • Limited – reported if less than complete is performed Not reported together Definitions · A-mode • M-mode • B-scan • Real-time scan

Breast, Mammography

- Mammary ductogram or galactogram
- Digital Breast Tomosynthesis
- Mammography
- Screening
 Diagnostic

319

Bone/Joint Studies

- Bone age studies
- Bone length studies
- Osseous survey
- Joint survey
- Bone mineral density studies
- Bone marrow blood supply

320

Radiation Oncology

- Consultation: Clinical Management
- Clinical Treatment Planning
- Medical Radiation Physics, Dosimetry, Treatment Devices, and Special Services
 Stereotactic Radiation Treatment Delivery
- Other Procedures
- Radiation Treatment Delivery
- Neutron Beam Treatment Delivery
- Radiation Treatment Management Proton Beam Treatment Delivery
- Hyperthermia
- Clinical Intracavitary Hyperthermia
- Clinical Brachytherapy

Radiation Oncology Treatment

- Radiation treatment is reported in units of 5 fractions or treatment sessions.
- "Code 77427 is ... reported if there are three or four fractions beyond a multiple of five at the
 end of a course of treatment; one or two fractions beyond a multiple of five at the end of a
 course of treatment are not reported separately."

322

Radiation Oncology Treatment

- Reduced services modifier is NOT necessary
- Code for the number of fractions or treatments the patient had during the months

323

Nuclear Medicine

Diagnostic - Use of small amounts of radioactive material to examine organ function

- Thyroid function (Endocrine System)
- Renal (Gastrointestinal System)
- Bone (Musculoskeletal System)
- Heart (Cardiovascular System)
- Brain (Nervous System)

Therapeutic – uses radioactive material to treat cancer and other medical conditions affecting the thyroid gland

Nuclear Medicine

Provide metabolic and functional information of the body unlike CT and MRI

- PET scans create computerized images of chemical changes within the organ or tissue
- SPECT scans use radioactive tracers and a scanner to record data that a computer constructs into 2D or 3D images. SPECT can give detailed images of blood flow to tissues in the body.
- Planar studies are flat images of a 2D object (think xray)
- Tomographic studies create 3D images of 2D objects

325

326

Regulatory Terms Clinical Laboratory Improvement Amendment (CLIA) CMS issues a waiver Approximately 80 tests Little risk of error For more info, see https://www.cms.hhs.gov/CLIA/10_Categorization_of_Tests.asp Advance Beneficiary Notice (ABN) Non-covered laboratory tests Patient is responsible for payment For more info., Web search "CMS-R-131"

Corrected link to https (instead of just http) Annette Telafor, 9/15/2021 AT10

Modifiers

90 Reference or Outside Laboratory

Billed by physician but performed by an outside laboratory

91 Repeat clinical diagnostic lab test

- Same test same day
 Not used if due to error
- Not used if there is a better code for a series of tests

92 Alternative laboratory platform testing

- Portable test kit
 Single use disposable chamber
- 99 Multiple modifiers

328

Organ or Disease-Oriented Panels

- Group of test commonly ordered together

- All test in the panel must be performed
 Additional tests can be coded also
 Some panels are included in other panels and should not be coded separately
- Be on the look out for "or" "and"

329

Definitions

Qualitative

· What is present

Quantitative

· How much is present

Presumptive Drug Class Screening

Presumptive Drug Test
• used to identify the use or non-use of a drug

331

Definitive Drug Testing

Definitive Drug

- Qualitative positive/negative, present/absent
- Quantitative amount or quantity present

332

Therapeutic Drug Assays

- Quantitative tests for drugs given for therapeutic purposes
 Can become toxic or too low for therapeutic benefit
 Measures specific drugs at specific intervals to determine if there is an appropriate and constant level of drug in the patient's system

Evocative Suppression Testing

- Baseline and subsequent measurement
- Supplies and drug billed separately
- Physician attendance
 Use Prolonged care codes
- Prolonged infusion codes from Medicine section

334

Clinical Pathology Consultations

- Requested by attending physician
- Rendered by pathologist
- Written report provided
 Patient not present

- Lab test
 Specimen
 Slide
- Limited no patient history or medical records Comprehensive – complex problem with history and records

335

Urinalysis

- Urinalysis evaluates a sample of urine for the presence of disease, drugs, metabolites, etc.
- Done by a variety of methods.
- Care should be taken when selecting codes:
- Automated vs non-automated
 With or without microscopy

- Intention (pregnancy test, volume measurement, etc. ...)
 Usually covered under CLIA waived labs

Chemistry • Material may be from any source (blood, sweat, urine, saliva, feces) unless otherwise specified Exams are qualitative unless specified When one analyte is measured from different sources or from specimens taken at different times, each can be separately reported.

337

Laboratory Tests

Hematology and Coagulation

- Immunology
- Microbiology
- Anatomic Pathology
 Gross examination only
 - Gross and microscopic exam
 - LimitedForensic
- These are further divided:
- With brain
 With brain and spinal cord
- Infant

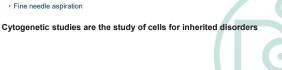

338

Cytopathology

Study of cells for disease

Obtained by several methods

- Washing or brushing
- Smears

Most Common

Cytology

- Cytology is the examination of cells from the body under a microscope.
- Bethesda vs non-Bethesda
 - Bethesda reporting allows for uniform reporting of results
 Samples of Bethesda reporting:
 - ASC
 ASC-US
 ASC-H
 LSIL
 HSIL

340

Surgical Pathology

Specimen - tissue sample

• Has to be separately identifiable

Divided into levels of progressive complexity

- Level I gross
 Level II-VI gross and microscopic

Additional codes for special stains

341

Most Common

Surgical Pathology

- Levels of surgical pathology give specific examples of tissue inspected and reason
 88305 Level IV Uterus, w or wo tubes and ovaries, for prolapse
 88307 Level V Uterus, w or wo tubes and ovaries, other than
 neoplastic/prolapse
 88309 Level VI Uterus, w or wo tubes and ovaries, neoplastic

Pathology Consultation

Four types of consultations:

- Report on prepared slides
- Report on tissue requiring prep of slides
 Review records and specimen
- Consultation during surgery

 - Frozen sections
 Cytology examination

343

344

Organization of Codes

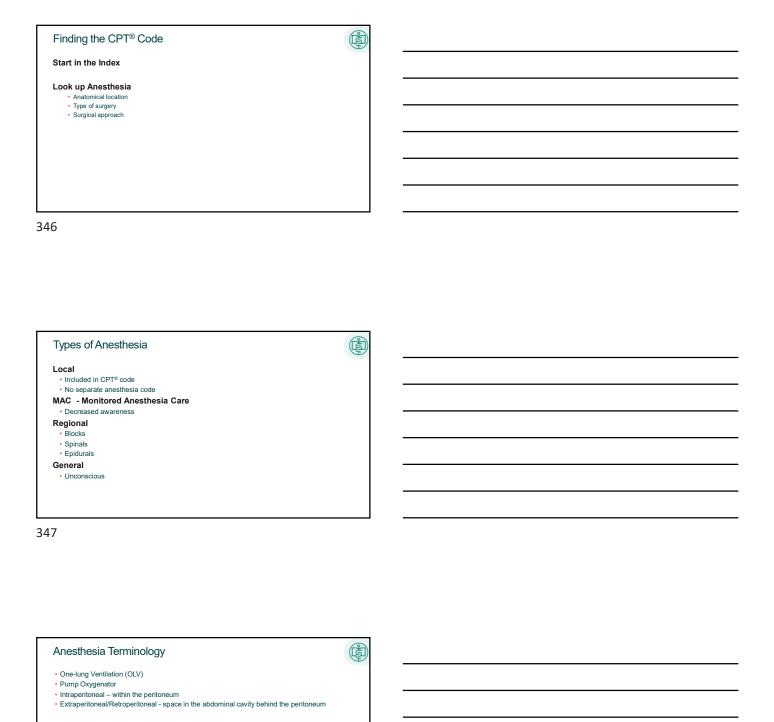

Organized by anatomical location

- Neck
- Thorax
- Intrathoracic

- Pelvis

- Lower Leg
- Shoulder and Axilla

Intraperitoneal vs Extraperitoneal Organs Intraperitoneal – within the peritoneum

- Upper abdomen stomach, liver, gallbladder, spleen, jejunum, ascending and transverse
- · Lower abdomen appendix, cecum, ileum and sigmoid colon

Extraperitoneal/Retroperitoneal - space in the abdominal cavity behind or outside the peritoneal cavity

- Upper abdomen kidneys and adrenal glands and lower esophagus
- Lower abdomen ureter and urinary tract
- Other aorta and inferior vena cava

349

Anesthesia Guidelines

Services included with the anesthesia code:

- Preoperative visits
- Postoperative visits
- Anesthesia during the procedure
- · Administration of fluids/blood
- Usual monitoring
 Unusual forms include CVP, Arterial line insertion, and Swanz-Ganz and are coded separately

350

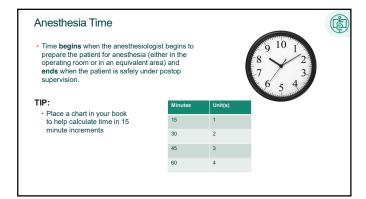

Anesthesia Fees

Base Units + Time Units + Modifying Factors = Total Anesthesia Units

Total Units * Conversion Factor = Anesthesia Fee

- Time is usually calculated in 15-minute increments unless payor contract says differently.
- Qualifying Factors are not billable to MEDICARE.

352

Physical Status Modifiers

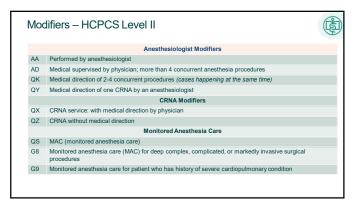

- Assigned by the anesthesia provider
- Coder needs to look for a diagnosis to report it
- Documented in anesthesia record
- P1 normal healthy
- P2 mild systemic disease
- P3 severe systemic disease 1 unit
- P4 constant threat to patient's life 2 units
- P5 not expected to survive w/o surgery 3 units
- P6 declared brain-dead patient

353

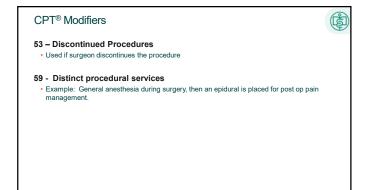

Qualifying Circumstances

- + 99100 under 1 or over 70 years of age Additional 1 unit
- + 99116 anesthesia complicated by hypothermia Additional 5 units
- + 99135 anesthesia complicated by controlled hypotension Additional 5 units
- + 99140 anesthesia complicated by emergency Additional 2 units

 $\begin{tabular}{ll} \textbf{Coding Tip -} Watch parenthetical statements below the anesthesia CPT codes to determine when these codes are NOT billable. \end{tabular}$

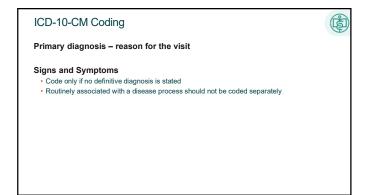

Coding Concepts Multiple Surgeries Only one anesthesia code is selected Exception – anesthesia add-on codes Example: +01968 Anesthesia for cesarean delivery following neuraxial labor analgesia/anesthesia Report most extensive or most complex Use total anesthesia time for all procedures

Coding Concepts Additional Anesthesia Modifiers 23 – Unusual Anesthesia 53 – Discontinued Procedure 73 – Discontinued Procedure prior to anesthesia administration 74 – Discontinued Procedure after to anesthesia administration

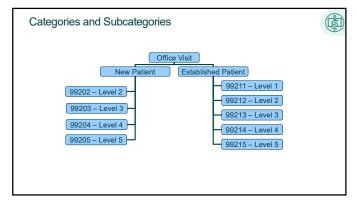

CPT® Coding

- Select the category or subcategory of service and review the guidelines;
- Review the level of E/M service descriptors and examples;
- Determine the level of history;
- Determine the level of exam;
- Determine the level of medical decision making; and
- Select the appropriate level of E/M service.

361

362

New vs. Established Patients

New Patien

 Patient who has not received any professional services from the physician/qualified health care professional or another physician qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice within the past 3 years.

Established Patient

Patient who HAS received services in the past 3 years

New vs. Established Patients If a physician/qualified health care professional is on call or covering for another physician/qualified health care professional, the patient's encounter will be classified as it would have been by the provider who is not available. 364 Office or Other Outpatient Services · Provided in the physician's office or other outpatient clinic or ambulatory facility New patient · Established patient 365 Observation **Hospital Observation Services** Patient's designated or admitted to observation status in the hospital No CPT® guideline on length of observation stay **Observation Care Discharge Services** If discharge is on date other than date admitted to observation Initial Observation Care The date the patient is admitted to observation **Subsequent Observation Care** • Patient is seen on a date other than the date of admit or discharge to observation

Observation Observation care is classified by whether the patient was seen and released on the same calendar day or not. Admitted / Discharged DIFFERENT DATES SAME DAY Initial date 99216, 99219 or 99220 99234, 99235 or 99236 Subsequent date 99224, 99225 or 99226 n/a Discharge date 99217 n/a

367

Hospital Inpatient Services

- Codes used for inpatient facility and partial hospitalization
- Use codes 99234-99236 for admit/discharge on same date
- Subsequent hospital care codes used for subsequent visits while admitted
 - Includes reviewing medical record, test results, etc.

368

Hospital Inpatient Services

- Initial Hospital care is reported by the admitting physician on the first date of inpatient hospital care.
- For Medicare patients, these codes are also used by ALL providers who provide initial consultation services.
- The admitting physician is identified with modifier AI.

Hospital Discharge Services

- Codes are based on time
- Includes time spent with the final exam, paperwork, writing prescriptions, talking with patient's family, etc.

- Parenthetical notes
 How to code for concurrent care on the discharge date
 Discharge of a Newborn see code 99238 or 99463

370

Consultations

Consultations

Service provided by a physician whose opinion or advice regarding evaluation and/or management of a specific problem is requested by another physician or appropriate source

Divided by location

Three Rs to meet consultation criteria

371

Consultations

Medicare:

- Office Consultations
- · Report with new and established patient codes
- Inpatient Consultations
 Report with initial hospital care codes for the first encounter regardless if performed by the admitting physician.
 - Use Modifier AI for the Principal Physician of Record

Emergency Department

- Does not distinguish between new/established
- Facility must be hospital-based and available 24 hours a day, 7 days a week
- Physician direction of EMS emergency care, advanced life support

373

Critical Care Services

- Critical care is dependent on patient status, not patient location.
- "A critical illness or injury acutely impairs one or more vital organ systems such that there is a high probability of imminent or life-threatening deterioration in the patient's condition."
- Time based service
- Some services are included in critical care. Pay close attention to the list of services in the Critical Care guidelines.
- Any service NOT listed in the guidelines CAN be billed separately.
 The time for performing these carved out services is not included in critical care.

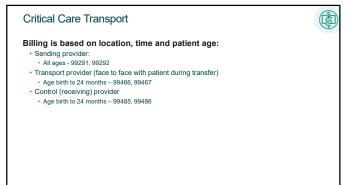

374

Critical Care Services

- Services provided in a critical care unit to a patient who is not considered critically ill are reported with other E/M codes.
- Guidelines contain instructions for coding
- Pediatric Critical Care
- · Neonatal Critical Care
- Critical Care and other E/M services may be coded on same date by the same provider.

Critical Care Services Billing is based on location, time and patient age: Inpatient Birth to 28 days – billed per day – 99468, 99469 29 days to 24 months – billed per day – 99471, 99472 2 years to 5 years – billed per day – 99475, 99476 6 years and older – billed by minutes – 99291, 99292 Outpatient Any age - 99291, 99292

(3) Domiciliary, Rest Home, or Custodial Care Services Also includes Assisted Living Physician see patient in one of these types of facilities No medical component • Either new patient or established patient 379 Domiciliary, Rest Home, or Home Care Plan Oversight Services • Physician provides oversight of the patient's care plan Review the case management plan · Write new orders • Make a new care plan 380 Home Services & Prolonged Services Home Services Seen in home by physician Home may be private residence, temporary lodging, or short-term accommodation Separated by new and established patient **Prolonged Services** Direct patient contact or without direct patient contact Settings are office/outpatient and inpatient Most are add-on codes

(3) Standby Services • Used to report time when a provider is on standby at the request of another provider Only report for more than 30 minutes duration Reported with additional units for each additional 30 minutes Output Description: • Do not report if the period of standby results in the performance of a procedure 382

Case Management & Medical Team Conference

Case Management Services

Anticoagulant Management - Deleted

Medical Team Conference

- Requires three healthcare professionals
 Divided by direct contact or without direct contact

383

Care Plan Oversight Services

- Home Health Agency
- Hospice

- Nursing Facility
 Billed on a monthly basis
 For the amount of time physician spends overseeing care of patient

1	\sim	
~	×	/I

Preventive Medicine Services

- Two sets of codes: new or established
- For patients who are not ill, but to prevent future illness
- Extent of service will depend on patient age and risk factors
 If a problem is encountered that is significant to require additional work beyond that of the preventative visit, the appropriate office/outpatient code (99202-99215) should be billed with modifier 25 added.

385

Counseling Risk Factor Reduction and Behavior Change Intervention

- · For patient without symptoms or established illness
- No distinction between new and established patient
- Preventive Medicine, Individual Counseling
- Behavior Change Intervention
- Preventive Medicine, Group Counseling

386

Non-Face-to-Face Physician Services

Telephone Services

- Must be provided by a physician
- Based on amount of time
- · Patient must be established

On-Line Medical Evaluation

- Reported only once for the same episode of care during a 7-day period
- Must be provided by a physician

Special E & M Services Basic Life and/or Disability Evaluation Services Work Related or Medical Disability Evaluation Services Specific guidelines under each code 388 Newborn Care Services Newborn Care Services Newborn care age 28 days or less Separated by location and by initial or subsequent visits Delivery or Birthing Room Attendance and Resuscitation Services Attendance at delivery at request of delivering physician 389 Inpatient Neonatal Intensive Care Pediatric & Neonatal Critical Care Pediatric Critical Care Patient Transport Inpatient Neonatal and Pediatric Critical Care • Initial and Continuing Intensive Care Services

(3) Inpatient Neonatal and Pediatric Critical Care Services Defined by age of patient: Neonates 28 days of age or less • Infant or young child 29 days through 24 months of age Young child two through five years of age 391 Initial and Continuing Intensive Care Services • Used to report services to a child who is not critically ill – but requires intensive observation and frequent interventions • 99477 used for Initial Hospital Care • 99478-99480 used for Subsequent Intensive Care Code selection based on the present body weight of the child 392 Chronic and Complex Chronic Care Coordination • 2 or more chronic illnesses requiring coordination of care among multiple disciplines \bullet Reported by the provider overseeing the care plan and coordination Reported only once per monthCode selection · Time spent overseeing Whether a face-to-face encounter occurs

Advance Care Planning

- Advance Care Planning codes report face-to-face discussion of advance directives

(3) E/M Leveling Three Key Components History Medical Decision Making Generally the influential factors in determining level of service • Influential in the level of service unless counseling dominates the encounter Categories/subcategories describe the number of key components required 406 History History is comprised of three different categories: · History of Present Illness (HPI) Review of Systems (ROS) Past Family Social History (PFSH) 407 History History of Present Illness (HPI) Chronological description of the patient's illness LocationDuration Quality Severity Timing • Context Modifying factors Associated sign and symptoms

History Review of Systems (ROS) Inventory of body systems Musculoskeletal Constitutional Integumentary Eyes Neurological · Ears, nose, mouth, throat Psychiatric Cardiovascular Respiratory Gastrointestinal Endocrine Hematologic/lymphatic Allergic/Immunologic Genitourinary

409

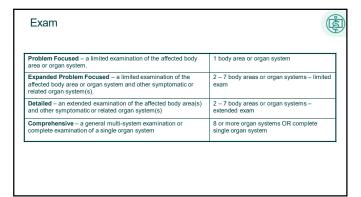

410

History of Present Illness (HPI)	Review of Systems (ROS)	Past, Family, and/or Social History (PFSH)	Level of History
Brief (1-3 elements)	No ROS	No PFSH	Problem Focused
Brief (1-3 elements)	Problem Pertinent (1 system)	No PFSH	Expanded Problem Focused
Extended (4 or more)	Extended (2-9 systems)	Pertinent (1 history)	Detailed
Extended (4 or more)	Complete (10 or more)	Complete (2-3 history areas)	Comprehensive

Exam Organ Systems Constitutional Eyes Ears, nose, mouth and throat Cardiovascular Respiratory Gastrointestinal Genitourinary Musculoskeletal Skin Neurologic Psychiatric Hematologic/lymphatic/immunologic

Medical Decision Making

Thought process of the physician throughout the visit Three elements to consider

Number of management options
 Minimal, limited, multiple, extensive

- Amount and/or complexity of data to be reviewed
- Minimal or none, limited, moderate, extensive
 Risk of complications, morbidity, and/or mortality
 - Minimal, low, moderate, high

Table 1: Complexity of Medical Decision Making – CPT® Codebook paa114

416

Medical Decision Making

# of dx or mgmt options	Amt and/or complexity of data	Risk of Complications	Type of Decision Making
Minimal	Minimal or none	Minimal	Straightforward
Limited	Limited	Low	Low complexity
Multiple	Moderate	Moderate	Moderate complexity
Extensive	Extensive	High	High complexity

AT14 Need to verify page # once 2022 CPT book is printed - not available at time of review Annette Telafor, 9/15/2021

E/M Leveling

Contributing Components

- Counseling: risk factor reduction, patient/family education
- Coordination of Care: arrange follow up treatment not typically provided by the provider, e.g. physical therapy
- Nature of Presenting Problem: Taken into consideration in the medical decision making portion of the encounter
- Time: If counseling/coordination of care dominates more than 50 percent of encounter, time may be considered as the controlling factor

418

Modifiers

- Modifier 24 Unrelated evaluation and management service by the same physician during a postoperative period.
- Modifier 25 Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service.

 Modifier 32 Mandated Services
- Modifier 57 Decision for surgery

419

E/M Leveling

- Many factors to consider when determining a level of Evaluation and Management Service.
- Be sure to Review the Guidelines and code descriptions.

Modifiers

- Modifier 24 Unrelated evaluation and management service by the same physician during a postoperative period.
- Modifier 25 Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service.
- Modifier 32 Mandated Services
- Modifier 57 Decision for surgery
